Introduction

Welcome To The World Of Numerology

We at Numerologist.com want to welcome you to the adventure of looking into your life in an exciting, and possibly new way, John. We're convinced that you've made the right decision. It has become clear to us that Numerology is one of the best tools to help you along life's journey, and with this report, you may find that your personal journey is a more enjoyable than you might have imagined.

Every part of the chart has been tailored to apply to you personally, and great pains were taken to make sure that you get the most useful information possible. We've accumulated years of research, published and unpublished by professional Numerologists, and have selected the "best of the best" among existing and proven methods, new and old, just for you. You'll find it to be filled with exciting and interesting discussions about your life - and a lot of it has probably been left out of the books and reports you may have read the past.

You see, John, we believe that Numerology can be a key that unlocks a life filled with joy, love and prosperity, because once you understand what has been standing between you and your goals, you'll make better informed choices that don't force you to repeat the lessons of the past; Numerology can help you move forward.

We know that making personal changes that improve your quality of life is not the easiest thing in the world to do, John, but we also know that remaining stuck in a place you don't want to be is much harder.

On a less serious note, learning about yourself can be fun, and the best thing about Numerology is that it's easy to do, and easy to understand.

It's said that you can't control the wind, but you can control the sails, and we sincerely hope that this report is just the manual you need to steer your ship of life toward the shores of success and satisfaction.

About Numerology

From the time when human beings developed speech, we realized that words are symbols for things; actions, people, things, places, the passage of time and even more. Eventually, ways to compact these words so that they could be recorded became writing, a secondary set of symbols. As our need to pass information became more complex, we developed symbols for complete ideas and concepts centered on certain principles, and grouped similar concepts into categories, from which we find symbolic systems of codifying the universe such as Astrology, Yijing (I-Ching) and others. Numerology is even more useful than these other methods of codifying information about the world, because it uses everyday numbers in various combinations to explain these categories and the many subtleties of their interaction.

Systems of using symbols for information were also used for divination - just as a letter can describe important events far away or hidden from view, the Chinese Fate Calculators or Astrologers used their proprietary symbols to reveal things that could not be otherwise known. If they were wrong more than they were right, those crafts of divination would not exist today, they would have long since been exorcised from the collective toolbox of those who seek knowledge.

Actually, the use of numbers as symbols of ideas, things, events and words goes back to

the time before numerals, as we know them today, were invented. Some people used letters of the alphabet to act as numbers; the Arabic Numerals, which actually originated in India, only came into widespread use in the west during the early years of the 13th century. They were used as counting devices by the common people, but knowledge-seekers struggled to be initiated into the mystery schools where secret teachings about numbers was taught, explored and codified.

The ancient Chaldeans, famous for their skills in astrology, are believed to have created an early system of Numerology. Their philosophy stated that all things are composed of energy at varying states of vibration, and modern science is finally beginning to agree with them. They, of course, found a way to group everything according to their common essential properties. These basic qualities are underlying principles that extend into mind, matter and action, and exist wherever consciousness exists. Eventually these qualities were codified by numbers, and from that time numbers became more than ciphers for counting - they became abstract principles through which one versed in the art could explore order in the universe and in daily affairs.

The term Numerology was coined by Dr. Julia Seton, and first seen in a book published around 1937. Before then, this type of divination was referred to as the Science of

Numbers or Arithmancy.

There are schools of Numerology that have their origin in ancient Taoist cosmologies which follow the theory of Yin and Yang and the Five Elements. The more modern and very popular system of Chinese Astrology, known as the Four Pillars, is really a numerological method based on the calendar, rather than the movements of the stars.

In India, many methods of astrological divination are based on numerological techniques such as harmonics and magic squares. Some of them use orders and sequences of planets in the Zodiac signs, or cycles of time unrelated to astronomical positions. Systems like those rely on principles and ideas based on observation and experience, rather than measurement, and although they are based on the symbolic value of number, rather than the observation or the sky, their results can be stunningly accurate.

In most schools of Numerology, there are different aspects to working with the numbers. Arithmancy is the set of techniques used for manipulating the numbers and extracting the meaning from their various relationships. Arithmancy gives us the ability to find the definitions we need and the information we seek.

Another way of working with Numbers is called Isopsephy in Greek, or Gematria in Aramaic and Hebrew. This is the technique of assigning the letters of an alphabet, or

(sometimes) the phonemes of a language to numbers. These methods help a practitioner to convert names and words into numeric symbols.

In short, there are many systems and methods of Numerology which, in the hands of a well-rounded and conscientious practitioner, can be almost miraculous in its insights. But what's important, especially in this information-saturated age, is what it can do for you.

Numerology is a profound and reliable way to study your experience in the world. From this study one can uncover secrets that lead to self-knowledge, and understand underlying cycles and patterns that may have been invisible before. These patterns never stop changing, but by knowing what these changes are likely to bring, it offers you the chance to align yourself with the currents in nature, so that you can sail with the wind, rather than against it. It can also give you a pretty good idea of what makes people tick, and provide an excellent road map with which you can navigate the currents of daily life.

Numerology offers you the opportunity to skillfully emphasize your strengths and overcome your weaknesses, and it can help you learn more every day about how to seize opportunities that you may never have noticed before. By doing so, you'll cultivate an inner and almost automatic sense of "doing the right thing" while acting in your best interests at the same time. By putting a little time and effort into the study of this

fascinating subject, you're likely to find ways to make all aspects of your life run more smoothly, making it easier to create the life you want and the future you deserve.

Number Glossary

In order to make it a little easier for you to understand your Numerology Chart, it's important to let you know that Numerologists classify numbers in different ways, and the names of these categories will be used in your report.

- Fadic Numbers – these are the single digit numbers from one to nine. When a larger number sums to a single number, the Fadic number of that vibration is the final total.
- Karmic Numbers – this term describes the numbers 13, 14, 16 and 19, which have special characteristics outside of their Fadic number, or the digits that make them up.
- Master Numbers – this term describes all “doubled” numbers, from 11 – 99. They have characteristics that are entirely different from their individual digits or their Fadic Number, but may include them in their own definition.
- Compound Numbers – any of the numbers from 10 to 98 that are neither Karmic nor Master Numbers. They are usually defined by their individual digits and their Fadic Number, rather than special or individual characteristics.
- These are the four categories of numbers in a Numerology chart, and you will have at least 3 of them somewhere within it. The higher Master Numbers are extremely rare, and even 11 and 22 are not common. Seeing no Karmic Numbers anywhere in the chart is very uncommon, but everyone has compound numbers in their charts.

Again, they will be mentioned in your analysis, especially if they appear as important elements of the chart.

Connecting The Dots

It's important that you know how to get the best from your Deluxe Numerology Report. We have spent years compiling the best interpretations from the lore and research of Numerology throughout the world. But it's important to know that a highly personalized report cannot tell you exactly the same thing that you might learn from a professional Numerologist sitting on the other side of the table.

Nevertheless, we guarantee that you will not be able to find a more thorough or revealing report anywhere. In fact, we don't believe that personal readings with many Numerologists will match the scope and value of the report you are about to read.

From time to time, you may need to "connect the dots" in order to arrive at the exact meaning of statements in this report that are relevant to you at this time. Doing so will, however, sharpen your intuition, expand your self-knowledge, and reveal plenty of pertinent information that you won't find anywhere else.

Your Deluxe Numerology Report

John, your Numerology Chart is a complete and wide ranging study of various Numerological methods that are applied to your birth date and your name. There are essentially 3 studies involved in creating a thorough study of personal Numerology. They are the study of the Life Path, which analyzes your day and date of birth, the study of your Name and Personal Alphabet, and an analysis of the combinations of the first two studies, which is designed to help you obtain some personal leverage in your journey through life; this section is called Destiny Engineering.

The Life Path and the numbers derived from it show what you receive from the world, which is the result of what you project into it, even if you don't feel like you had any part in creating the experiences you encounter. In other words, the Life Path and the vibrations that are subsets of it are like "magnetic" forces that draw to you various vibrations, events and circumstances throughout your life.

Your name has to do with the ways and reasons that you project what you do to into the world. These various ways that we express our presence in the world are shown by the Expression. It's easy to work with, because it is all about the choices you make; it's the easiest aspect of your life that you can use to mold your future. It includes your

Dynamic Personal Alphabet, which explores the various letters that make up your name, and the time cycles over which the letters dominate. This can help you determine, from year to year, the changes and choices you can most easily make that can help your life run more smoothly.

The section called Destiny Engineering can give you insight into how the Life Path and the Expression, combine. This section of your report is specifically designed to help you develop strategies that can alter your future in dramatic ways. It may seem impossible now, but soon you'll see how you can make changes that modify the things you cannot change in such a way that you get what you want, instead of living your life as if "the way things are" is the best you can expect from it.

Chapter 1 of your personal report consists of the study of your name, which has to do with your power of choice. The vibrations derived from your name include:

- Your Everyday Name, and special considerations
- The Subtotals of your name
- Your Soul Urge, or Heart's Desire
- Your Soul Urge Challenge
- Your Persona, or Personality Number
- Your Personality Challenge
- Your Total Name Number, or Expression
- Your Expression challenge
- Your Inclusion Table
- Your Secret Desire, or Hidden Passion
- Your Reactive Mind, or First Response
- Your Dynamic Personal Alphabet
- The Transits of the Letters

Chapter 2 of your report covers the Life Path and the Numbers derived from it, which include:

- Your Life Path
- Your Life Path Cycles
- Your Birthday Number
- Your Birthday Challenge
- Your Birthday Gift
- Your Pinnacles
- Your Achievement Number

- Your Major and Minor Life Challenges
- Your Personal Years
- Your Personal Month
- Your Personal Days

Chapter 3 of your report, called Destiny Engineering, will show various ways to combine the vibrations in your chart as follows:

- The Life Number
- Your Identity and your Secret Identity
- Your Letter Aura
- Your Attraction Number
- Your Destiny Engineering Table
- Two Arithmantic Secrets you can use every day

So now it's time for your journey to begin, John. We suggest reading through your entire Deluxe Numerology Report once first, then go back and explore each aspect of your chart in detail so you can get to intimately know yourself and the world of Numerology.

Chapter 1

The Power In Your Name

According to mystical doctrines, all words have power. In some teachings, words have the power to create and destroy, and you may have encountered these effects when experiencing people with great personal power. Words identify and describe things, directions and places in such a way that the most complex ideas can be given to those who do not have exposure to them by choosing the right words to use. Many traditional societies, and even in the modern academic, business and scientific worlds, the right words define your level of knowledge and experience. It could be said that words are keys that make different fields of experience; that they are keys that open the doors to the life you want.

The main thing of importance to know about words is that they are something that we consciously use every day – words are a control system for our personal magic. This may seem obvious, but you may not realize that the most powerful word in your personal universe is your name.

Your name is the first gift you received after birth, and it was chosen specifically for you.

Sometimes we choose our own names. Through the laws of correspondence, a name contains within it the power of choice.

Your name, when analyzed by arithmantic methods, can help you understand how to give your actions the most power, so that they bring the results you want. In order to properly use your name as a tool, you need to understand the powers, or symbols from which it is constructed

If you aren't conscious of any of the potencies in your name, you'll tend to make far too many choices based on the ideas and opinions of others, some of which may contradict your own best-interests.

When you become conscious of these hidden powers, you can make changes in your behavior and the world around you that are in your favor, because you now know the “right tools for the right job” and how to access them.

It can't be emphasized often enough that the power to create the future you want lies within you, and through the knowledge of the Power in Your Name you'll learn some keys

that can help you unlock your inner treasures
and bring some real magic into the world.

Your Full Name

You may not be aware of how much you can know about yourself, or any individual by their, or your, name. Your Full Name is an element in your Numerology Chart that is explored in depth by finding the various arithmantic factors within it and utilizing them as elements of their own. These factors are known by titles such as the Soul Urge, the Personality or Quiet Self, the Expression and the Inclusion Table. Almost all name-based analytical methods are derived from these.

Since the Expression is the same thing as your Full Name number, and fully explored later in your report, we won't go into it in depth here. What we will do, however is to explore the most basic factors of your name by looking at the one you use in most settings - your Everyday Name. Also, to give you some generalities useful for self-understanding, we'll explore the whole names that make up your full name; a very ancient and insightful method of arithmantic or numerological analysis.

Your Everyday Name

Your Everyday Name is the name by which you are usually called, and sometimes the name by which you are known in business. It represents the general aspects of you that you choose to project to others. In doing so, you set an agenda for your interactions with them, and with the world at large.

The most important thing about the everyday name is that it's about your choice as to what aspects of you are put on display, and those that you decide to keep to yourself, whether consciously or unconsciously. It also acts as an energetic barrier, mostly to buffer things that may harm the inner self.

In most cases, the Everyday Name is the one that is changed, or one that is adopted so that we seem more personable and social to others. Sometimes the Everyday Name and the Full Name are the same, but more often than not, they aren't. So let's explore your Everyday Name a bit to see what it is about yourself that you have chosen to let others know about you.

Since you have chosen an Everyday Name vibration of Seven, others are likely to see you as some kind of mystic, scientist or philosophers. You might encounter many situations in which others like you because they want to "pick your brain" or otherwise enjoy what they see as your special insight. At the same time, others may think of you as being involved in things that are "above their heads", which may result in limiting yourself by seeking out only those whose interests are the same as yours.

Unless you're a specialist or an authority in some field, most people's misperception of you is likely to cause difficulty in relationships. Others are more likely to tune in to your insightful thoughts than you are, so don't think that you need to keep the things that excite you quiet – that's exactly what people want from you.

Your First Name

As you may have guessed, your first name is your social name – the name by which you are referred in social or public situations. Your situation at work, with friends, at parties and almost all social or casual situations is influenced strongly by what you project through your first name vibration. In other words, it's a lot like your face – it's the first impression that others have about you in almost all cases.

Sometimes, your First Name may act as a shield to help protect you, or as a mask to hide something going on within you; yet, this shield, or mask, is like an “interface” that makes it easier to interact with others that helps simple aspects of social life from becoming “too complicated.”

The First Name is one of the main choices that are made for you in life; whether or not you use it as it was given to you is also a choice – it's all about what, and how, you choose to give of yourself to others, whether they are close to you or members of the general public.

Because you have chosen to use a first name of the vibration Two, John, it's likely that others will think of you as someone who is more focused on what they can do for (or with) others than they can do for themselves. Although this is usually a vibration that gives people the impression of you as a team player, or as a good partner, it can cause trouble in both professional and private life. While some will choose to support your best interests, others may attempt to take advantage of you. It's important that you develop strong boundaries and don't let others push you into things that are only to their advantage, and not yours.

By the time you've entered into adult life, you're likely to know that people “draw out” your empathetic or intuitive side, and unless you have a reason to keep someone at a distance, there's a good chance that your insights will be somehow rewarded. It's likely that others will help you move forward in all aspects of life, but you'll need to carefully assess the “price” before you say yes.

Your Middle Name

Some Numerologists consider the Middle Name as the most important of the names that make up your Expression, or Total Name. This is because the Middle Name represents the inner you; it may reveal hidden talents, but it could be about the goals toward which you are striving, or the path that your (usually unconscious) choices are leading you toward.

The Middle Name can describe some of the desires or motivations that you may sometimes be puzzled by; it can explain not only why you have them, but can also tell you how to honor them in such a way that you can increase your level of self-knowledge exponentially. It represents your inner place of refuge, not just in the sense of the ideas or thoughts that you are comfortable with, but the actions that resonate fully with your inner state of being. It can speak for your inner guidance system and let you know if the path you are pursuing is the right one for you on all levels of human existence.

It can also describe your weaknesses and the areas in which you doubt yourself the most. Understanding them gives you a key with which you can unlock true inner healing and release your inner self, which achieves its purpose through its ability to express itself in the actions and activities you perform every day – from the smallest and seemingly least important to the big decisions that could lead to life-changing experiences.

It's also important to realize that the inner self

is not just the ego, John. There is a big difference between the self-awareness of the mind and the inner being that you truly are. Almost all spiritual teachings discuss letting go of the ego so that the true self can come through; learning to tune in to the true, inner self and its power can be made easier through the understanding of the vibrational state of your Middle Name.

John, your Middle Name is of the vibration One, and it is not always an easy cross to bear. Vibration One carries a force that is dynamic, initiating and creative, but it can also be very impulsive. You may be driven to “strike while the iron is hot”, but sometimes, taking action before thinking things through will get you into trouble. This is a quality of psychic energy that does not relax until it either reaches a goal you are seeking, or lands you in a situation you hadn't bargained for.

Anyone with this Middle Name vibration needs to learn how to slow down and focus on what the results of their actions might be. Any kind of meditation practice or mental training will benefit you immensely, because these practices make it much easier for you to recognize when you are acting unconsciously. Slowing down and playing a “long game” activates your inner guidance system, which will keep you pointed in the direction that nurtures you on inner and outer levels.

You probably know that you have powerful forces within you, and sense when that power

begins to flow, but it's much harder to imagine how miraculous life can become when you focus this power on finding what you really want (or want to accomplish), rather than on the effort it takes to get results.

One is the "action number", but on the inner level that your Middle Name represents, the desire for action is the result of the pure creative force that you have within you. This is the unconscious knowledge that you are creating your future. Once you become aware of your responsibility for your own experience, you'll find that your happiness, prosperity and effectiveness will take a quantum leap forward.

Your Last Name

Your Last Name is about that part of you that is present already when you are born. It can be the origin point for major life lessons, but what's most important to realize is that it has much to do with the societal energy that lays the groundwork for your beliefs and the way you behave in society as an adult. This is much like the quality of the year of birth vibration, which is sometimes called the Maturity Number, which comes into effect later in life.

If the Last Name you use has been adapted through marriage or some other circumstance, it has a special meaning. If you adopt a name from outside of the family where your genetic heritage originates, you also adapt the vibrational quality of that lineage. One way or another, it has to do with the history of your life that existed before you were born.

You must realize that your Last Name has something to do with your relationship to your family. In some cases, where the Last Name is not directly related to the vibrational quality that the male parent has passed on to you, it is related to a position in society that one holds. In either case, it also relates to a quality being passed on to the family you build as an adult. What follows logically is that it will relate by way of its Numerological value to important relationships that you develop with any relatives and especially with your partner. But, once again, the Last Name vibration is something you inherit by way of the rules of society, not something that was chosen for you or that you chose yourself.

This factor can clearly be seen as less important than the First Name, because it is not nearly as representative of your choices, but it can also be noted that so many decisions are made due to the influence of parents or society's rules. In some modern societies, where there are fewer obligations to the family or the social group, it has barely any influence on one's choices at all. At the same time, it can be of great importance to your relationship with the society in which you live, so it should never be left out in a study of personal Numerology, where name analysis is of tremendous value.

John, your Last Name is of the vibration Five, which is usually associated with variety and freedom, so it's likely that there was a varied, progressive or fun-loving atmosphere in your background. It's possible that there was a strong dislike for more orthodox or conformist traditions in your family, but there may have been such a strict adherence to tradition that you may seek this quality of life outside the values you inherited.

On the other hand, you may come from a background in which people sought freedom from some type of oppression, and this would have impressed you deeply, and caused you to place a very high level of priority on your ability to do with your life as you see fit. It's likely that your

predecessors were strongly affected by alterations in their own lives due to circumstances beyond their control.

Because of this, you're likely to be a bit more flexible than many of your peers when it comes to adapting to sudden changes. An important life-lesson that may come easily for you is that your situation has a tendency to get more complicated or more difficult when you resist the changes that inevitably occur; the ability to be flexible may bring out the best in you.

Sticking to routine or repetitive activity is not your strong suit; you prefer innovation to following the rules, because you have a strong bias toward the idea that nothing lasts forever. This is one of the major gifts of your Last Name, and because of it, you are likely to keep up with the latest trends in all areas of life, and maybe begin some of your own.

Find ways to honor tradition without being bound to it, because using freedom responsibly is your gateway to a secure future.

Consonants Vs. Vowels

There are many controversies in Numerology about whether Y and W are vowels and consonants. Most Numerology books count both letters as consonants, but most of those books do not take into account various factors specific to the language. Many could argue that W could be a consonant because it was adapted from the “double V” letter used in a few European languages, but in English it is called “double U”, both of which are vowels. It can only be represented phonically by combinations of vowels, such as “EUU.” In the case of “Y”, the only that it’s phonetically analogous to are “E” and “I”, which are both vowels.

There are a few Numerologists that always use these two letters as consonants. Presumably they consider them as consonants that sound like vowels.

We could find only one researcher who had a logical and functional solution to this problem, Kevin Quinn Avery, DMS. In his incredible textbook, *The Numbers of Life*, he posited a rule for them; that Y is counted as a vowel if it is adjacent to a vowel or if it holds the only vowel sound in a syllable. W is counted as a vowel when it is adjacent to and sounded as part of a vowel. Of course, these rules are based on modern English, but it is almost impossible in name analysis to find cases in which Y or W should be counted as a consonant.

But in Numerology, Astrology and other methods of inquiry, there is only one rule, the rule of experience. Different indicators should be specific, and define the subjects of inquiry as they are. In other words, the indications of the numbers should fit the character, there should be no aspects of the numbers that are changed to make them fit the subject. In over 30 years of research and thousands of case studies, we have found that the indications of the Soul Urge and the Personality Number (as discrete subjects of inquiry) best fit an individual’s character when Y and W are counted as vowels.

Your Soul Urge

The Soul is the essence of who we are. The Tibetans say that it is the subtle part of us that coordinates the five elements on all planes; the Greeks believed that it is a mixture of the material components of the world and the Nous, or spirit.

The Soul has an agenda; it is the part of us that seeks experience, expression and growth. Much has been written about how health, prosperity, love and fulfillment are the result of living the life of the Soul, and an equal amount has been said about what happens to us when we deny the Soul its expression.

Author, Shaman, Healer and Teacher Robert Moss has said:

When we pursue goals at the expense of our dreams and the urgings of the Soul, its participation in our lives may diminish or disappear. This can also happen when one experiences extreme pain, loss or other traumas; psychologists call this disassociation. "Soul Loss" affects every aspect of our lives; our relationships, our work and our state of wellness.

Through Numerology, we have a way of glimpsing the urgings of the Soul by reading and honoring the Soul Urge Number, which is defined as being the longing of the inner self. We may know what this longing is, but we may not express it, either by choice or because of our circumstances. That's why it's so important to know more about the Soul Urge; it becomes much easier to express it if you have guidelines that help you follow its lead.

The Soul Urge Number is also called "The Heart's Desire", and some Numerologists use it to understand your relationship style and the challenges to fulfillment in relationships. Either way, the art of honoring the Soul Urge/Heart's Desire is all about achieving a sense of satisfaction and fulfillment in all aspects of life, and that's worth any effort one can make.

John, your Soul Urge, or Heart's Desire number is of the vibration One. Chances are good that you sometimes find it difficult to compromise, while at the same time you are always ready make a bargain that gives you an advantage. You are honest, determined and ambitious, and remain true to yourself. It's likely that little can hurt you, other than someone else getting credit for what you have done.

You probably are an opportunist, almost always ready to jump at the chance to get ahead, simply because you don't like having people micro manage your work or your personal affairs. In your personal life, you probably refuse to "play second fiddle" and are only likely to give in to the demands of others when it serves a purpose you have in mind. Your Soul's Urge is to be in the

lead, not to be carried along behind it.

In both personal and professional relationships, you would benefit by learning that you cannot gain certainty by trying to control every aspect of the situation. You may have a very strong need to know where things are headed, and you'll probably put a lot of effort into trying to steer your relationship in the direction you would like it to go. Sometimes this can make your partner, friends or colleagues feel as if they are being manipulated, or worse, bullied. Learning to trust others is the antidote for this difficulty.

You might also explaining, on a regular basis, that your feelings are deeper than you know how to express – but the best way toward lasting personal satisfaction in all relationships is to respect your partner's independence as much as you do your own.

Generally, the Soul Urge is not thought to have negative manifestations as those numbers along the Path of Life often do. That's because every individual's Soul faces some resistance from the vibrations of the material world, and from others. This resistance tends to interfere with your happiness only when you are not allowing the Soul Urge to be an active, conscious part of life and expressing it fully, or when you aren't working with (or are in denial about) the Soul Urge Challenge by not taking it on.

Your Soul Urge Challenge

In a numerology chart, a challenge of any type is not the retribution of a vengeful universe, but a tool provided by nature to help you overcome weaknesses. Like other challenges in your chart, it is nature's way of giving us "bonus points" for doing something special that may be off the beaten track for the patterns that easily emerge from our many chart elements. No human being exists in a state of perfect balance, but usually is strong in some areas and weak in others.

H.H. Tenzin Gyatso, the XIV Dalai Lama of Tibet once said: "To be aware of a single shortcoming within oneself is more useful than to be aware of a thousand in somebody else." The challenge to the Soul Urge describes a special method you can use in order to reveal and work with these shortcomings so that you can achieve the balance and fulfillment you seek.

How exciting, John; you have a Zero Soul Urge Challenge! This does not mean that you have no Challenge, what it means is that the spectrum of Numerological vibrations will offer you the opportunity to receive the gifts of all of them. In other words, there will be times at which you have to do your thing independently, and other times at which help will be given when you ask for it. Sometimes you'll have to be social and avoid gossip or hearsay, and others when you need to focus on the details of what you're doing.

Occasionally you need to think about how responsible you're being with whatever freedom you experience, and be compassionate without letting others take advantage of you. You need to take time to process things, and take an organized and systematic approach to business matters.

In short, your Soul Urge Challenge is a practical, overall life strategy, which, if you take it up, you'll discover that your insight, prosperity, well-being and security are constantly rising to new heights.

When you consciously work with the Challenge, the Soul has more energy with which to express itself, thanks to the "Bonus Points" you receive from taking it up. By putting forth some effort to consciously handle this aspect of your soul's growth, you automatically summon more creative, intuitive and ecstatic energy from the essence of who you are which will enhance your life in every way.

Working with this aspect of your Numerology chart is about living life to the fullest. Life can be an exciting adventure if you call upon the Soul, the essence of all you are, to come out and play.

Your Personality Number

The Personality Number, called by some the Persona, is one of the two main factors derived from your full name. While the Soul Urge is calculated by summing the vowels, or the soul of words, the Personality Number is found by summing the consonants, which define how the Soul of these words comes into manifestation in the material world.

In other words, the Persona is a compliment to the inner aspect of the self. In any word, the consonants help us make sense of the vowels; they give form to the substance (or in some cases, meaning) of the name, just as spices or fire can give form to the idea of “hot.”

Many Numerologists in India use it as an indication of personal style, and along with it, the type of dress that works best for you, following the line of thought that “the first impression is the last impression” – they use it to define how your personal style and behavior affects others.

Some modern Numerologists call this the “Quiet Self”, and do not use it as a marker of outward behavior, but as a sign of what you may dream of doing in the outer world. In reality, this vibration describes both how you imagine yourself and how you present your best self. On both conscious and unconscious (collective and personal) levels, it describes your learned behaviors and how you use them to express your essential self.

One thing is certain; it is very important in the analysis of how present you are in the process of creating your destiny through your choices.

Your Personality Number can tell you a lot about those you meet, as well as yourself, so it should not be ignored. As you get further along on your journey into your personal Numerology chart, you’ll find out just how useful the Persona vibration and the tips you get from learning to understand it can be.

John, your Personality Number, or Persona, holds the value of the Numerological vibration “Seven.” Seven is the most knowledge-oriented of the Persona vibrations, and it usually shows in one of two ways. Some folks who have this vibration style themselves as “loners” or “outsiders”, and prefer to wear their values on their sleeve. Others are impressive but reserved in their personal style, preferring to represent the knowledge they possess as an expert, rather than an interested party following the trend. Others will consider you as a generally friendly person who always has something interesting to say; your way of expressing yourself will attract many people who think you can help them achieve greater heights.

Your Personality Challenge

As mentioned earlier, some writings on the subject of Numerology treat the Personality Number (Persona) as only having to do with visible aspects of the self, while others treat it as a hidden yet motivating aspect of the personality, and call it the Quiet Self. But both views of what the Persona implies and what its challenge can mean are superficial at best. Anyone's attitude and thoughts about the self affect health, prosperity, relationships, and all other matters connected with our well-being.

Your Persona is built up from experience, which is the feedback the universe gives us about our choices, thoughts, words and deeds. When you are unhappy with your circumstances, it is the Persona that interprets the Soul's perception of them and integrates this perception into the conscious mind – it may generate an action plan in line with its Numerological value, or generate angry, self-critical, defensive or defeatist thought. These thoughts and emotions may sabotage your plans or stop their momentum, and if no plans have been made, they may suppress the psychic energy generated by your inner self, which could result in disturbances to the well being of your body and mind.

It should be mentioned again that in Numerology, a challenge is not a threat. The challenges in Numerology, especially those that are derived from the name, are about choices you can make that can improve your

overall circumstances.

John, your Personality Challenge is of the vibration Four, which may be somewhat difficult for you in a major way; this challenge requires you to focus on the details of your tasks without feeling like you're being taken advantage of. The easiest way to master it is to do things in a systematic and orderly fashion – make lists and schedules for yourself, and abide by them. You may also want to pay particular attention to your physical well being, because the gifts of this challenge can enhance your wellness and bodily strength. Other gifts of this challenge include persistence, stability and management skills.

Your Expression Number

The Expression, or Total Name Number, describes the magic that you bring into the world. It is the number that gives an overview of what you send out into the world. People often do not realize that through their actions, they create chains of cause and effect that lead to new experiences. Essentially, everyone is constantly creating the future, in their own way.

Learning about your Expression and its Challenge gives you the opportunity to make adjustments in your actions through which you can engineer a future that is more in line with the gifts and talents you possess and can share with others.

One reason that the Expression is such an important part of your chart is that it represents your power of choice. Even though your name was given to you, it was a choice, transferring to you this wonderful human power.

This ability to choose may not always be a blessing, though, because every vibration has its upside and downside. No one makes perfectly correct decisions all the time, and it takes a good deal of understanding and self-knowledge in order to tune your decisions and actions to move in a direction that suits you best, and reflects the most favorable qualities of your Expression Number.

Unlike the Life Path Number, the Expression is not permanent. It can be changed, therefore changing the quality of your choices. Even though it is possible to change your name to enhance or suppress aspects of your character and therefore your lifestyle, this has to be done very carefully – many facets of one's Numerology chart would have to be thoroughly in order to make sure that they are not fixing one thing and breaking another.

A famous teacher once said: "What you send out into the world is what you get back." This is a perfect description of the Expression, and why some call it the Destiny Number.

John, your Expression number is Eight. Eight possesses a natural genius for organization, which usually is visible through your efforts to take control of your circumstances. You're likely to be known for your ambition, forthrightness, courage, discipline and persistence. When you are committed to an action, you have the ability to get things done, no matter what it takes.

Although Eight is often called the "money number", too much emphasis on materialistic pursuits, especially those involving speculation, can cause problems for you and result in obstinacy, stuck-ness or even nervous or psychological tensions. Money may not come easily to you, unless you learn to set aside such negative characteristics as a lack of consideration for others or impatience

with them. You also may just work too hard; slow down and put some energy into your relationships - and into your personal and physical well-being.

The negative path of Eight leads to intolerance, bluntness, aggressiveness and control issues. Eight is not known to “pull punches” – especially when under stress. On this path, you may even take on too much responsibility due to a lack of trust in others’ ability to perform at their best. If you are disappointed by others enough times, you may become manipulative and treacherous, creating more problems than you can solve. Love, loyalty and sharing are your best medicines.

Although your fear of failure may be strong, it will disappear if you devote your time and energy to something bigger than yourself and allow for the loving support of others – if you welcome the assistance of others, you’ll find your confidence and your fortunes improve.

From time to time you will have to make assessments, or even judge others. Some may think of you as a self-righteous person, but they will eventually learn that your judgments are unbiased and sound, especially if you learn to soften your hard edges. The hardest part of having this talent is to know when to reserve judgment so as not to cause unnecessary or even unjustified harm to someone. If you learn to do so, you’ll relax the tension of this powerful vibration and open the flow of prosperity and abundance in your life.

Your Expression Challenge

Like other major elements of your Numerology chart, the Expression has its own challenge. It's actually the numerological or Arithmantic sum of the challenges to the Soul Urge and Personality Numbers.

This does not mean, however, that it is described by combining the two challenges together. The Expression Challenge is Synergetic – which means that it is a whole vibration that is greater than the sum of its parts.

The Expression Challenge is distinct from its two component challenges, and has a different meaning. You can work with this challenge, and it won't affect the Soul Urge or the Persona challenges, or your work with them. Often it is recommended to work with the Expression first because it has a larger overall effect – people usually know more about the real you through the Expression than through the separate components of it.

Once again, in Numerology a challenge is not some kind of counter-force that works against your happiness, success or well-being. It is a way of gaining “extra credit” or “bonus points” in the school or game of life.

Three. Having this vibration as a challenge to your Expression may not seem to be difficult, but when you ignore it or don't realize that you have a tendency to avoid people when you're stressed, this issue could be very distracting, and could really be annoying for you, because you're not likely to know why. Mastering this challenge requires that you be more open about yourself and become more social, but it's best if the events and gatherings you attend are not for some well-defined purpose or have an agenda other than having a good time. Travel helps as well, as long as it is not for business purposes or part of an established routine. When you master this challenge you'll know, because others will respond to you more favorably, and you'll find more creative ways to increase your prosperity.

The Inclusion Table & Your Karmic Lessons

The Inclusion Table, which is a standard part of a modern Numerology chart, calculates the number-vibrations of greatest or least intensity in your name. This number is usually called the Karmic Lesson, or Karmic Gift because of the particular philosophies of the writers of Numerology books. You neither have to believe Karma in order to gain more self-knowledge, nor should you use the information that you gain from it to speculate about reincarnation, as some new-age writers do.

What you're about to learn, John, are the well-documented effects of the vibrations that are overbalanced or under-balanced in your name. Both carry important messages and indications. It's not important whether a number is overly abundant or lacking, or missing completely – those are just nuances that alter the description of the numbers that are most highly emphasized. It's an excellent guideline for what you can work on in order to make your life more fulfilling. It may also describe a talent, characteristic or vibrational pattern that you can fall back on in times of stress.

The key to understanding the imbalanced vibrations in your chart is that when they happen to be the dominant vibration of a Pinnacle, LifePath Cycle, Transit Essence or Personal Year, you'll usually find yourself in circumstances dominated by that vibration, and your experience of it will be significant.

A shortage of vibration Nine is very rare in full names; it is the vibration of compassion for others, John. When it is insufficient in a chart, it usually indicates a lack of compassion, which must be cultivated in order to gain some balance in the personality. This can be done through various meditation or other spiritual practices, even if the goal for doing so is more material, such as an increase in personal power or better health.

Your Hidden Passion

The Hidden Passion is sometimes called the Secret Desire, and represents a very intense drive in any individual. Although they are pretty basic and primal, they will all be in evidence in your choices and behavior, John.

The drive, or drives represented by a Hidden Passion are so strong that you have to be vigilant and remain cautious that you don't take things too far when you are pursuing it. One can be activated when you are attracting a similar vibration through the patterns of Year, Month, Day, Cycle, Pinnacle or the Transits of your Personal Alphabet. This is an extremely useful indicator, because it may describe aspects of your behavior that have been hidden from you – until now.

Your Hidden Passion of vibration 6 shows that you are driven to be seen as responsible and secure, in both relationships and material concerns. Partnership is extremely important to you.

”

Your First Response

You may wonder why, John, when you are confronted with an emergency or opportunity you seem to respond in a habitual way. Well, the answer is clearly written in a seldom discussed chart element that some call “the subconscious self”, but it got that name at a time when the metaphysical public was mistaken about a good deal of psychological terminology.

The First Response is a habit pattern that is woven into your full name, and is therefore an unconscious choice of thought, words or deeds that act much like a reflex. Most people experience it when they are caught by surprise.

It may describe the first thing that you consider when a new idea, relationship opportunity or project appears even before you choose which way you decide to handle it.

This is how the First Response usually works, although each individual puts their personal “spin” on the reaction. Understanding it can help you modify your immediate reactions, and integrate your reactive mind into your conscious choices, much to your advantage.

Your First Response number is 7, John, which means that 2 numbers have a count of zero in your Inclusion Table. When a sudden change or opportunity arrives, you are likely to doubt that hasty action will work, and prefer to wait “for the smoke to clear” or let things sort themselves out.

“

Your Dynamic Personal Alphabet

So far, we have studied your name by breaking down its individual parts and separating the consonants from the vowels. Now we're going to study the meanings of the individual letters themselves.

Your personal alphabet consists of the letters of your full name, and the best way to understand them is considering them as individuals. This section contains a listing of the letters of your name, along with an explanation of that letter's meaning.

But a simple explanation is not the whole story: the letters of your name not only have static meanings – they each have a certain period of years over which they exert their power. These periods of influence are known by names like the Personal Energy Phase and the Excursion, but many expert Numerologists call them Transits.

The term "Transit" is actually taken from Astrology, where it is used to define the past, present and future positions of the planets in their orbits, referenced to their celestial positions at the time of birth; it's a very popular method of forecasting. In the case of Numerology, however, it's about you transiting through the various vibrational powers of your name, not the influence of the stars.

It's surprising, John, that so few Numerology

books have described this important method; this may be the first time you've seen anything about your personal Dynamic Alphabet, even if you've studied Numerology before.

Your Alphabet describes the possible strategies, tactics and maneuvers that you can use to break out of limiting patterns and give you the ability to shape your experiences.

Earlier in your report, we've shown that your Life Path Cycles, Pinnacles, Personal Years, Months and Days bring opportunities, while the various chart elements derived from your name are about your choices and decisions. Your Dynamic Alphabet and the other aspects of your name give you the ability to modify what you are attracting so that it's easier to get the best from any chart elements.

Mastering your chart is not easy, but if you persevere, you'll begin to see results in a very short period of time. Through the careful use of the Power in Your Name, you can get major positive results sooner than you think.

From the moment you commit to changing your life, John, you can start to turn little twists of fate in your favor, and eventually engineer your own destiny. Knowing about your Dynamic Personal Alphabet gives you control over the engine that drives the Power In Your Name.

Please note that this section shows only the discrete letters of your Dynamic Personal Alphabet, while the Transit Table shows your entire name according to the time during which the letters will manifest the special resources you can use to manage and even create your chosen future.

J is a letter with a very interesting structure – the hook at the bottom of the letter turns toward the beginning of the word; from the way we write and read, this means that it is anchored in the past. This usually means that a powerful experience in early life is not forgotten, and dealing with it is an important part of your character in the present and an key to your future. J is a judgmental cipher, but can also be a jokester or a sign of joyfulness. In hard times, you can be your own jury and jailer, but if you learn how to be just in your treatment of yourself, you can avoid self-imposed jinxes by jettisoning old junk that no longer really matters. This letter is often found strongly positioned in the charts of natural leaders; it gives you a talent for being self-reliant and in control of your situation. If you can let go of your tendency to justify holding on to anger, you'll thrive.

O is an enigmatic letter that confines everything, but is truly defined by the empty space within it. This letter-vibration is complex, and shows your desire to be responsible; in fact, responsibilities help you maintain your inner strength so that you can fulfill your vast potential in life. Your communication skills are likely to be excellent, and it's not likely that you'll shy away from a discussion where your personal opinions are important. Chances are good that you're very open and objective, but when under stress, you can easily turn to expressing your frustrations in an overbearing way. One important key to happiness for you is adaptability; stresses increase when you are put upon to things for people who don't appreciate your efforts, experience or knowledge – if you encounter these situations too often, you may become stagnant and unable to move forward in a satisfying way. You may discover that you have a strong creative streak, and any form of creative expression is fuel for your happiness and well-being.

H looks very much like a part of a ladder, which, as you well know, is a device that allows you to reach the heights or the depths. Because of its association with the vibration 8, it is often associated with financial matters and issues connected with authority and power, but what's more important is that it can be a sign of extremes. H is both hope and hopelessness, and signifies the forces of healing; they will often take you down before you can climb back to health. It is a sign of someone who has a lot of heart, both in terms of generosity and courage, but as you probably know, can also be a sign of the harm that can be done by your own hungers. It may be more difficult for you to avoid being victimized by your strong emotions, but they can also be a tremendous helpmate when it comes to reaching the pinnacle of success, as long as you keep your sense of humor.

N is thought of as being neutral and balanced, because it looks absolutely the same upside down as it does when it is standing upright. Because of the steep diagonal line, this letter is fast-moving and energetic, and gives you the advantage when things change radically. Sometimes

you may go overboard, but you can also let go of negative patterns easily, as long as you retain your natural sense of balance. Being associated with vibration 5, N gives you charisma, a happy demeanor, and strong intuitive abilities that should be cultivated - listen to your feelings before taking risks. You may love the feeling of travel and should follow up on that urge, since travel may be a balancing and healing activity for you. It's easy for you to make changes in your circumstances, because your love for variety needs expression, and having "distractions" that you need to adapt too may balance these characteristics enough to keep you from getting caught up in patterns that are not helpful at all.

P is a bit top-heavy and needs a strong support system, but instead of its arm reaching out, it curves back on itself in a way that makes it appear to be closed. You are probably aware of its being a source of your love for precision and pensive nature, but because of its closed nature, it's likely that when you pronounce your profound judgments, you may find it hard to do so in a polite manner, despite your desire to present a pleasing persona. You have an analytical mind, but also a possessive one; you are likely to value your intellectual property as much as others value their material ones. It's extremely important that you acknowledge your intuition, and allow your instincts and gut feelings to guide you from time to time. Your mind will quickly grasp your physical and emotional signs that "something's up" - if you pay attention, you'll soon react by performing in a perfectly appropriate manner, releasing the power of prosperity and healing consciousness within you.

E is the most energetic of the alphabetic vibrations and carries the power of enthusiasm that comes from numeric vibration 5. It generally represents freedom and variety in all its forms. Look at its shape; E has three horizontal arms that represent the esoteric components of any human being; body, speech and mind - or taken from another perspective, body, soul and spirit. It is the source of your efforts toward progress and independence, and also your ability to create and adapt to change. You tend to act on impulse; it's easy for you to jump into action without hesitation, sometimes to your own detriment. At the same time, you tend to express yourself in a non-judgmental, supportive and sensitive way, but you have to be careful not to go to extremes or be too excessive in your pursuit of freedom, knowledge and fun. You probably like presenting yourself in an exotic way, and your eager and restless nature can be an asset if you apply your effortless curiosity to self-understanding.

T is an interesting letter, because its lowercase form looks like a plus sign, while the uppercase form looks like a tack or nail - it seems to attach a special value to your circumstances and your behavior, because it can help you to think or talk things through. It's the source of your curiosity but it can also lead you frustration, especially if you end up finding a lot of "dead ends." You'll sometimes want to go against the grain of situations or people, in order to "nail down" a

point or idea into physical form. Relationships are extremely important for you, because you need to share your thoughts and feelings. It's important that you do this sharing, because allowing tension to build up and fester is something important that you need to avoid. Facing this kind of pressure is a talent that you need to cultivate, because if you keep your feelings too private, you'll find that you can't get through to those who matter the most to you.

R is a very interesting letter; the top turns in on itself, which means that you respect privacy and retain secrets, while the bottom half of the letter is like a leg stepping forward, which means that you are outgoing and future-oriented. R can mean that you're ready for a new start (reboot) and seek opportunities to re-invent yourself, but because this letter-vibration is filled with emotion, there may be a rough road ahead when you do release the past. Nevertheless, it carries an optimistic, loyal and forgiving quality that makes it easy to keep moving forward despite obstacles and hindrances, and this optimism seems to renew itself on a regular basis. Because of your progressive and responsive nature, there may be times when you become rebellious or filled with rage, usually when your humanitarian instincts are rubbed the wrong way. Others may find you curious or mysterious in some way, and although your sense of privacy and teaching abilities are strong, you might enjoy revealing exactly who you are.

S is the very image of a snake or a meandering river, and can have the same slippery or hard to negotiate nature of either. You'll find times when this quality can emerge as sensitive, sensual and smart, and others when you can be secretive and seductive, depending on the situation. This letter-vibration focuses on the senses, physical or otherwise. It can make it easy for you to be adaptable and 'go with the flow' but has a persuasive quality that can sway others opinions successfully, often to your advantage. Learning to tune in to your intuition can bring excellent results for you, and help keep you from being sent off on a tangent when you should be holding steady on course. The S is one of the more social and emotional of the letter-vibrations, and these qualities can lead to success, as long as you don't waste time trying to sidestep challenges instead of using your imagination to shape them into useful experiences that stimulate knowledge and personal growth.

The one year Transit of S can be a very stimulating period of time for you, because your actions may result in the kind of responses that you experience on an emotional level. The good news is that the troublesome effects of this transit rarely last beyond its period. Some of your expectations, especially those having to do with relationships, may not turn out as you expect them to, even if you use every possible means to achieve your goals, which is likely to be your method at this time. Changes can be expected, and you'll make many of them, mostly focusing on immediate satisfaction or short-term goals. This Transit often portends a change of residence, but as well as finding a new place in the world, it can also mean that you'll awaken to

a more 'spiritual' way of being, rather than the seductive and possibly overwhelming temptations of the world of the senses. Your path will be one that you chose, so recognize that the results are too.

Your Identity

Your Identity is easy to explain; it is simply the initials of your names converted to their Numerological values and combined together to give a number that is more or less a snapshot of a power you have at your disposal at all times. It is the jumping-off point for the Letter Transits, as well as your Secret Identity, the composite effect of the transits of your various names. This is not a power that you should consistently deploy; the Identity provides the energy that can empower a specific “fallback” strategy that you can rely on when the best strategy is too difficult to carry out.

Its numeric value is an essence number based on the most powerful letters within your Expression (your Total Name Number), the Cornerstones. In that way it is similar to the Life Path, which is the essence of your time, date and place of birth, but can be of a vibration that is different from any of those factors – it also behaves differently from the Life Path and its various time-cycles.

While the Life Path is about the situations that you are prone to attract, the Identity is about how you attract them, or more accurately, the kind of actions you can choose to take in order to attract the more enjoyable and satisfying aspects of your Life Path numbers.

Your original Identity is a set quality, just as the Life Path is a set quality. Although the Life Path is about things in your environment that are more or less out of your control, like the fact that the weather changes, the majority of the challenges and benefits that you attract from the larger world (especially those that involve others) can also be, but you can change that, according to your choices; that’s what the Identity talks about.

Let’s talk about the numeric vibration that helps define the meaning of your Identity:

John, your Identity carries the vibration Nine, which means that you have a talent for seeing “the big picture”, and that it will serve you well as long as you can keep your emotions in balance. It’s likely that during a Personal Year, Month or Day of vibration Nine, you’ll have to sacrifice something in order to make progress and gains – you might start learning to use this encompassing power by getting rid of what does not serve you on Personal Days of this vibration. Expressing yourself as being steadfast and loyal will gain you a lot of points with others, but only if these are your real feelings; this vibration will give away fickleness and insincerity every time. Your intuition and understanding can be great gifts, but during time-periods of vibration Nine it may be difficult for you to tell the difference between compassion and unnecessary self-sacrifice, so learn that sometimes the best way to help others is to leave

their troubles alone. Especially during periods when this vibration is running, it's easy to make their difficulties yours.

If you want to learn a little more about your identity, please refer to your Dynamic Alphabet pages, and pay special attention to your cornerstones.

Your Secret Identity

The Secret Identity is the dynamic aspect of the Identity, and a really important key to learning how to create your own future.

As mentioned in the section about the Identity, it is set by your given name, but nothing stands still – all the letters in each of your names are allotted times of greater influence according to their placement in your name; these are called their Transit Periods or Power Cycles. This is not much different from the Achievement Number and the Life Path as they generate Personal Years that follow one another according to their cycles.

What this means is that every time any letter in your name comes to the end of its Transit Period, it hands the reigns over to the next letter in order. Therefore, John, while each letter has a specific number of years during which it can help you express its talents, gifts and abilities, after it runs its course another letter emerges with its own powers.

The reason that this is called the Secret Identity is because the changes are subtle, and you might not realize that these new potentials or resources are available to you until you are forced by circumstances to reveal them. By knowing about the changes

of Identity in advance you can not only act strategically to attract the kind of circumstances you desire, but by planning in advance, you can also turn possible troubles into benefits that will be expressed through the Attraction Number, which you'll learn about later.

If you're interested in gaining a deeper level of understanding about the Secret Identity, read about your Dynamic Personal Alphabet above. Understanding your personal alphabet is a very important key to becoming an expert Destiny Engineer.

What follows is a brief listing of the most important behaviors to focus on during the period of your Secret Identity vibration. By making the choices that follow, and acting to implement these choices, it's almost certain that you'll get the best possible results from the Attraction Number that is active at the time.

One – Choose to assert your individuality and move forward with new plans; avoid egotism and arrogance.

Two – Choose to cooperate with others; avoid becoming co-dependent or subservient during this time.

Three – Choose to stay on task, be creative and be social; avoid scattering your energies and feeling like you're "not up to it."

Four – Choose to organize, manage and be optimistic; avoid feeling oppressed, being stubborn or being intolerant.

Five – Choose to accept change and be responsible with your freedom; avoid being overindulgent or rigid in your views.

Six – Choose to accept and adjust to responsibility; do not make commitments lightly or put others interests above your own.

Seven – Choose to develop self-discipline and cultivate faith; avoid isolation and being manipulative.

Eight – Choose to be reliable and dependable, and focus on the bottom line; avoid thinking you are the only one you can depend on.

Nine – Choose to expand your horizons by letting go; avoid holding on to toxic attachments to people, places or things.

Your Basic Transit Table

The Basic Transit Table shows the birthday and year when each character of your Dynamic Personal Alphabet becomes active. This will give you a bird's eye view of the energy phase shifts in your name. The information contained is a sort of "ready reference", that is a much shorter version of the Destiny Engineering table found in the next section.

Letter	Years	Year Ending				
J	1	1981	2001	2021	2041	2061
O	6	1987	2007	2027	2047	2067
H	8	1995	2015	2035	2055	2075
N	5	2000	2020	2040	2060	2080

Letter	Years	Year Ending			
P	7	1987	2015	2043	2071
E	5	1992	2020	2048	2076
T	2	1994	2022	2050	2078
E	5	1999	2027	2055	2083
R	9	2008	2036	2064	2092

Letter	Years	Year Ending			
J	1	1981	2013	2045	2077
O	6	1987	2019	2051	2083
H	8	1995	2027	2059	2091
N	5	2000	2032	2064	2096
S	1	2001	2033	2065	2097
O	6	2007	2039	2071	2103
N	5	2012	2044	2076	2108

Chapter 2

Your Life Path

There are many factors, charts and calculations that make up a complete Numerology report or forecast, John, but of all the elements of your chart, one stands alone when it comes to describing your circumstances throughout life.

This element is your Life's Path, sometimes called the Birth Path or the Destiny Number. It represents both the situations and opportunities that are attracted to you as the results of your actions, and, therefore, the circumstances of the world through which you navigate. It is a central number, or core element in the hierarchy of vibrations that make up your Numerology chart, and used in almost every method of Numerology that is known to exist.

Your Life Path Number is found by adding the month and day of birth together, adding them to the year, and finding the Arithmantic sum of this total. This number is so important because the date of birth cannot be changed; in the eastern world it is often said to represent "non-negotiable Karma."

The physical and psychic environment leading up to (and for some time after) your birth is also part of the unchangeable aspect of your present experiences. The seed determines the type of tree: although the tree can be trimmed or otherwise changed, its basic type cannot be changed.

Most forecasting cycles and time periods are found by examining the components of the Life Path as well; the timing of the unique event of your birth, when examined through the lens of Numerology gives us the key to unlock the essential patterns that present themselves to you throughout your experience.

John your Life Path is of the vibration One. You will have a busy life to live. You will find yourself thrust into situations in which you must be assertive and competitive, and

achievement is a positive and satisfying reward in itself for you in life. Your behaviors will be centered on ambition, self-motivation, originality and autonomy. You emotional

attitude is anchored in self-confidence, self-assuredness and pride. It could be said that you are a progressive person, but that's because you are always ready to move on to the next stage of anything you are involved in. When the far horizon or the goal comes within sight, you will do everything in your power to make sure you get there first.

Sometimes though, you may run into difficulty because you would rather make your own decisions rather than accept a well informed piece of advice from another person. Yet, it is vital that you make your own decisions, but what this means is that you need to put in the time to do the boring tasks of research and so on. Having a strong emphasis on cooperation among other numbers in your chart can be very helpful in channeling your powerful and highly focused energy towards progress and success.

Hastiness is one of the characteristics that can get you in trouble from time to time, because the rush to be the first one across the finish line often causes you to overestimate your own energy and preparedness while underestimating competitors or opponents. You have great faith in yourself which supports your desire to overcome whatever odds you're faced with, but in extreme cases, you may take your self-esteem as being a license to accomplish your goals by "whatever means necessary."

Having resources to fall back on is something else you need to cultivate, because like the grasshopper in the famous fable, you often

will be so involved in the actions you are taking and your experience of the moment, that you may not adequately plan for the future. People born with a Life Path of One tend to misunderstand the difference between resourcefulness and resources. When one becomes used to getting what they want by skill and drive, it is easy to forget to set aside "just in case."

Now John, sometimes you may feel that you face more challenges or difficulties than others do, but that may be because you are the first to reach the barricade, or the first to step into the unknown. Because your first thought is to take care of things yourself, you tend to treat problems as being more difficult than they need to be.

In the past few years, the term "unilateral" has become part of the common vocabulary due to news events and political dialog. This word is developed from Uni - meaning One, and Lateralis - meaning next to or side. Although this is the original meaning, we commonly use it to mean acting alone. This one sidedness is usually an unconscious behavior that is an attempt to avoid others being given credit for your efforts, or to keep from feeling that your self-interest has been diluted or absorbed into that of a group.

The subtotal of your Life Path number is 19, which is one of the Karmic numbers. Numerologists often write it as 19/1, because the properties of 19 are very different from a combination of 1 and 9. You may often find yourself facing tough decisions or hard

choices in which neither option is satisfying to you, but will ultimately lead you to a point of balance that gives a strong but compassionate approach to your circumstances and other people.

Perhaps the most important lesson that anyone born of Life Path One has to learn is the true pleasure and satisfaction of co-operation and mutual success. It is your job to break away from standard trends, but it is also your job lead and inspire. It is your job to be the first one over the line, but it is also your job to understand that every victory and achievement you accomplish is a victory for humanity itself.

Although you may sometimes fall to hastiness or overconfidence, you have the capability of achieving great things if you tune in to the positive aspects of your Life Path. Doors will open, and you will quickly rise to the top of whatever you choose to do. If on the negative path of One, you will find opposition, roadblocks and delays one after another. The choice is yours.

Your Life Path Cycles

Your Life Path is dynamic; it is a specific combination of universal energies that are present at the time of your birth, and has a great deal of impact on your life. It is the sum of three distinct vibrations that you attract through the incident of birth; the vibrations of the month, the day and the year at which you enter this plane.

Although most books on Numerology read the Life Path a singular vibration that operates throughout life, John, the vibrations of the month, day and year act independently. They are called Sub-Paths, Sub-Cycles or Life Path Cycles. They operate sequentially, and are roughly representative of the periods of youth, adulthood and maturity. They are calculated in a way that brings them close to two of the predictive cycles used by astrologers; the cycle of the progressed Moon, and the orbital cycle of Saturn, which we commonly call the Saturn Return.

The first of these Sub-Cycles is called the Formative Cycle, and is of the same vibration as the month of birth. It begins at birth, and ends at the beginning of your second cycle. The second cycle is the Cycle of Productivity, which covers the years in which you are at your most productive in terms of building for the future and establishing yourself in your society. The Productive Cycle holds the same vibration as the date of birth, and begins on your 27th birthday. The third, or Harvest Cycle, is what you reap from the efforts of the other two. It begins on your 54th birthday. It is represented by the vibration of the year of birth, which some numerologists call the Maturity Number.

These sub-paths can provide important opportunities to support your success and happiness if you tune in to their positive aspects, but if you are tuned to the negative aspects, they can be really troublesome. They represent the circumstances and individuals you attract to yourself, and, as you can imagine, if you are focused on the negative aspects of any number, that's what you will bring to yourself in ways you cannot see and may not consciously understand.

These Life Cycles are very important elements along the Path of Life. They are of such long duration that they are easy to forget about, but they are always there, contributing to the matrix of forces in which you live, move and experience your being. Almost all forecasting techniques of Numerology start with them. They are like the sets for the three main acts of a play or film, while the various vibrations of shorter cycles, such as the Personal Years or the Transit Cycles, are like the scenes within the three acts; the character development and plot twists that make them into a story - but all of that happens within the context of the settings, costumes and plot line.

Now it's time to discuss your three Life Path Cycles in order. They are discussed in reference to

your overall Life Path, to give you a sense of how these vibrations fit into the context of your life.

Your Formative Cycle

Your Formative Cycle describes your growth and the groundwork laid for the individuation process. It also defines the circumstances that you attracted at the moment of birth, through your actions during your early years, and how these circumstances prepared you for adulthood.

On the one hand, it gives context to the positive and constructive situations that, even if difficult, build the character.

On the other, it speaks about the troublesome experiences that plant the seeds of self-defeating thoughts which can grow into the unconscious obstacles that may act as saboteurs during your Cycle of Productivity.

In short, your response to the vibrational combination of the Formative Cycle and the Life Path becomes the foundation for success and happiness in your life.

John, your Formative Cycle carries the vibration Four. During childhood, it's likely that you attracted an environment that fostered a strong work ethic, either in a positive or negative way. At the same time, your social life and personal ambitions may have paid the price for the lessons of reliability and consistency that you needed to learn. Even if you rebelled against the way in which these lessons came to you, chances are good that you learned them well. Applying yourself in school may have been important to you, because good grades and praise from adults were something that you had to work hard for, and no matter how well you did, it was a matter of work, not play.

It's likely that you attracted circumstances that could have limited you in some way, at least until you reached your teenage years. You are likely to have cultivated a very strong desire for financial independence. Many people with this combination get involved in their own businesses early in life, and you may have attracted the opportunity to do so, even before the beginning of your Cycle of Productivity. No matter what kind of struggles you had to face in order to "get your game on", you probably developed the persistence and level of commitment necessary to see things through.

Your Cycle Of Productivity

Some Numerologists consider the Cycle of Productivity to be the most important of the three Life Path Cycles, because it is during this period of life that you build the structures that will determine the quality of your Harvest cycle, and therefore the rest of your life.

The Productive Cycle represents your career in the world, John. It can represent your greatest achievements, but is, more importantly, about the contribution that you make to the lives of others for good or ill. How you approach life as an adult, in whatever culture and society you live, is described by the vibration of this cycle. This sub-cycle is the period of time when your Birthday Vibration is being expressed most strongly, and therefore it is the most personal of the Life Path Cycles. It shows how you attract the opportunities to express your personal gifts and talents, and has something to say about the kind of feedback you will receive from the world at large. You may want to take a look at your Birthday Vibration if you want to learn more about how you might attract the "upside" of this cycle's vibration - because it is the most personal one, it is actually the easiest to work with.

Because your Cycle of Productivity is of the vibration Six, John, you will probably attract and experience major changes, adaptations or adjustments to domestic life. It's a favorable time for establishing long-term relationships, and it can mean a change of residence; the nature of this cycle is such that even the ending of relationships will turn out favorably in the long run. One thing is sure – relationships formed during this vibration will not thrive if they are based on dependency and possessiveness. The pursuit of your aims and goals will have a powerful effect on your loved ones, so tolerance works better than trying to make them conform to your ideals. Another thing is that moving or transactions involving homes, such as buying or selling them, will work well for you.

This is generally considered to be an easy cycle, as long as you stay focused on your

responsibilities. It sometimes is thought of as a time of settling in, whether to home and family life, or to a particular career path. The adjustments spoken of earlier are usually about adapting to something you want, but sometimes they are about adapting to changes that occur that are out of your control. Whatever the changes are that you have to make, they are something that you can do, and probably will, without too much anxiety or confusion.

Interestingly, this cycle is also characterized by a cheerful attitude and a gift for supporting others in just the right way, and chances are good that you will make your counseling, advisory or helping skills available to others. When difficulties arise, you are likely to face them head-on and with courage, no matter if they are your own or those of your friends or family. Your people skills probably have

matured, and others are likely to consider you the kind of person they can rely on and trust in.

At the same time, your willingness to help others with their problems may work against your best interests, unless you put yourself first. In fact, you may have to change your plans more than once in order to accommodate the needs and wishes of others, and doing so may cause problems in professional or domestic life. Although you may face many trials of this type, they will be overcome through the support of a partner or spouse.

Your Harvest Cycle

This cycle, which represents the rewards that are reaped from your efforts and actions during the previous two cycles, lasts from its beginning until the end of your lifetime. In other words, during this part of life, you don't necessarily attract anything new; you attract all of the unused "karma" from what has been done. Because of this, this is a time in which you can experience this period of life in two ways; either you can work with your various challenges to make sure you get the best from vibrations that you have not taken advantages of, or you can sit back and accept, at random, whatever comes to you from the "upside" or "downside" of the vibration it carries.

As you might guess, this portion of your Life Path offers opportunity, but by now, you should have a good idea as to how you can bring what you want into manifestation, and if you don't, you should be gaining the experience that enables you to recognize the actions you take that brings to you what you don't want. Many people approach the latter part of life as a time of living by habit, and being driven by the momentum of the past. This is not a good idea - in fact, it may be the worst possible approach to having a happy life in the latter years.

Some people choose to give something back to the world by sharing the wisdom they have gained with others in some way, usually as a mentor, teacher, guide or parent. Others choose to continue with what they have been

doing and hope that it continues on, often accepting whatever offers or opportunities they receive as recognition for their previous contributions. Numerology shows us, however, that one does not have to choose between the patterns that have laid down a roadmap for the future; it shows that you can have the future that you want, as long as you know what you want and make an effort to attract to you.

Because the possibilities of the Harvest Cycle are open-ended, the only thing that you need to decide is whether you want to accept the downside of the vibration it bears, or whether you want to move your experience in the direction of the best possible aspects of the vibration. Even after you enter this cycle, you can change its course. All you have to do is recognize whether or not you are experiencing the results of thinking about what you don't want, as opposed to reaping the benefits of what you do. And you can always change your mind.

Therefore, the explanation of your Harvest Cycle that follows will concentrate on the upside and the downside of the vibration, so you can see not only where to concentrate your energies now, John, but so you can diagnose which of the possible conditions you need to work on now, so you can build up the "momentum of mindfulness" that will create the kind of Harvest Cycle that you truly desire.

A Harvest Cycle of vibration Nine is about letting go of the past, John, and as it begins, you'll probably find yourself preparing to do something that is very different than the activities that dominated your previous cycles. This may mean the acquisition of new knowledge, through learning, travel or other direct experiences. Even if this knowledge is gained in a very conventional or traditional way, its purpose is to expand your horizons and help you accept the changes that come when you let go of the way things have been. This idea of letting go does not mean "giving up" – it's a dynamic process through which you make room for greater possibilities that bring you closer to your inner goals, ambitions and ideals.

This vibration cannot stop you from continuing on with things you've been doing, but it does mean that you'll attract the opportunity to do things that are important to you personally, or things that will enable you to make a real contribution to the lives of others. You must also realize that this is a vibration which expands you beyond previous limits, not one that causes you to attract new limits that will make you feel even more confined. The only real danger or problem lies in not being prepared for others who may attempt to take advantage of you – it is a very emotional and even romantic vibration, and you may be too sympathetic to those who don't really deserve it. Your intuition will work better than before, however, and your inner guidance will be far more exact, once you get the hang of "feeling" it.

You can also expect a decrease in the obligations to others that you have developed in the years before this cycle begins obligations – it's very likely that they will sort themselves out or otherwise become less necessary to attend to. This cycle can help you attract opportunities that can show you how to make a smooth transition between what you are obligated to do and what you would like to do.

Almost every Numerology book mentions that vibration Nine has to do with travel, but this does not always mean going from one place to another geographically. It's all about going beyond previous frames of reference and limits, whether geographic or psychic. If you put your mind on what you want to do with your life, rather than what may be keeping you from doing those things, you can make those limits dissolve, and open the door to a life full of possibility, opportunity and fun.

...In Summary

Your Life Path Cycles should never be ignored, and later in the report, we will show you simple ways to compare them to other key numbers in your Numerology Chart.

These comparisons will help you to develop strategies and tactics that are easy to use in order to get the best out of your Sub-Cycles.

But before we reveal these secrets, there is a lot more about your life and times that you need to become aware of, so enjoy your study of the Birthday Number!

Your Four Pinnacles

The Pinnacles are periods of time during which you will attract various opportunities, according to the numeric vibration that they carry, but they happen to be a very potent manifestation of the particular vibration that they hold. Because getting the best out of your Pinnacles is not always easy, some writers call them Attainments.

Each Pinnacle is like a distant feature on the landscape that will eventually be reached, and, according to the choices you make, what you will receive when you get there. In other words, your Pinnacles will usually describe the "reward" you earn for working with the vibration that you attract during their cycle.

Psychologists of the Jungian School have a term well suited to this idea. They use "integration" as a term to describe how concepts, feelings and strategies that aid in the relationship with the self, others and the world become a part of us as we grow and experience life. This is almost exactly what the folks who developed the modern system of Numerology describe when they discovered the Pinnacles.

Since they are part of your Life Path, these four vibrations cannot be changed, but your choices and actions determine whether you experience the more favorable aspects of those particular vibrations or not. If you have not chosen to direct your own destiny through your efforts, the potential of the

Pinnacle will be almost impossible to reach, resulting in the less pleasant aspects of its vibration manifesting through your circumstances and environment.

As mentioned earlier, there will be four Pinnacles in your lifetime, each having one of the numerical vibrations that you attract during their years of operation. Some authors call these vibrations "Attainments", with the idea being that you must reach the highest quality of the vibrations that you can. Today we realize that these vibrations bring the lowest to the highest of their qualities whenever they manifest, and that all we have to do is to "tune in to the quality that we want to attract with our behaviors.

Most good numerologists put more emphasis on Pinnacles 2 and 3, because during the 18 years they are in power, you can use their particular qualities to establish yourself in the world, and lay the groundwork for the future.

The four Pinnacles come to an end on specific birthdays, which are specific to your Life Path vibration. Your First Pinnacle, or Pinnacle of Attainment, lasts from birth until your 35th birthday. The Second Pinnacle, or the Pinnacle of Obligation, lasts until your 44th birthday. Your Third Pinnacle, known as the Pinnacle of Foundation, lasts until your 53rd birthday, when your Fourth Pinnacle, or Pinnacle of Retrospection begins. It lasts for the remainder of your lifetime.

It should be mentioned here that the Pinnacles are considered by some authors to be the second-most important aspects of the Numerology chart after your Life Path

Your First Pinnacle, The Pinnacle Of Attainment

The first Pinnacle is of great importance in the study of your character, because it tells of the developmental experiences of your life, and what your attitudes are about achievement, as well as the development of your sense of self. It is about beginnings, and what primary formative forces influence your early life the most. It can be about childhood or early adult trauma, but it can also be about victory and early accomplishments. In many ways, this is the vibration that sets you in motion. By the time it is over, you're likely to have "found yourself" and set your direction for much of your life.

Having the dynamic force of this Pinnacle in early life could have made it easy for you to develop the habit of jumping to conclusions, and if you fall into that pattern, John, it could land you in trouble from time to time. You're likely to be filled to the brim with ambition, self-motivation, originality and an independent spirit. Almost all of your psychic and physical resources are, by the laws of nature, devoted to forming your body and character, but for you, they'll be doing so very quickly. Almost always ready to move on to the next phase, stage or case, you may have been noted, as a child, for your sudden interest in new things, as well as your abandonment of them.

The nature of vibration One is to do things without delay; even if you were accused of having a short attention span, it's not likely that accusations alone were not enough to slow you down. Actually, the difficulties during this period of time are more likely to result from not paying attention to details, and a lack of interest in the long-term consequences of things. It's even possible

that, during this time, you could have developed another habit that causes problems for you - the habit of starting things that you don't finish. But if you're aware of this issue, it makes it easy for you to assume the role as the person who gets things started and leads others into new and possibly uncharted territory.

The doubling of your Life Path vibration during any period of your life is extremely important, John, because it signals a time during which you will have many opportunities and things will generally run smoothly. During the Pinnacle of Attainment, you must learn to take your time and be patient with your projects and with others. This skill can greatly benefit your relationships and your prosperity, no matter what the vibration of your second Pinnacle happens to be. It is also important that you are careful about momentum; you'll need to move forward without rushing blindly into things, and to see things through until the end. If you master these lessons, and work on seeing others as working with you and not for you,

your first Pinnacle will give you a brilliant start.

Your Second Pinnacle, The Pinnacle Of Obligation

During the nine year period of your Pinnacle of Obligation, you will attract, according to the nature of its vibration, circumstances that engage you in the fulfillment of your obligations to society, no matter what culture you may be a part of. You are likely to participate more fully in community life, and spend time reinforcing the social bonds between yourself and others, or you may focus entirely fulfilling the basic need for contribution to, and participation in the world at large.

This could be a favorable and successful period for you, John, but one during which you will most certainly attract new responsibilities. Most people who have the vibration Six during the Pinnacle of Obligation are occupied with domestic and family matters (including handling the responsibilities of a family or organization) during this 9 years. Whether in a positive or negative light, marriage, romance and all they entail are brought under focus now. Some people attract major adjustments in their lifestyle because of marriage, while others may be adjusting to major changes that need to be worked with regarding less permanent relationships. The good news is that these adjustments, if they are made because of your sense of responsibility, usually increase your fortunes.

Another side of vibration is that favorable changes in the career or profession can occur because of others' faith in you. If you experience a sudden rise in position or in power, be very careful, because without firm foundations, things can fall apart as easily as they came together during this time – especially if some form of partnership is involved. The financial aspects of life usually go well under this vibration, as long as you stay focused on your long-term goals and your best interests. Avoid gambling – even though you'll be luckier in general, thinking that this luck is permanent can easily lead to addictive behavior. You can build a very firm foundation for the future under this vibration, as long as you act with your best interests at heart.

Your Third Pinnacle, The Pinnacle Of Foundation

Some numerologists consider this to be the most important of the Pinnacles because during these 9 years, you will be building a foundation for the remainder of your life. Working with this Pinnacle can increase both the length and quality of your life, because your actions now will help to attract the supportive and healthy biological and psychological conditions that are so important for developing resilience and energy as you age. Working against it by denying the opportunities that are attracted to you will only increase the kind of baggage that will slow you down on the road to happiness. A positive attitude toward yourself during this Pinnacle could make your future quite pleasant.

Your Pinnacle of Foundation can be a little hard to get a handle on at first, because of the nature of the vibration Seven that it carries. This vibration favors solitary activity - scholarship, and other activities based on study, introspection, analysis or creativity; it's likely that the conditions necessary to pursue these more intellectual or scientific aims will arise, possibly to your great benefit. You may find yourself wanting to take up the study of an arcane subject, return to school to obtain a higher (or another) degree, or develop a small (and unique) business of your own.

Although this is not an anti-social vibration, it may be hard to establish new relationships under this vibration. Those that started before the beginning of this Pinnacle usually are not affected by this vibration. For you, this may be the time to go on a vacation, retreat or sabbatical, and if you do so, it's likely to result in your obtaining a gift that you need to bring to the world, like the heroes of the old myths.

Your Fourth Pinnacle, The Pinnacle Of Retrospection

The Fourth Pinnacle begins at the end of the Third Pinnacle and lasts for the remainder of your lifetime, hence, it is a time not only of reflection, but a time of harvesting all the benefits, knowledge, experience, wellness and prosperity you've acquired so far into a coherent and self-sustaining whole that provides energy to fuel your inner life, your physical body, your drive and your motivation. If you've been lucky, this won't be a time filled with regrets, it will be a time filled with the opportunity to be who you really are, the sum total of everything you have gathered into your life and the things and circumstances that you've projected into the future. Your personal efforts will be directed towards having the best quality of life possible. Many people become deeply involved in spiritual practices or philosophical interests during this part of life.

Because Four is the vibration of your Pinnacle of Retrospection, John, you are likely to be quite serious about continuing to work as you grow older, in fact, some people with this Pinnacle meet their greatest accomplishments at this time. Of course, this does not mean continuing on in the same position with a company; it could very well mean that you begin working for yourself by opening a business or turning a hobby into a profession. Some have to work during this period, or may experience other limitations because of issues in the Pinnacles that came before, but it's likely that you may be limited in some way because of financial or other commitments that demand you stay in place.

Although it's not likely that big windfalls will arrive during this time, when and if they do, there will be some type of struggle to benefit from them. Don't worry, however; even if you don't have the persistence to see things through, this Pinnacle is likely to bring with it people and circumstances that make dealing with challenges easy. There is a strong association of this Pinnacle with care or caregiving, so once it starts, avoid committing to too many favors – they could easily become burdensome. The best thing about this Pinnacle is that your practicality and attention to detail will improve, and help you establish a rock-solid reputation and status that will bring you much comfort and joy.

...In Summary

You should recognize by now how important your Pinnacles are, John. Being able to act in such a way that brings out the best possibilities of these time periods can bring your life to a whole new level, one that is fulfilling and successful.

Further along in your report, we'll discuss the easy ways of working with your Pinnacles, and how to draw the best from them. It doesn't matter if you're in your 1st or your 4th - there are ways to turn things around so you can enjoy the gifts that were given to you at birth.

But now we move on to a really interesting part of your chart, the Life Challenges, an important key to self-understanding and a fundamental strategy for improving your life that you can use today.

Your Life Challenges

The Life Path number is made up of the vibrations of the month, day and year of birth. These three vibrations define the major stages along the Life Path, and help us understand how we change over time.

One of the ways it helps us to navigate the tides of change we all face is to offer us Life Challenges. These Challenges will increase and decrease in prominence at different times in life, but that's not a bad thing.

Challenges in Numerology are not contentious; the old books wrote of them as if they were harsh lessons we had to learn. In modern times, we have discovered that they are actually different. The various types of Challenges that we have are more like "extra credit" questions on a test, or a make-up exam for one you missed. If we are able to attain the best possible expression of their vibration, it will empower other aspects of your chart, so that they can attract or express the best qualities of their vibration.

Sometimes the Challenges might offer one or more of those "now why did I do that" moments. When they do, it is a

signal that you've allowed yourself to go off course a bit - they are offering you the opportunity to take the "high road" that their vibrations represent. If we ignore them altogether, then the "low road" of the Challenges will manifest as persistent issues related to their vibration and will bring out the less positive qualities of the key elements in your chart.

There are three Life Challenges in your Numerology chart, John; the first and second Minor Challenges and the Major Challenge. The First Minor Challenge will be felt more strongly during your early years, the Second Minor Challenge will more in force in later life. The Major Challenge will be experienced throughout your lifetime.

So when you are thinking about what you can do to improve your situation, need a quick and effective strategy for handling an issue that has presented itself, or feel as if you are off-track when it comes to attracting positive experiences, study this section of your chart and meet your Challenges - the extra credit you gain will bring up your total score!

Your First Minor Challenge

The First Minor Challenge, as stated earlier, is active during your early years. These early years generally run through the mid 30's and sometimes into the 40's. The Challenges are found by finding the numbers along your Life Path that form a connection between the components - hence, they work with the individual vibrations of the Life Path Cycles, and give us the opportunity to tune into a vibration that affects two of them at one time.

If we can make use of this element, achieving the quality of the First Minor Challenge allows us to link together the Formative and Productive Cycles, which can help us use the experiences of our early lives to make the best out of the circumstances of our Cycle of Productivity.

John, Your First Minor Challenge is of the Vibration 2. Two is often called the friendliest of vibrations, and having it as a Life Challenge means that you'll attract opportunities to benefit from cooperation with others, and you should accept them when they arrive. Sometimes others may offering their services and support, but may not hold up their end of the bargain, so it's important for you to be discriminating about who you choose to cooperate with. It's also important that you learn not to follow other's leads in an indiscriminate fashion. If you follow directions, and cultivate your intuition by listening to your feelings about situations and (especially) people, your "extra credit" will gift you with interpersonal skills that will be of great benefit, even financially.

Your Second Minor Challenge

The Second Minor Challenge picks up during midlife and carries on until your later years. This Challenge links the Formative Cycle to the Harvest Cycle, effectively blending youthful enthusiasm with the wisdom of later years. It forms a balance between innocence and maturity, helping us to avoid the kind of mistakes we all made before we gained the experience to recognize our vulnerabilities and learn how to balance them.

When we work with this Challenge, we are able to gain a level of experiential knowledge without losing the joy in life; we become able to make sober decisions without losing our sense of humor. But like every vibration in your chart, it too matches the quality of your consciousness. If you open to the possibilities of gaining the "extra credit" of this Challenge, the positive side of its vibration will continue throughout your life, while if the opportunity to gain from it is denied, the latter half of life will be more difficult to navigate.

John, your Second Minor Challenge carries the vibration 3. Three could be considered difficult Challenge for many people as they become older, because of having habituated to cultural demands that push them away from creative and social activities. The "extra credit" that comes from a Challenge of vibration 3 requires that you be expressive; don't leave what you want to say to the young. It means that your second half of life should be all about sharing – others will appreciate what you have to say and what you do, and once you begin sharing in the most creative way possible, the lucky and pleasant qualities of this vibration will begin to flow into your life. It will not be difficult to meet these requirements, because the vibration itself will attract the opportunity – all you have to do is to accept it when it arrives. If you choose to go it alone during this period of life, you'll find life to be more difficult than it would be if you were sharing your time and talents with others.

Your Major Challenge

Your Major Challenge works in a different way than the two Minor Challenges. While the latter link elements of the Life Path to attract potentially uplifting circumstances, the Major Challenge bridges the two Minor Challenges in such a way to give an opportunity to work with a Challenge that is active throughout the lifetime. Some people find that working with the Major Challenge alone improves the quality of life overall, and that it helps to identify and work with deep, underlying issues, through which one can make breakthroughs regarding any obstacles they may face.

Working with this Challenge can be extremely rewarding, because where the Minor Challenges are capable of giving us extra credit in a course, the Major Challenge is more like a single test that lets us skip the course completely. Like the Minor Challenges, whatever is attracted by the Major Challenge to help you rise to your potential will depend on your consciousness. If you look at your various shortcomings as an opportunity to overcome them and live a more fulfilling life, you will. If you look at your troubles as a cruel joke of fate, they will only become worse, until you have a change of heart.

Your Major Challenge carries the vibration¹, John, and this means that you need to achieve balance as far as your individuality and drive are concerned. There may be times when you fall into “whatever” mode and comply with others’ demands to keep the peace, whereas at others, it may be hard for you to figure out how to work together with others without forcing them to do what you want. Sometimes this Challenge has to do with drive – ambition and courage may be something you are not used to, but these vigorous, creative and innovative qualities are the key to opening the door to success. Engage in some kind of activity where winning or losing matters, even if it’s chess or video games as a passive way to channel this powerful energy, and soon you’ll begin to cultivate it. When you begin to pass this vibration’s tests, you’ll find that you are attracting more opportunities in which others want you to take the lead, and your whole life will be the better for it.

Your Achievement Number

The Achievement Number represents an extremely important vibrational pattern in your Numerology Chart. It acts in such a way that for every other number, it provides certain challenges and their solutions.

Kevin Quinn Avery, D.Ms. was the first modern author to write at length about this chart element. He said:

“The Achievement is what must be accomplished in life... Until the Achievement is obtained, there will be tension in the life causing negativity.”

He was not the only numerologist to consider it of great importance; some practitioners of the Chaldean school call this number the Life Path, and only judge what we call the Life Path today as the first Personal Year.

When one achieves the fullest expression of this number, obstacles to a prosperous and happy life become less difficult to work around or eliminate. This truly speaks of achievement, in both the material and spiritual sense.

John, your Achievement Number is 1. One is the number of individuality and self-directed action; the number of innovation. It is a vibration of leadership, which is something you can achieve, no matter how challenging the obstacles are that you might face.

At the same time, you need to learn to stand up for yourself, and learning to do so may not be easy. But you can do it, as long as you learn to listen to your heart, which can guide you to the right course of action, if you only believe in yourself.

Achieving a state of balanced self-esteem is not easy; too little can turn you into a doormat, and too much can make you arrogant. For you, John, there will be times when your emotions swing from one side to the other of this equation. If you let go of the ego-based desire to control situations and people, you'll find that your internal guidance system will work perfectly, and attract the conditions in life by which you truly thrive.

The most amazing thing about the Achievement Number is its special ability to provide solutions to the issues it attracts to you during certain periods of time signified by the Personal Years and Months, during your Life-Path Cycles or Pinnacles, or with any Challenges you face. In fact, your relationship with any of the vibrations in the cycle of 9 presents a specific Challenge and a specific Gift. In a very short time, you can learn to act in line with your Gifts and get the best out of your experience.

Here's a table that describes the Vibrations you encounter, and the Challenges and Gifts that your Achievement Number will manifest. The table is written for your specific Achievement Number, and will help you through any challenge, whether it's a problem that arises due to a Life Challenge, a Pinnacle, a Life Path Cycle or Personal Year or Month, or any time that you are attracting difficulties to yourself.

Your Achievement Number = 1									
Vibration	1	2	3	4	5	6	7	8	9
Challenge	1	3	5	7	9	2	4	6	8
Gift	9	2	4	6	8	1	3	5	7

In other words, the Vibration Row contains the vibration you are dealing with, whether it's a Pinnacle, a Major or Minor Life Challenge, a Life Path Cycle, or any Personal Day, Month or Year, as described in the next section. The Achievement Challenge explains the difficulties you are most likely to attract during that time, according to your Achievement Number, and the Achievement Gift explains the solution to any challenge from the various vibrations, which are likely to be hidden in the situation itself.

When You're Facing Vibration 1:

If the Vibration you encounter is 1, your Achievement Challenge of 1 is likely to attract situations that make it difficult for you to hold on to your self-esteem in one way or another. Others may try to make you believe that a new beginning is not possible, and you shouldn't even try. It may also be too easy to force your will on others. Your Achievement Gift, in this case, works through vibration 9, which is the power to let go of the past in order to make room for the future. The circumstances you attract may not turn out as they have in the past, so if you give it a go with a heart full of hope, instead of regret, you will succeed.

When You're Facing Vibration 2:

When the current Vibration is 2, you are likely to encounter situations in which you may be made to feel "less than" or attract so many distractions that you find it difficult to stay on task, because these are the most typical manifestations of Achievement Challenge 3, regardless of its time cycle, or the intensity of the challenge. The balancing Achievement Gift attracts vibration 2, which brings to you the opportunity to speak up for yourself and your feelings. As long as you are able to let go of toxic attachments and do so, you will attain happiness in relationships and your financial efforts.

When You're Facing Vibration 3:

Since your Achievement Challenge is 5, there will be too many opportunities to go overboard with any indulgences you enjoy, which can result in your experiencing the side-effects of "too much fun", which might be enjoyable while they last, but aren't likely to be too helpful when it comes to your relationships or your reputation. Your Achievement Gift of vibration 4 will offer you the chance to be systematic and orderly, and you should take it. Do things in a step-by-step fashion, you will find that you'll organize yourself in a way that may not show immediate results, but will build a better future.

When You're Facing Vibration 4:

This may be a tense time, because Achievement Challenge 7 will attract situations that cause you

to become impatient, suspicious and skeptical. You may even feel that nothing works, and that there's no way to get the results you want, if you allow this challenge to overcome you. Your Achievement Gift of vibration 6, however, attracts opportunities that make your work and your burdens much lighter if your self-interest is your first priority. In other words, as long as you put your well-being and your best interests first, you will build a firm future for the years to come.

When You're Facing Vibration 5:

The Achievement Challenge, which carries the vibration 9 during this time, will attract those who have unrealistic expectations of you, or those who want you to do for them what they are unwilling or unable to do for themselves; possibly making demands of you that could cause losses. An Achievement Gift of the vibration 8 will attract situations that require organizational skill, and demand that you follow through, and make good on your promises or claims. If you do so, you'll find that the changes of the year are welcome ones that open the doors of success and happiness.

When You're Facing Vibration 6:

Because your Achievement Challenge is the vibration 2 it's possible that you'll attract situations to which you over or under-react emotionally; you're likely to have issues with sensitivity to others. It's even likely that you'll find cooperation with others more difficult than usual. Your Achievement Gift is vibration 1, which means that you have to take the responsibility of leadership. You'll need to stay grounded and be confident, and be willing to make decisions that move things forward, not back – if you stay in charge, you'll find that others are willing to cooperate with you when it's time to get things done.

When You're Facing Vibration 7:

Having the Achievement Challenge of 4 during this time is no easy task; you're likely to find yourself in situations that cause you to wait or procrastinate, and if you have to deal with the biased or controlling behavior of others, you may even begin to adapt some of their views, which won't help you at all. Your antidote to this situation, the Achievement Gift 3, is to allow your expertise to shine; you're the best at something, especially if what you're doing gives you the

opportunity to be creative and confident. Don't start anything you can't finish, when this Vibration is in power.

When You're Facing Vibration 8:

The Achievement Challenge 6 typically attracts situations in which you feel like you could make things better by interfering in others' problems, or by sacrificing your best interests for those of another. It may also result in unrealistic or perfectionist expectations of yourself or of others. Your Achievement Gift is that of the Vibration 5, which brings many changes, but these changes help you learn how to be flexible: don't resist them. If you have the self-confidence to stay in the present, you will be able to focus and stay organized while others are "losing it."

When You're Facing Vibration 9:

Having an Achievement Challenge of 8 will attract situations that frustrate you quickly, and a typical response to them is all about control. Issues regarding money and power are likely to surface, and you may become confrontational or find yourself facing off with challenging people. The Achievement Gift of the vibration 7 will bring opportunities to learn how to trust; during this time you must learn how to trust your intuition, how to trust yourself, how to trust others, and how to trust the Universe. Although it may seem hard at first glance, extending this trust will enable you to achieve any goal that you choose, because when you believe that things will work out, they will.

So as you can see, the Achievement Number is all about what you can do to make things better for yourself and those whom you love. If you do nothing else with your Numerology Chart, you can practice utilizing the strategies of the Achievement Number and see how much better things go in your life.

As you are soon to learn, John, the Achievement Number is the key factor in calculating the Personal Years, Months and Days, as well as many other important time-cycle numbers in your chart. It is like a "strange attractor" that causes the Universal Vibrations to fall in line with these specific Challenges and Gifts that you can deploy to your advantage. Armed with this knowledge, there are few situations in the world that can present a situation you can't handle, making one of the most valuable aspects of your Numerology Chart.

Your Personal Year Cycle

In your individual Numerology chart, the Personal Year is one of the most important vibrations – it is what links you to the common calendar, and describes the ease or difficulty in working with the energies of the Universal Year.

The Universal Year Number is found by adding the digits of the year and reducing them to a number from one to nine. It represents the sea of vibrations in which we all take part. Your Personal Year is found by adding the Achievement Number to the Universal Year Number and reducing the new sum, and represents your relationship to the Universal Year. Even more importantly, it describes what is easy to attract during that calendar year, and implies a strategy that you can use to help you create a wonderful future.

The Personal Year Cycle runs from Year 1 to Year 9, and then begins at 1 again. Each year in the cycle has special meaning, and maps out a strategy that can be really helpful when it comes to the attainment of your desires, John. Of course, life is not a bed of roses, and certain years in the cycle will be more challenging than others.

The Personal Years are not as strong as the longer time-cycles in your chart, such as the Life Path Cycles and the Pinnacles. Because of this, their indications will be somewhat modified by the longer cycles. As you read

about the Nine Year Cycle, it would be a good idea to go back and check over the longer cycles; you'll iron out any confusion you might have about the meaning or prediction that any Personal Year brings forth.

One of the most important things to remember about the Personal Year Cycle is that whenever the Personal Year is of the same Numerological Vibration as one of your key numbers, it will tend to be more significant than other years in the cycle. Since your Life Path number is, in effect, your first Personal Year, we will begin the cycle there.

Lastly, everyone reacts to each Personal Year differently. When we study your name and the transits of the letters, we will revisit the Personal Year and discover not only what magic you're likely to bring to the table, but how these 9 vibrations are different in every cycle throughout life.

In order to make it easy for you to find your Personal Year, a table has been included that will allow you to look it up quickly. Just look in the personal Year column or browse through the years – it's easy. Don't forget that the Personal Years, being all about the interface between you and the collective or Universal Vibrations, begin on January 1st, not your birthday.

You should also know, John, that your Achievement Number, which defines your Personal Year for you, has its challenges and

gifts that can help you mark out a strategy that will be of great use to you. This information is included in the description of your Personal Year.

Since the Personal Year is a more intense vibration than the month or the day, learning to consciously work with this cycle can give you a hedge against the little things that go wrong at times, so that you can work toward achieving the best year ever, year after year.

Your Personal Months

Your Personal Months are based on your Personal Years, but are, obviously, of much shorter duration. There are 12 of them for each year during the Personal Year Cycle, and they can help you determine the calendar month when a particular aspect of the Personal Year will come into manifestation. This information can be helpful in two ways – on the one hand, it can help you decide which month of the year is best for a certain activity, and on the other, it can help you determine the best time for enacting a change of strategy that will help you get the best out of your Personal Year.

Personal Months are not usually considered bad or good when compared to the particular annual vibration you are experiencing. They merely show the circumstances or situations you are most likely to attract during the calendar month, based on the vibration of the year. Depending on how other chart structures are operating during any annual cycle, it may be easier or more difficult to get the kind of results you want; it's entirely up to how much energy you want to expend in working with the monthly vibration. For most everyone in this busy day and age, it is better to focus on working with the Personal Year vibration, the Life Challenges and the other challenge opportunities present in our charts, and work with only the opportunities presented by whatever experiences you attract during the various months.

Nevertheless, if you need to work out a quick tactical maneuver, you can look up the Personal Month Number in the chapter on your Achievement Number, and find very useful information about your chart.

Again, the Personal Month is subsidiary to the year, and you are likely to notice that each year, the monthly vibrations in your chart are different according to the year – there are 108 months in the 9-year cycle.

As an example, you may see a month whose positive indications match the efforts you need to make in order to master another challenge in your chart. This only means that the work of mastering the challenge will be easier at that time, and that you may want to focus on working with a different challenge after the month passes.

One thing is certain, John, just because a Personal Month looks easy and fun will not overcome the challenges you'll face during the year or gain the gifts of the other important challenges in your chart. After a while, however, you'll begin to learn that the indications of the Personal Months are excellent timing devices that can help you get the best results from working with your chart, and help you learn how to attract the results you want, rather than the results you don't.

PERSONAL YEAR ONE

Lucky you, John! A Personal Year of vibration 1 means that you will attract the opportunity to make new beginnings, to start fresh, and to launch things you have been holding back for a while. One is the beginning of the cycle, and it's likely you will feel like it's a personal obligation to take charge and move forward with your plans; a whole new "mission" could begin.

If you haven't been planning to start something new, you should, because whatever you begin this year will last throughout the nine-year cycle; this year's actions are the foundation for what will be happening during the following eight years. It's a good idea to plan for a new beginning in advance, because even if you're not expecting it, the opportunity is likely to arise anyway. In fact, by doing so, you're surfing a cosmic wave of synchronicity that can easily move you toward success.

This is the year to assert yourself, to push forward with your plans and to come up with new ideas. You are attracting positive vibrations to yourself, so as long as you remain positive and keep a progressive outlook, you'll see doors open and feel increased levels of energy. A positive attitude will make you feel like nature is charging your batteries!

But there are a few typical drawbacks to a 1 Personal year. It's possible that you could become so opportunistic that others might see you as being overly ambitious or arrogant; if you keep other's feelings in perspective, however, you could avoid any major clashes. Do your best to look before you leap.

You may have to go it alone at times, but that's OK, because new things and new people will be entering your life, and opportunities that are easy to capitalize on will present themselves. It's possible that a whole new life may begin. If you've been waiting for the right time to put your best foot forward, that time is now!

Situations that occur during your Personal Year 1 may bring up issues related to your self-esteem, which means that you may have too little or too much. A strategy based on not expecting things to turn out as they have in the past, and making sure you finish whatever you

start would be helpful. Don't try to hold on to the past, or you may miss out on important opportunities that are very likely to arise.

The Months Of Personal Year 1

JANUARY Because of the way that Personal Months are calculated, January will be Personal Month 2 this year. At this time, you'll find that you have a noticeable advantage when it comes to gaining the aid and assistance of others. You'll probably be a little "fired up" about making a new beginning or launching a project, and as long as you are willing to share the spotlight, others will be too, and more than willing to cooperate. At the same time, because this is a One personal year, you may find that the cooperation and support you receive may not last. You have to be careful not to push too hard in promoting your own agenda right now, because success will come only through working with others, and by letting opportunity come to you. If you act aggressively to pursue it, things will not go as well.

FEBRUARY John, for you this is a Personal Month 3, and it offers the opportunity for success, as long as you are not too free with your time, money or energy. Do your best to stay focused on what's most important, and let go of anything that you cannot finish; it's important that you focus on accomplishing something during this month. Because it will be very easy for you to become distracted, and put your effort into an unprofitable direction, you seriously need to tune in to your emotional guidance system by asking yourself "is this taking me in the direction that I want to go" and see how you feel about it. You are attracting vibrations that are very positive now. Be creative in your expression, and find some time to enjoy the social activity that the month brings.

MARCH A 4 Personal Month almost always has a feeling of being limiting or restrictive. If you attend to details, especially those regarding work, you'll probably gain some advantage, and if you do not, things will be more difficult than they have in previous months this year. You're most likely to attract things that are too big to handle easily, so don't be stubborn and pretend that you can do anything. This is a good month to consider your personal wellness. One way or the other, the limitations you face will slow down your progress toward your goals, and that's likely to be frustrating. This is a month of hard work, and it is especially important to realize that it will build structure and order for the rest of the year; don't resent it.

APRIL A Personal Month of the vibration 5 can give you a sense of greater freedom. This is a time during which good decisions can bring favorable changes, while those made in haste or made for the purpose of avoiding responsibilities will only bring trouble. A Five personal month is very favorable for travel, and you may want to take a little break in your routine in order to see what it will bring. Another thing that is really important is that you check every detail of things you have in the works; this may be an excellent time to bring new methods or systems on board

so that you can work with the changes you're attracting, instead of against them. Pay attention to coincidences, and look for meaning in the changes that happen.

MAY This month carries 6 as its overall vibration, so you may find that matters concerning the home and family take precedence, John. Your relationships with others, especially intimate ones, are prominent right now, and will occupy your attention "for better or for worse." If, during the previous months, you have been working cooperatively with others, it will likely be for the better. This vibration protects your money, so try to avoid being too aggressive about either gaining or spending it; you can attract it easily at this time. Obligations and responsibilities are likely to mount up, so maintain a positive attitude about fulfilling them, and make sure that you take care of your responsibility to yourself first. Don't take on other's problems as your own during this month.

JUNE A 7 Personal Month is likely to bring delays. You can expect the pace of life to slow down, and trying to force them to speed up will not help. Since, at this time, you are attracting peaceful and spiritual situations, or those that require thought or analysis this is a good month for personal work, private activities and vacations. Agreements and alliances will be important to you, and this is a good time to make them, but be careful about extending your trust too easily. It's not very favorable for pursuing financial goals; it's far more important that you look seriously at what has been happening and assess what's working for you and what you can discard. Let forethought, intuition and insight guide you in all you do at this time.

JULY Personal Month 8 will, more often than not, bring various opportunities for you to take control of situations in business or in personal life. Material and financial pursuits are favored, but taking advantage of this vibration requires something of a change in your tactics, because many people "play fast and loose" with the power this vibration attracts to you. Attempts to force others to cooperate with you are likely to rebound as negative effects on your finances or your important relationships. You'll find that it's much easier to get your point across if you're not being overly aggressive, and are willing to let others play a role in your success John.

AUGUST Any Personal Month of the vibration 9 is likely to be favorable to you. It's a good idea to check in with others you've been a little out of touch with, because the best possible results of your actions will be attracted to you when you find a way to help others at this time. Even more importantly, this is a month for letting go, and really hearing others, so that you can offer them the help you can muster without getting involved in their personal lives. Efforts that you make which only serve your own interests, especially regarding finances, are not likely to be successful, but those made with others in mind will bring success and other personal attainments. A 9 Personal Month is usually favorable for travel, in almost any year.

SEPTEMBER

Your Personal Month 1 is likely to be a period of time during which you may attract opportunities to take command of situations and move forward with your plans. Since this is also a 1 Personal Year for you, John, the opportunity to take charge and set your agenda in motion should come easily. You will, however, need to stay grounded and “step up to the plate” in order to make sure that things work out according to your best interests. You also must be centered enough to consider other’s feelings during the month. If you do, this is likely to be a favorable time overall. If you don’t, you will have a hard time with other people, and may feel less confident as a result.

OCTOBER

Because your Personal Year is of the vibration 1, you have two Personal Months that carry the vibration 2, but this one carries the extra energy of the vibration of 11. If you began something new during September, this is the time to seek the cooperation of others and work together with them toward common goals – it shouldn’t be difficult, because you will tend to be more inspired or inspiring than usual. If you aggressively pursue their cooperation, it is not likely to last, so don’t be too ready to put your agenda at the top of your list of priorities. Make sure to listen to others, and do your best to accommodate them. The vibration 11, which can be somewhat daunting; it this can be a very tense or intense vibration, so you need to be careful about letting yourself get overly stressed. Put some focus into your relationships with others, and you can’t go wrong.

NOVEMBER

This Personal Month carries the 3 vibration this year, but it also has “12” as an essence number. The twelve carries the vibrations 1 and 2, so this primarily social month will attract conflicts between your need to achieve something and your relationships in both the personal and social arena. You’re likely to get more invitations, and give them as well. Expect the time to be filled with conversation and entertainment, but be very careful that you don’t lose track of your priorities. It’s very easy to put too many irons in the fire this month, so be careful to avoid making promises, and keep your appointments. It’s critical that you don’t vent your frustrations on anyone important to you during this time, because the negative feedback you receive from others will only increase.

DECEMBER

This is your second Personal Month 4 this year, John, but as it is calculated, it carries the special quality of the number 13. Because of the unique quality of this number, you may find yourself in situations where you find it hard to move forward with your plans. At the same time, this vibration also attracts the opportunity to express your gift of organization, and if you’re really lucky, you may have flashes of insight that are important. Hopefully the social activity of last month did not cause you to become scattered and overlook things, because during this month, every single detail needs to be fully examined. Don’t expect to get things done at the last minute, and don’t get upset when your hurried pace is slowed down by

circumstances beyond your control; take advantage of these delays to make sure you “have all your bases covered.”

PERSONAL YEAR

TWO

When you have a Personal Year of the vibration of 2, John, you'll find that you're experiencing many issues, both favorable and complicated, that focus on partnership, cooperation and teamwork. You'll certainly find it easy to be a little less aggressive in the pursuit of your goals, because so many things will be dependent on your relationship with others, you won't have to do it all yourself.

If you help others pursue their plans, you'll get results that will favor yours. It's entirely possible that you'll find this a favorable year as far as financial matters are concerned, because many things will come to you through others, rather than your own efforts.

You are likely to meet people during the year that are able to help you improve all aspects of your life; this is a good time to take the advice of others seriously, because people are more likely to have your best interests at heart during a 2 Personal Year than in any other year in the nine-year cycle.

The 2 Personal Year can be rather intense as far as your emotions and personal relationships are concerned. But at the same time that this year can bring satisfying experiences regarding relationships, its vibrations are equally powerful for harmony or discord. If you use "Patience" and "Cooperation" as keywords in your decision making, you are likely to thrive

Put the ideas of others to use, especially those of counselors, consultants, and trusted friends. You'll find that you can improve your chances of success with anything you are attempting or working by letting others help during this year of cooperative progress and harmony. Trust and compassion will bring success, but a confrontational attitude will only cause problems during this period of time.

You may find yourself prone to distraction, or find that it's difficult to stay on task because of the intensity of your reactions to other people this year. If this happens during a Personal Year 2, you need to speak up for yourself. Don't let others tread on your feelings and let go of those who disrespect you. This way you'll attract more fulfilling and prosperous circumstances

throughout the year.

The Months Of Personal Year 2

JANUARY John, your Personal Year 2 begins with a Personal Month of the vibration 3, and the combination of these vibrations is almost always pleasant. This month's activities will require very little maintenance, as long as you're focused on getting along with others. If you are, you're likely to attract opportunities for successful ventures and an active social life, but these opportunities will come from others, not your own efforts. It is important, however, that you don't scatter your energies, and watch your spending carefully. Stay focused on the kind of cooperative activities that dominate the year, and try to avoid letting your feelings get the best of you. Personal vibrations are very positive now, especially in matters regarding relationships and love.

FEBRUARY A 4 Personal Month usually brings some kind of limitation, and during the year, these limitations are likely to affect emotional and sentimental matters you're involved in. Disappointments are likely, and you have to be careful not to let them get in the way of your self-esteem. It's extremely important that you don't let your feelings distract you from the tasks at hand, because you must attend to details this month, at work and at home. You are likely to be frustrated by difficulties or obstacles to progress, but as long as you stay structured and orderly, you'll build a good foundation for the rest of the year. Throw yourself into getting things done, and you will.

MARCH The greater freedom that you experience during a personal month Five has to be carefully handled, because during this year's Personal Month 5 mistakes and unintended conflicts are likely to occur. This is especially true regarding your relationships with others. Good decisions can bring favorable changes, while those made in haste, or while emotionally upset will only bring trouble. A 5 Personal Month is, however, favorable for travel during any year, but anything that is a break from a rut or pattern is likely to help you move through the month smoothly. Avoid doing anything risky when it comes to relationships, but have fun.

APRIL A 6 Personal Month during a year of vibration 2 is considered to be very favorable, and sometimes lucky for all matters concerning love and relationships, John. It brings domestic tranquility as well as harmonious and friendly connections with others, but is not helpful in other aspects of life; this is not a month to seek wealth above all other things. Although this combination of generally favorable qualities does not lead you to attract financial problems, you'll have to be careful with money, because the tendency to overspend, or to spend on impulse is prominent. You'll have to make sure to take care of your responsibilities, but, due to the nature of the vibrations you're attracting this month, you may actually enjoy them.

MAY During this 7 Personal Month, you can certainly catch up on any rest you've been missing. It's likely to be a peaceful period of time, and is noted to be a good time to study, relax and take account of your affairs. You need to be aware that this is not considered to be a favorable period for getting aggressive with financial matters other than bookkeeping or analysis. The only real troubles you can expect are emotional upsets, so if you're having problems, make sure you're not making them worse than they are because of the way you feel about them. Taking a personal inventory or working on a journal can be helpful; it's a good idea to extend your trust to someone wise during this month.

JUNE During a year carrying the vibration 2, a Personal Month 8 can bring abundant opportunities in many areas of life. Material pursuits are highly favored, and you will find it easy to gain the cooperation of others who can help you toward the achievement of your financial or business goals. In fact, if you allow others to take action without being overly managerial, you'll find that they will act to your advantage, and not undermine your efforts. You'll attract situations in which you can act assertively without offending or pushing others, so have "please" and "thank you" armed and ready. This may be a "lucky" month for money, in that it is more likely to come through others than through your own efforts.

JULY Since this is a 2 Personal Year, you're likely to attract situations during a Personal Month of the vibration 9 that are emotionally tense and even upsetting, John. The best way to keep this emotional tension from interfering with your life is to avoid getting personally involved in the problems of others. No matter how much you care about them, do your best to avoid the sacrifice of your time and energy on their behalf; focus on helping them without "putting yourself out." Be supportive, but remember that resolving your own issues is your top priority at this time. This can be a favorable month for getting rid of things you no longer need, or for saying goodbye to others, as when you are traveling or otherwise disconnecting from them for a time.

AUGUST Make good use of your Personal Month 1 by taking command of a situation and moving forward with your plans, because this monthly vibration has a powerful ability to support you in achieving your aims and goals. Don't be afraid to handle things on your own; don't delay your own happiness or progress by waiting for approval or validation from others. You may need to "go solo" for at least some of the month, but chances are good that you'll get favorable results if you do – you're not likely to offend anyone right now. If you're involved in a partnership or team effort, don't try to demand the spotlight, even if you do most of the work. You can drive your success this month, but you don't need to navigate too.

SEPTEMBER Personal Month 2 brings with it the opportunity to work together with others, or otherwise benefit from their cooperation or companionship this year. The fact that

this is a 2 Personal Year “doubles down” on relationship opportunities and qualities, making it much easier for you to attract mutual benefit and satisfaction. At the same time, there is a chance that you’ll face emotionally trying situations during the month, but you’ll find that others are more comforting than usual. You’ll need to pay careful attention to your physical well-being; any discomforts should be attended to immediately. Also, be extremely careful about financial matters during this month, because your heightened emotions could lead to more impulsive purchases or financial misjudgments than usual.

OCTOBER This will be your second 3 Personal Month during the 2 Personal Year, but you can expect that a very different quality will prevail. Although it is a socially-oriented time, it’s far more likely that you will run into conflicts or other forms of disharmony during these gatherings, or while traveling. But there is really good news; as long as you’re not trying to “be the boss” or control others for your own benefit, you’ll find that almost any dispute with friends or loved ones can be settled easily and quickly. Generally, it is considered to be a pleasant and favorable month, but you will have to deal with some unnecessary drama.

NOVEMBER This is your second Personal Month of the vibration 4 during this personal year 2, John, and rather different from the last time you encountered the 4 vibration. It carries a quality that makes you more resistant to other’s ideas, but is also pretty creative. Although the spirit of originality is strong, you are likely to attract some kind of limitation in relationships, probably because of work or projects. It’s really important that you be straightforward with others, and not be afraid openly display your feelings, or state the facts. As long as you take good advice when its offered, matters concerning money and finances will go well.

DECEMBER The last month of Personal Year 2 signals the return of vibration Five, but you probably won’t need to be as cautious about it as you when it was around earlier in the year. In fact, the only thing you need to be careful about is overindulgence – during this month, you could find out that you know less about your limits than you think. You’ll tend to attract unexpected changes that you might react to by making ill-advised decisions, but you can avoid conflict as long as you don’t attempt to be too creative – paying attention to details will help you plot your course a little better. Emotional upsets are likely, but will probably not be severe.

PERSONAL YEAR

THREE

Almost everyone enjoys a Personal Year that carries the vibration 3, John. One of the main keywords for a 3 Personal Year is “social”, because this is a year that is noted as a time for renewing old friendships and cultivating new ones. Another of its keywords is “pleasant”; it can be easier to have a good time during this year than you might think.

You’ll find you attract more attention from others than usual, and, along with their attention, you’ll have more opportunities to do “your thing”, because your creative juices are flowing more easily. Some people find that they are more conversational and expressive than usual; others find themselves surrounded by music, the arts and entertainment.

Very often, new relationships come into the life during this year. These relationships may be of any sort, so be especially careful in the way you relate to new people you meet, because they may be important to you in the future.

At the same time, during a 3 Personal Year, you’re likely to be distracted by the opportunities that present themselves, but if

you keep a balanced and grounded attitude, and finish whatever you start, it will be a year during which you’ll spend a lot of time participating in various enjoyable activities with others. Your emotions are likely to be strong, so don’t let your feelings cause you to scatter your energies – if they do, your moodiness could lead to overspending or other difficulties.

Business and work can be very successful under this vibration, and if you missed setting something new in motion during your last Personal Year 1, you can consider this year another opportunity to do so. This is a special property of this vibration that you can use to your advantage.

Make sure that you focus on resolving any issues that you didn’t bring to a close during your last 9 personal year; they may resurface this year and make your life more complicated than it needs to be.

This pleasant and lucky vibration can bring a year during which you learn the real meaning of “having too much fun”, which can harm your reputation or relationships. If, however, you approach your life systematically, do things “by the book” and stay organized, you’ll attract positive and enjoyable opportunities that you would otherwise miss.

The Months Of Personal Year 3

JANUARY A Personal Month 4 is usually the least enjoyable month of the year, John, and because this is a vibration 3 year, there is a clash between your duties and your desires that may be hard to reconcile. Chances are good that you'll have few opportunities to enjoy the things you want to, either because of obligations, or because you manage to procrastinate to the point that you just aren't getting things done. You are attracting a limiting vibration this month, and while it may help slow things down a bit, unless you focus strongly on the day to day details and manage your affairs closely, you're liable to feel stuck. Nevertheless, you'll have the opportunity to set long-lasting effects in motion.

FEBRUARY Although the year may seem to be off to a slow start, the vibration 5 Personal Month should be a breeze for you. You can expect to attract favorable changes, and it's likely that you'll be ready to navigate these changes effectively. Be careful not to get distracted and avoid important responsibilities, because it is likely that tending to your responsibilities will attract opportunities, even social ones. This can be a month during which the freedom, fun and maybe even travel that you've attracted is likely to manifest, as long as you're willing to stay centered and pay attention to the signs and signals around you. Handling freedom responsibly is your key to success during this month.

MARCH This 6 Personal Month may be dominated by some obligations and responsibilities, John, but they are not likely to be the type that you have a reason (or a desire) to complain about. Pleasant events are likely to occur, and may bring peace and fulfillment to your home, family or love-life. In fact, as far as your personal affairs are concerned, this is likely to be a very satisfactory month. The main thing to be careful about is being sidetracked by trying to take care of other people's issues that you devote less energy to your loved ones, but that's not likely to happen if you make personal duties your top priority. This is a particularly good month for working with structured organizations such as teams, clubs and the like.

APRIL Things are not likely to go haywire during your 7 Personal Month this year, thanks to the pleasant vibration 3 that dominates it. You are likely to face some confusion or delays when it comes to pursuing your goals, especially financial ones. The emotionally stimulating, or even frustrating events that you attract are likely to be toned down, giving you an opportunity to carefully examine your plans and actions. This may very well keep you from making costly mistakes, especially if you have the patience to work with another on complex problems. It's also a good month for getting away from the pace of events in your life; a vacation or an extended weekend could be of great benefit to you at this time.

MAY A Personal Month 8 will, more often than not, bring financial opportunities, but this year you may have to accept something of a loss as far as your social life is concerned in order to capitalize on them. You may make the trade-off, John, and prefer the social opportunities that could give you a chance to move forward with other aims and ambitions, but then you'd be less able to attract the stability in your business affairs that could occur. In other words, allow yourself to sacrifice a pleasant activity if it stands in the way of your material pursuits. Above all, don't try to get others to take care of business that only you will profit from; this is likely to cause bad feelings between you and them. Walk your talk this month.

JUNE During this year, you can expect the Personal Month of vibration 9 to be generally favorable to you. It's a perfect time to finish things up that were started in previous months, or to bring issues to a close that have been stuck in "not done yet" mode for a while. It's important, however, that you wait until next month to start new projects, plans or to build new connections with others. This is also a very favorable month for travel, which could help you attract a good deal of positive energy. It may be a month with at least one incident that elicits strong emotional reactions from you or others, so do your best to avoid being a doormat, or a dumping ground for others feelings.

JULY This is the only Personal Month 1 this year, so it's important that you take advantage of it. It's almost certain that you'll attract the chance to start something fresh in at least one department of life, and if you do, it will be more likely to succeed than in any other month during the year. It's a good time to "step up to the plate" and declare your intentions, whether in your personal life, or in business. You can expect things to keep a fairly active pace, but instead of feeling frustrated, you'll probably enjoy the social and pleasant vibes that are available this month. Remember that a new start doesn't always mean that you need to go off on a tangent; doing so may cause losses. Focus is the key to success during this busy month.

AUGUST This month of the year carries the vibration 2, John, which means that it's likely to be an emotionally charged Personal Month. You are likely to attract issues regarding sensitivity in yourself and others – people, including yourself, will seem too sensitive or too insensitive. You may have an easy time cooperating with friends and associates, because of the overall pleasant and relationship-oriented atmosphere. It would be a good idea not to put much emphasis on personal relationship issues; because of the overall harmonious vibration running this month, the extra energy would be "overkill" at this time, and may break the mood. Do your best to tone down any social activity that isn't related to your love-life if you want to get the best possible results.

SEPTEMBER During your Personal Month 3 in a 3 Personal Year, you'll have to be as careful as possible not to spread yourself too thin, or scatter your energies. This is an

enthusiastic vibration that can easily distract your attention from important things that need to be done. Try to avoid volunteering for anything that is not directly related your personal agenda, and, above all, stay out of other people's dramas. It's easy to get off course right now, so the best thing to do is to use the social energy of the Three to get together with those who can help you achieve them. This vibration is most favorable for attracting helpful people and catching up with friends, as long as you stay focused on your personal goals and avoid those who want you to focus on theirs.

OCTOBER In a personal year 3, your second Personal Month 4 is likely to be challenging, John, especially if you went off-course during the last Personal Month. You're likely to find yourself being a little more stubborn than usual, and if you don't notice and correct this pattern, others will. You'll attract situations that require attention to details and difficult or complex work; trying to avoid dealing with them is likely to cause trouble. Do your best to focus on the details and do whatever footwork is necessary to get you moving forward, but don't expect to see obvious signs that things are headed in the right direction again. The pace of life will feel as if it has slowed down by circumstances beyond your control; don't react with resentment or confrontational actions. Just breathe and keep moving forward and things will progress.

NOVEMBER The sense of greater freedom that comes during this year's second Personal Month 5 could make you want to take a break from the hard work that you've been doing or the routines you've been caught up in, John. This is a month, however, during which you should focus on whether or not the decisions you make will affect your future in a positive way rather than whether or not they will bring you more fun. Stay mobile and flexible; but, at the same time, consider things like your reputation and your status, at work or at home, as being your top priority. You may attract people who are far less concerned about their futures than you are, so you'll have to keep your intuition in high gear when sizing them up. Other than the dangers of overdoing the "fun stuff" this should be an enjoyable month.

DECEMBER Personal Month Six is probably the easiest time of this year for you to attract pleasant and favorable circumstances, John, especially in matters concerning your home, relationships and family. Any group activities, whether for business or pleasure, will be enjoyable, and it's likely that you'll enjoy taking on responsibilities, as long as you don't try to take on those of others. Don't focus so much on money - it will probably not be a major issue during this month, unless you start avoiding responsibilities, or avoid finishing things that you've started. In other words, stay focused on long term goals and the short term ones will take care of themselves. It's very important to enjoy good times with those you care about right now, but don't confuse your loyalties, priorities or personal agendas with those of other people.

FOUR

PERSONAL YEAR

A 4 Personal Year carries the meaning of “work” in every sense the word is used, John. This doesn’t necessarily mean something you spend your day doing so that you can get paid - you’ll need to keep your nose to the grindstone, and be prepared to do things “by the book” no matter what it is that you are doing at this time.

You’ll really need to keep a close watch on all matters concerning work and business, because you’ll tend to attract situations that can get out of control, especially if you’re not in control of your own affairs. A total attention to detail is required, because it’s likely that anything you miss in the process of trying to make things better will come back to bite you, and things will go downhill from there.

Actually, this is a “building” and “perfecting” vibration, under which you should be focused on creating future stability or security, or otherwise perfecting your plans and ideas. Stick to your own business and don’t make any radical changes in your plans or lifestyle, and avoid unnecessary or unscheduled travel during this year.

A 4 Personal Year is one during which financial struggles are common, unless you have handled your affairs during the first three years of the cycle. If it’s not easy for you to bring order into your financial life in some way, it would be a good idea to get some coaching or training or work with an expert in these matters.

Pay attention to personal wellness as well during years of the vibration 4; it’s a great year for working with your diet or take up some kind of preventative therapy, exercise or practice. Pay attention to details regarding money and health. This vibration can easily bring losses, upsets and other challenging experiences if you get off track with any important matters. Put a little extra effort into all your affairs, and you’ll keep things from falling apart.

This is probably the most serious year in the cycle of nine, or rather, the most important year in the cycle to look at your life with a serious and managerial attitude. Impatience and skepticism may surface, because this is a year during which you find it hard to trust others. If you simply

make yourself and your well-being your top priority this year, you'll find that taking care of business will be easier, and that life will be much less stressful.

The Months Of Personal Year 4

JANUARY This year's first Personal Month is of the vibration 5, and is likely to start the year with some kind of difficulty or conflict between your need for variety and your responsibilities, John. It could be that personal projects or even basic chores could run into frustrating snags because of unexpected events, or routine activities are waylaid by unexpected changes. This is also a month during which you need to be especially careful about impulsive spending, and about being stubborn, especially if you need the help or assistance of others in order to take care of important duties. This is a good month, however, for doing something about wellness, appearance or your public image. The best way to keep from attracting trouble is to stay busy and don't overlook anything.

FEBRUARY You're likely to find that this year's Personal Month 6 will go very smoothly, especially where romantic or family matters are concerned. There may be more responsibilities during the month, or taking care of them may require more work than usual, but you will not feel the kind of pressure that you normally would because of the accord between the yearly and monthly vibrations. This could be an important month for your relationships with others, whether allies or lovers; a strong and lasting foundation for the future can be built during this time. The vibrational qualities you're attracting now are constructive, balanced, stable and caring – so things may not be as wild as they were last month, but you deserve a break.

MARCH A 7 Month is likely to provide needed rest or quiet during this year, but it may also cause a good deal of equivocation or procrastination, either from yourself or others. It will offer you the opportunity to study, do research or examine your priorities and plans in some other way. The good news is that you may find new methods or vital, previously hidden information that you will be able to make use of in a positive way. If the pace of your life slows down a bit, it's a good sign, but it's a sign that this is a time for reflection, not letting things make their way to the back burner. The situations you attract require logic and forethought, no matter what your philosophy of life is, so be sober, not emotional in your judgments. This is also an excellent time to review, analyze and balance your books, especially the financial ones, and to cultivate faith in yourself.

APRIL During a 4 Personal Year, John, months of the vibration 8 may indicate difficulties with financial matters. Make sure you're prepared for the unexpected as far as expenses are concerned; hidden costs or fees are likely to surface. The best possible expression of this month's energy, which could manifest as a raise or windfall, can cause problems with taxes or other concerns. If you use your time to organize and systematize your business life, and avoid

“recreational spending”, things will go very well. Also, this is a time to ask for help if you need it, rather than trying to go it alone; admitting to the usefulness of others’ skills and putting them to use is favorable this month. Make taking care of financial responsibilities a priority whether you want to or not, and you will do very well.

MAY Your Personal Month 9 should go rather favorably during this 4 personal year, especially if you focus on getting rid of burdens, rather than taking on new responsibilities. Burdens are specifically meant that responsibilities that you took on in good faith that have turned out not to be in your best interests. But you need to be careful not to change jobs, schools or partners, unless you are retiring or quitting them, because such actions usually end up causing unintended or unexpected consequences that you would rather not experience. This is not a vibration that attracts new things, so starting new work, projects or relationships is definitely not favored; this is the reason that making a change will not benefit you. This may be the best month of the year for finishing things you’ve started, for letting go of unproductive habits, or for aggressively pursuing any wellness practices that involve the removal of a source of trouble, such as dieting or surgery.

JUNE Although this year’s Personal Month One is perfect for starting something new, doing so will require some courage and assertiveness, because it’s likely that you’ll run into considerable resistance. If your new beginning requires that you take a leap of faith, then prepare yourself with a “plan B” and take it; the rewards will be exceptional. Chances are that this push forward may pertain to matters regarding an important responsibility, task or duty; may even pertain to your physical well-being. Make sure you have all your ducks in a row and do things your way; have confidence in the fact that the timing is right, and your personal ability will see you through. Beginning new relationships are about the only thing you should avoid during this month.

JULY Work together with others during this year’s Personal Month 2, John. This means cooperative ventures; anything from a barn-raising to planning a party will fit the bill nicely. Any form of teamwork is highly favored now, even though you may feel like others are resisting you or not open to you emotionally. Your efforts will not be in vain, however, because it’s almost guaranteed that if you do something for others, or work with them for mutual, rather than personal benefit, you can succeed, prosper and gain their trust at this time. You are attracting vibrations that favor working with others, so be aware of whether or not people really need your help, or whether they are using you to avoid handling their own responsibilities. You’ll need to avoid being overly critical of yourself and other people. Most of all, it’s important that you don’t allow the feeling of being treated unfairly dominate your mood.

AUGUST During your Personal Month of the vibration 3 in a 4 year you'll need to be aware of, and even expect distractions to pull you away from your chosen course of action. Going off on a tangent will be hard to resist, because the monthly vibrations are pulling away from the annual ones in a complex way. Do your best not to talk yourself into taking on anything extra, because the social instinct of 3 makes it easier for you to try and be dependable, which others have a tendency to take advantage of. At the same time, try to avoid getting others to see your way right now – doing so will only complicate things and weaken your position in what should be a balanced relationship. The vibrations you're attracting make this an unfavorable time for making promises, but it is a perfect time to keep them. It's a month during which you will certainly benefit from showing your worth to others through your deeds, not with your words.

SEPTEMBER During a 4 Personal Year, the Personal Month 4 is likely to be challenging. You may face so much work, have so many duties, or need to handle so many tasks or details that you won't be able to take time for yourself, or capitalize on the opportunities for the rest that you require. It's possible that you may feel restricted or limited by your circumstances, and it may be hard to gain the sympathy or cooperation of others. If you handle your obligations one at a time, you can make things run a little smoother. This doubled vibration only favors tasks that are difficult to accomplish, and even at that, you'll probably face delays and obstacles that you could not anticipate when you took them on. Definitely pursue constructive activities as far as personal wellness is concerned, such as building strength or gaining weight, but only if a health-care professional has recommended doing so.

OCTOBER You may find it unusually difficult to carry out your duties and responsibilities than usual during this year's second 5 Personal Month, John, not because you are distracted from them, but because you are attracting more unexpected changes than you would otherwise. Expect frequent surprises - it may be somewhere between hard and impossible to adapt to changes going on around you. The more flexible and rational you are, the better that you'll fare at this time, because it will require a good deal of discipline to appreciate the variety of experience you attract without abandoning your regular and established routine. Anything new that you begin this month is likely to turn out differently than you expected, but if you do things by the book, you'll find that you can stick to your plans, even though others may go out of their way to interfere with them.

NOVEMBER The second Personal Month 6 may be one of the more pleasant months of this year, because you'll feel more at home with the circumstances you attract, especially after the previous month of chaotic surprises. You can expect harmony and security in personal, domestic and professional relationships, and you're likely to find that you don't need to focus on money matters so intently at this time. Cooperation from others and generally enjoyable

surroundings may lift your spirits; any connection with like-minded groups of people will be helpful for you in many ways. Trouble could result from avoiding responsibilities, but others will recognize your dependability if you follow through on your commitments. Business and financial affairs are likely to move in a favorable direction during this month.

DECEMBER

Your last Personal Month of the year, which carries the vibration 7, is likely to be rather pleasant, even if things are not moving as quickly as you would like them to. This would be a perfect time to go over the events of the year and putting some thought into what lessons you have learned. Journaling or blogging is likely to help with this. It's also good for spending "quality time" with friends, family, or even with yourself. Don't try to turn it into a wild party month, or you'll be disappointed with the results. If you keep a positive attitude about the past year's events and toward yourself, you'll spend the month in perfect preparation for your next Personal Year.

PERSONAL YEAR

FIVE

There's not a lot that's certain about a Personal Year 5, John, but one thing you can be sure of is that it will bring many changes into your life. Some say that the only real constant in the universe is change, and a Personal Year 5 tries to prove it to you.

The very positive upside to a 5 Personal Year is that it's a year during which you can put new methods or ideas to use in ongoing plans, projects or work. In other words you'll attract situations that show you how change can be made, and the opportunity to make those changes.

This is also a great year for fixing houses, cars, and other indispensable items, or for obtaining new ones. This may include upgrading electronic equipment so that you can enjoy them more, because 5 is a vibration that attracts the opportunity to pursue a wide variety of "fun" experiences that you can take advantage of.

A 5 personal year is excellent for making personal changes; if they are visible changes, so much the better - you're attracting very positive vibrations and opportunities right now. This is often a year during which major travel experiences occur.

It's likely that you'll also attract more chances to experience personal freedom during this year, but the abuse of that freedom can result in disaster. This is not a good year for making commitments, especially when it comes to relationships, because 5 is not the kind of vibration that perseveres; things started during a Five year may not last for very long.

One change leads to another during a 5 year, and no aspect of your life is immune to it. If, however, things have been fairly steady during the previous four years, avoid choosing to make unnecessary changes, and if you've had bad luck during the last four years, think of this as a 1 Personal Year, and you'll be able to change the bad luck to good.

You may attract more than your share of those who have unrealistic expectations of you, or those demand too much during this year. If, however, you follow through and make good on

your promises, the changes you encounter this year will bring with them opportunity and success.

The Months Of Personal Year 5

JANUARY You're likely to find that this 6 Personal Month during a 5 year may be somewhat challenging, John. The sense of freedom that comes with the vibration 5 may hit a snag in this 1st month of the year, because you will tend to attract situations where the need for responsibility and loyalty will be paramount. Others may have unrealistic expectations of you, and the chances of your living up to these expectations are not good, because you'll be in a mode that resents people "laying stuff on you" that conflicts your plans, or contradicts your ideas about what you need to do. You'll need to keep your promises and carry out your duties; if you try to get around them this month, you're likely to run into trouble. If you follow through on your obligations to yourself and others, especially in domestic matters or relationships, things will probably be peaceful.

FEBRUARY If you're keeping everything in perspective and not allowing the opportunities for fun to take you off course, your 7 Personal Month is likely to provide a needed (and even welcome) opportunity to catch up, review, past situations, and to analyze others in a way that's generally beneficial to you. If you put your energy into family or domestic concerns, you're likely to intuitively come up with original and exciting solutions for any problems that may be standing between you and fun. Although you're likely to be attracting private and personal vibes right now, you shouldn't give in to them and withdraw from your social scene – that would only cause more anxiety. Yet, if you avoid being overly-social or anti-social, you should have a productive month. You should be able to make gains in any matters that require your personal attention, and achieve success in things that require a strong ability to focus, especially those that require analytical thinking of some sort.

MARCH During a 5 Personal Year a month of the powerful vibration 8 can be prosperous and progressive financially, as long as you react well to surprises, and don't make any impulsive or risky moves with your money. You see, the kind of vibrations you're attracting do not allow financial matters to act in a stable or steady fashion right now, no matter how reliable they have been; it's time to think outside the box. Be flexible, and be prepared for unexpected fees or costs – forgotten expenses even may pop up and throw you for a loop. Don't react by trying to find ways to get around responsibilities – try new methods of working with them instead. Expect your authority to be challenged, but if you remain grounded, you'll be OK.

APRIL Expect your Personal Month 9 to go rather well during this year, John, especially if you focus on finishing things and letting go, which should be easy right now. If you don't, unfinished things are likely to "stay on your plate" much longer than you'd like them to. The

vibrations you're attracting now are positive, but only in the context for preparing for the next cycle of days, rather than expecting things to carry on with their established patterns. If you focus on finalizing deals or plans, getting rid of things or situations, or bringing them to a close you can accomplish a lot during this month. Minor changes in your plans or projects may be needed, but try to save those efforts for next month. This is a favorable month for travel, but is completely unfavorable for starting new projects or relationships. If you want to introduce something new to others, give them the idea this month, but don't take action until next month.

MAY Your Personal Month 1, in the 5 Personal Year is a time for achievement – conditions couldn't be better for starting something new. As far as business, money, love or any other action that you've been thinking about pursuing is concerned, take a chance, because during this month, fortune favors the bold. This could be a time of meeting new people, introducing new methods into your plans and projects or having new ideas about how to turn dull or boring tasks into extraordinary experiences. You are attracting extremely positive vibrations, and these are vibrations that bring change. It's not unlikely that you'll experience a stroke of luck this month, and if you do, you need to realize that luck is not a constant in the grand equation of life. In other words, chances are good that luck will be a factor in your success and happiness, but counting on it is not a good idea. Don't be afraid to take risks, but remember that risk does not always have a reward.

JUNE A lot of what happens during this year's Personal Month 6 will be dependent on the decisions you made last month, John. It could be a time of adjustment and dealing with errors in judgment if you went too far with last month's dynamic and happy energy, or expected your luck in some area of your life to last. This is a month that could be tricky regarding relationships, because the vibrations that you are attracting could either help a new relationship get started, or they could break and old one. The reason is that the monthly and annual vibrations clash – 6 is about the sense of responsibility, while 5 is about the need for freedom and variety. Even if you are pursuing fun goals, it's likely to be a month during which you'll discover that consequences will result from skipping out on your obligations, so put your reputation and your connections with others at the top of your list of priorities.

JULY Your Personal Month of vibration 3 during this Five year is likely to be exciting, entertaining and enjoyable, John, but it is also possible that you'll attract so many opportunities for fun activities that you'll get pulled away from important duties or commitments. If you have a chance to travel, take it; it's the best way to "ground out" this vibration and have a good time doing so. Although it may not be a good time to make promises or stick with a given protocol, it is an excellent time to engage in social life, so don't take yourself or others too seriously during this month. The keywords are variety, pleasantness and fun, and you should keep these things

in mind when making decisions. Weigh your course of action by trying to find the win-win situation that benefits everyone. If you put some time and attention into taking care of your responsibilities, things will go much better than you expect them to this month.

AUGUST During a 5 Personal Year, the Personal Month 4 is likely to be challenging, John. You're likely to attract situations that limit your ability to do new things or express new ideas. You'll also find that people in general are more obstructive than usual; some may go as far as stopping you in your tracks when it comes to trying to do as you please. Work and duties are likely to come to the foreground, and the level of freedom that you've been experiencing so far this year will be pushed into the background. Not to worry, though, if you manage to hold to your personal, psychic center, you may have some satisfaction by discovering new methods that you can apply to normally boring tasks, and if you pay attention to detail, you may discover the chinks in the armor of people who are trying to limit you to rules and regulations that are at cross-purposes to your own.

SEPTEMBER This is going to be a "double 5" month, because it carries the vibration of the Personal Year, but the doubling of the vibration 5 is probably the trickiest of all the personal year/month combinations. There is a good possibility of abusing the freedom granted by the "double 5" vibration. On one level, it can lead to overindulgence in all your personal pleasures, but on the other, you could attract so much change that you run the risk of damaging important relationships or your financial situation. The thing you need to consider is that your actions are likely to attract unexpected outcomes – this can actually be good if you are involved in creative or research projects during the month. There is the possibility that this month could turn situations around, or open up new possibilities in whatever area of life you feel "stuck", but even if it does so, it's likely to do so in a way that's surprising, challenging, and not easy to navigate, unless you make flexibility and willingness to change your top priority.

OCTOBER This second Personal Month 6 during a 5 Personal Year will be a bit different from the first one. That's because the other occurred after the close of a different annual vibration, and this one happens right after a month full of the type of change that this year's vibration empowers. This is a combination that sometimes causes changes in residence or relationships, but these changes can be favorable or unfavorable. It's possible that you could take action to commit to something new begun in the last month, or that you could find a release from a commitment that recently caused problems for you. If you try to avoid following through on your commitments, you will only attract more challenging situations, so don't forget that this combination can affect professional affairs as well as personal ones. Avoid making promises, no matter how trivial they seem, because unexpected situations could hamper your ability to fulfill them.

NOVEMBER

Your second 7 Personal Month can be rather favorable for you this year, John, unless you spend the month trying to “fix” mistakes made during the last couple of months. Instead of taking action to change the past, the analytical and spiritual vibrations you’ll attract during 7 month are better used to put the past in perspective. This can be really helpful and healing if you combine this assessment of your experiences with some sort of stress reduction, even if it’s only something like journaling or taking a little time with meditation or spa-type activities. Remain positive and try to think logically, and you’ll find that your intuition silently kicks in to help you come up with straightforward solutions to any complex situations; that is the gift of the 7.

DECEMBER

Chances are good that your focus will fall on money matters during this 8 Personal Month. This does not mean you’re attracting financial trouble though, because 8 is a very positive monthly vibration this year. It’s likely that your attention will turn to new methods of handling or saving money. Because the year coming up is more favorable in this regard, any lessons that are learned from the various ways you institute change in (or experience the consequences of) your financial activities this year will stick, and be of benefit to you in the coming one. You may attract situations that you aren’t prepared for; you may want to think carefully before taking any risks that have the possibility of negatively affecting your authority, your freedom or your bottom line. It is a good time, however, for cultivating some discipline in all aspects of life. Doing what you say you will and saying what you mean will go a long way in establishing respect, and above all, don’t be ashamed to ask for help if you need it.

PERSONAL YEAR SIX

There are a couple of major themes that you can't help but notice during a Personal Year 6, John. The first major theme is "adjustments"" as if the Universe has decided to "balance the books" for you, usually in a good way. It's a good year for collecting or settling debts, or for engaging in legal matters that need your attention.

The second major theme of a 6 Personal Year is "responsibility." Usually this means something good, like finding yourself in a situation where you are responsible for your well-being and the well-being of others, but it can also attract situations where you have to take responsibility for your actions, or you're constantly aware of the possible consequences of your actions.

A 6 Personal Year tends to focus on relationships and domestic situations, and during this time, it's likely that home and/or family will be your top priority. Changes of residence and relationship status are fairly common at this time, and this vibration draws an intense desire to make or break a pair bond. In fact, the vibration 6 is stimulating the desire for balance in your life.

Adjustments may need to be made in the home, yet domestic life is generally happy, and your financial situation is likely to improve. It's a good year for renting or purchasing a home, or otherwise expanding the place in which you live, but don't forget that the increase in security will come with an increase in responsibility.

The greatest difficulties that you might run into either have to do with avoiding responsibility, or trying to help others at the expense of your own situation. You'll tend to attract those who ask for sympathy and consideration, and you may be more than willing to give it. In the meantime, you may find that your ability to care and nurture is exhausted when it's time to share it with your loved ones or yourself.

It's likely that your emotional energy may be off the charts (in either direction) during this year; emotional sensitivity is likely to be an issue for you. But if you're responsible and willing to take the lead, your confidence will inspire others and get you where you want to go.

The Months Of Personal Year 6

JANUARY The 6 Personal Year begins with a month of the vibration 7, during which you may encounter some mixed messages and confusing behavior from others, John. If you are doing something that requires careful study, it will probably be a very helpful time, but it's also possible that you may experience some trust issues – either too much or too little trust and faith may be extended to others. One of the best ways to handle this energy is to enjoy some time with family, friends or loved ones, because the year's vibration is strongly related to domestic and personal life, while the month's vibration carries a strong desire and attraction for privacy and intimacy. Follow your intuition, and, if you can, take some time away from the fast pace of public life to give yourself time to tune into the more subtle qualities of inner life that we all enjoy, such as hope, faith and love. This is not the most favorable month for focusing on financial matters; this vibrational complex is about people, not profits.

FEBRUARY During a 6 Personal Year the two months that carry vibration 8 can be truly fruitful, and this is the first of them. The 6 vibration the year generally tends to attract money, while the 8 will attract the ideas and activities that can help you manage it. There is a certain esoteric theory that you should meditate on during this vibrational combination; it is always easier to acquire money than it is to keep it – that concept can make this one of the best prosperity combinations of them all. This is not a month that's particularly lucky, but, as far as prosperity consciousness goes, it is tremendously empowering. It's also important that you not keep yourself totally absorbed in climbing the ladder of success, because it is your connections with others, and the love that you share with them that enables personal abundance to grow during the times that the 8 vibration is active.

MARCH You can expect your Personal Month 9 to go rather well during this 6 personal year, as long as you put the past behind you. This is not the month for forging ahead, but it is the perfect time for letting go, forgiveness and realizing what it is that limits you in all aspects of life. You have the opportunity to take real joy in the fruits of your labors, especially if you have the benefit of others in mind, rather than just your own. Don't drive yourself too hard as far as pushing toward financial gain is concerned; put your energy into your family, friends, loved ones, or whoever else may want to see you do well. There's little doubt that you will attract the attention of those who look for somebody to lean on, so this is not a good month for lending goods or money, for beginning new investments, for making large purchases and, above all, for getting personally involved in other's problems. It is a good time for travel that is not part of your work or other obligations.

APRIL Expect greater responsibility during your Personal Month 1 this year, John, but don't expect this responsibility to be some kind of burden. Right now you are attracting opportunities to "come in first" as far as the race to fulfillment is concerned; your top priority needs to be crossing the finish line. Because of the balanced and loving vibration of the year being the backdrop, the dynamic 1 won't have any restrictions other than those you create for yourself, including your responsibilities, so go for it and move forward. You'll have more support than you need in order to make this month successful. Some of the support you attract may help to bring about positive change in your private life, as long as you allow it to. Don't make any unnecessary changes and remember that you are your top priority this month; do the right thing and you'll get the right results.

MAY The combination of the 2 Personal Month during a 6 Personal Year is a powerful love/domestic harmony combination, John. This is a very romantic combination; one that can show you more about your heart and the hearts of others than most months in the 9 year cycle. Do your best to experience and enjoy the depth of your feelings; and if you are having romantic difficulties look to why you're having the feelings that you are, and you will learn a lot about yourself and your interactions with others. On another note, too much of a good thing can collapse under its own weight, so it's all about making happiness your top priority. Be careful though, because you are attracting strong relationship vibes right now, and this month can break relationships as easily as it can make them. Don't push too hard as far as money is concerned; the vibrations this month are about receiving, not about making your way in the world. It may be easier to attract prosperity this month than you might expect. On a more mundane note, it is a really good time for collecting debts of any kind.

JUNE During a Six personal year, the Three personal month can be rather pleasant, John, as long as you're willing to stay on top of your personal obligations, and avoid getting caught up in the various diversions you are likely to encounter. You can expect this to be a social month, during which you'll attract many opportunities to have a little fun. It's even possible that there will be some kind of reward for keeping up with your responsibilities that can help prevent you from going off on a tangent. You may even attract a demand to enjoy yourself, even in a domestic situation; it's excellent for entertaining at home, no matter how you feel about doing so. Any adjustments or course-corrections that are needed may seem effortless right now; it's a perfect time to get things back on track without having to sacrifice personal or family time. Money matters can be favorable, and relationship vibrations are strong during this month.

JULY The Personal Month 4 is likely to be somewhat satisfying during a 6 personal year, especially when it comes to matters concerning your work. Any limitations or delays that you face this month will have a reward attached to them, so make sure you don't get attached to

negative possibilities – focus instead on the potentials of what you can manifest through your efforts, and you'll be surprised how easily the month will go by. Any opportunities that present themselves are likely to strengthen your financial position or your relationships; they may help build stronger foundations for both. Other people may seem to be more reliable than usual this month. On a different note, you should spend some time and effort focusing on any wellness issues you may be facing; diagnoses and treatment of any sort will be beneficial to you, physically or otherwise.

AUGUST After several favorable months in a row this 5 Personal Month is likely to bring complications, challenges or changes into your life. It's possible that you may have to change the way you're handling things that have been going smoothly; try to avoid doing so if you can. It's one of those months during which anything that has been overlooked could bring challenges you aren't prepared for, so stay flexible and pay attention to details. Making snap decisions are not likely to bring results that you like, and you could find yourself having to face others who want you to make decisions during this time. Neither of these vibrations is inherently unpleasant, but, in combination, you may find that you're trying to stop attracting the number (or type) of changes that you are. The trick to winning this month is to avoid doing anything risky, and to be flexible enough to accept whatever responsibilities come around.

SEPTEMBER Because this is a 6 Personal Month in a 6 year, John, you may be feeling a little overwhelmed with responsibilities. It's possible that you may be pushed into making adjustments in your schedule that could affect your domestic life or relationships, and if so, they are probably not changes that you asked for. If too many duties and tasks are on your plate, ask someone for help. Avoiding them or becoming resentful of them will not help you or the people who are important to you. Avoid getting caught up in the difficulties of others; compassion is a powerful, positive emotion, but this is a time during which you need to put your personal well-being first. If you follow through on your responsibilities to yourself and others, you could experience very positive events in your relationships, but you need to be aware that this doubled influence can work both ways.

OCTOBER Your second Personal Month 7 is likely to bring mixed results, very similar to the first one, John. Maybe you will need some personal time to take care of professional, domestic or relationship matters, but that's OK, because the quiet and thoughtful energy of the 7 is what you're attracting. If you're feeling exceptionally ambitious, or many opportunities present themselves, you can move forward, but you'll probably be doing so slowly, or need to sacrifice the time you spend working on something personal in order to accomplish something that lives within an organized framework. In all phases or departments of life, things are likely to slow down, but it gives you an opportunity to think things through, or relax and breathe before

you make your move. It is a really good month for a vacation or sabbatical, especially if you involve those closest to you. It's also a good month for quiet and private activities like meditation, research or study.

NOVEMBER A 6 Personal Year is one of the best hosts for an 8 Personal Month, because this vibrational combination includes attractions to both financial matters and relationships. You'll have to be careful, however, to avoid letting your financial or professional pursuits cause problems in the more romantic or "people oriented" side of life. It may not be the best time to involve those closest to you in your financial affairs; money issues can cause trouble in your relationships at this time. Any type of business or work that involves connecting with the public, or anything involved in personal contact should thrive. Deals made during the month should be profitable; new people you meet should be favorable for your finances. On the whole, this month should prove to be profitable, and may increase your holdings while decreasing your obligations.

DECEMBER A Personal Month 9 is usually excellent during a 6 Personal Year, unless you're stuck in the past, or expecting things to work out in the same way they did in the past. This is a month of letting go, and if you do, there is a strong possibility that you will have a wonderful time. There may be a bit of an emotional crisis if you are dependent on old survival strategies, but if you press your luck by acting on good things ahead, you will thrive. This is not a time to think about ways to get by, it's a time for imagining yourself as having let go of old problems and giving the universe a chance to show you what is possible, rather than demanding of it what you believe you deserve, or can afford. New alliances can be made now, because the experience of supportive and reliable people is what you're attracting. It also is a great month for travel, whether for business or pleasure.

PERSONAL YEAR

SEVEN

When you're experiencing a vibration 7 Personal Year, John, it's the best possible time for study, planning, rest, recuperation, introspection and meditation. The situations you attract will require analysis and careful consideration – even emotionally charged circumstances demand more careful attention than usual.

Seven may be the best vibration for tuning your emotional, inner guidance system, because it can help you understand the real purpose of your feelings. If you pay more attention to impressions and feelings, you may defeat the negative self-talk that blocks your ability to trust and diminishes your capacity for intimacy, and gain more faith in yourself and the world about you. During a 7 Personal Year, following the feelings you have about what you are planning or doing will lead you to success.

The best advice is to relax as much as possible. If you can, stay out of the "rat-race" and spend some time tuning in to how you feel about things. Your own intuition is likely to increase this year, so pay attention to it.

You may also want to spend some time assessing the successes and failures of the last six years, figuring out what you want to repeat and what you don't, and how these lessons will help you achieve your long-term goals.

A 7 Personal Year is seldom helpful for material progress; major efforts to gain wealth and investing usually result in more problems than benefits. Any efforts made toward teaching, writing, study or spiritual seeking will meet with success this year. An extended vacation, a sabbatical or a growth-oriented retreat will be immensely rewarding, as will quiet evenings at home or with family. Fresh air and social life are essential. This may be a year during which you spend time alone or with those you are closest to, but a miracle, or the answer to your prayers may be the result.

The intuitive vibration 7 may bring a year in which your intuitive abilities go into overdrive. It will be somewhat slower than you've been used to, however, and procrastination or a lack of

enthusiasm may be your response to the delays and obstacles you attract. The strategy to remedy these issues is easy to adapt; don't start anything that you can't complete before the end of the year, and don't be afraid to let others know how much of an expert you are at whatever you do best.

The Months Of Personal Year 7

JANUARY Personal Month 8 during a year of the vibration 7 predicts a difficult start for the year unless you have a very firm financial foundation, John. This foundation can be either your attitude or actual wealth. Despite whatever opportunities or offers may present themselves, it's important not to put too much energy into the pursuit of material goals. These two vibrations work together like a "Chinese Finger-Trap" – the more you try to pull the fingers out, the tighter the trap grips you – the more you struggle with financial concerns, the more difficult they become. If you relax, you can easily get free; not only that, but this is the perfect time to learn to attract to yourself the sense that the unlimited abundance of the universe can sustain you by the laws of attraction. Spiritual or magical practices of manifesting your desires will work better than labor and effort during this enigmatic month.

FEBRUARY When you experience a Personal Month 9 during a 7 year, John, you're in for a very favorable experience. On the one hand it may bring an end to loneliness, obstacles or delays, while on the other, it could make it easy for you to banish any creative blocks or to overcome any unproductive habits, ideas or misconceptions. The vibrations that you are attracting this month are nurturing to the year's vibration, and that usually results in a feeling of being uplifted. You may experience a better perspective on the "big picture" of all aspects of your life, and this experience may come through opportunities for growth or expansion. Chances are also good that you won't be bothered by the frustration that can come from focusing on "little things", or missing out by "sweating the small stuff." All of these great possibilities, however, are dependent on your willingness to stay focused letting go of the past so you can make room for a better future. Have faith in others, yourself and the divine if you don't want the past to repeat itself, and chances are good that you'll be more capable of letting go of the hurts, problems or unresolved issues that have been keeping you from moving forward toward bigger and better things.

MARCH Uplifting changes are likely during your Personal Month 1, and through them, you're less likely to be in the kind of mood to wait and see what's going to happen before making the move that could get your plans in motion. The changes you're attracting now are refreshing, not the kind of changes that confuse things. This vibrational combination favors almost any efforts made to move forward toward your personal goals, but be careful; if your goals have to do with the domination or control of others' behaviors or choices, you will be disappointed. It's a great month for beginning new practices or activities, especially if they are directed toward wholeness, self-development and individuation. You might want to take a look at making

changes in your diet or exercise routines that have the potential for putting you on the path of self-improvement – the right time is now!

APRIL The Personal Month 2 is likely to be peaceful and favorable for you this year, John, but only if you don't buy into the emotional extremes that can come from facing challenges to your beliefs or your relationships. Trust issues are likely to arise now, and you can learn a lot about yourself and other people by giving them and their advice the benefit of the doubt. The good news is that you're likely to attract the solution to any difficulties you encounter at the same time that you attract the difficulty itself; you just have to be looking for it, and it will appear. Let your intuition guide you – whether you understand these impressions as “gut feelings” or full-blown “psychic insights” you need to know that your inner guidance system is working in top gear right now. This is a perfect month for meditation practice, but also favors other activities such as study and research, especially if the cooperation of others is involved. Do a positive assessment of the past; take a personal inventory and you're likely to discover something important.

MAY A 3 Personal Month is likely to have mixed results during a 7 Personal Year, because the monthly vibration is likely to stimulate the year's vibration in a positive way. This might mean that a source of inspiration is discovered; it could also mean that there is a lot of fun to be had. Social opportunities may arise that can bring much needed variety into your life, and it would be better to follow up on them than to try and focus on a project or plan amid the somewhat distracting vibrations that you are attracting right now. During this uplifting month, you could change your course of direction that you started the year with, but if this new course involves people and fun, it will be well worth it. New people may enter your life, and they may be quite favorable for you if the contact is social rather than professional; you may not get the kind of results that you either expect or want if you are totally committed to the pursuit of wealth or an increase of status at this time – this is a vibrational combination that just doesn't work that way.

JUNE During a Personal Year 7, the month that carries vibration 4 is likely to be rather favorable for you, John, because although the pace of life can be slowed down, you'll have the opportunity to catch up with things, or take them off “back burner.” You're likely to find it easier to slog through arduous tasks and focus on details; it's a good month for dealing with anything from wellness issues to bookkeeping, to reworking any kind of financial contracts. It's not the best month for presenting new ideas, or trying something new in relationships, but it is great for putting some attention on things that are important to you on a very physical and practical level. If you have any personal pursuits or plans for this time, you can throw yourself into them and will almost certainly get good results, as long as you let go of the doubts you may have about your ability to accomplish them. It would also be a good idea to ignore the opinions of others,

and move forward; your persistence and determination may just cause them to realize what you can do when you put your mind to it. If you extend your trust to others, it will be returned to you in kind this month.

JULY You'll do much better if you approach your goals with reason and moderation in mind during this 5 Personal Month; in fact, this can be a time during which you thrive, as long as you're willing to be flexible in your views, and take the advice of others on faith. Your intuition is likely to be running in overdrive at this time, making it perfect for discovering new methods that may aid you in your work, or new information that is beneficial for your personal relationships. It's an excellent time for travel, or for enjoying a new form of recreation; you may welcome change right now, because it's likely to be good for you. You're attracting the kind of vibration that will enable others to "get it" when you present your experience, knowledge or talents to them in almost any context. Others will appreciate your talents, experience and knowledge, so be ready to receive invitations, gifts and good wishes from them. You may encounter more of the generosity of the heart than you usually do, so stay centered and focus on enjoying life during this month.

AUGUST The 6 Personal Month is likely to bring mixed results in a 7 year, John, because this vibrational combination is often a sign of mixed or confused priorities. It's possible that your plans and efforts may collide with personal, domestic or relationship activities, but, at the same time, the vibration you're attracting right now can be excellent for a getaway with loved ones or a special treatment for yourself that has relaxation as its goal. About the worst thing that might happen during this time has to do with the problems of others – if you ignore them, you're likely to attract resentments, while if you try to solve them, your advice is likely to be ignored, no matter how solid it is, resulting in your resenting them. But, despite this challenging aspect of this vibrational complex, it brings an excellent month for manifesting the things you want in life, as long as you are ready to receive, and not trying to force things to go your way.

SEPTEMBER This is a doubled vibration, being a 7 Personal Month in a 7 Personal Year, can be a time during which you attract too much of this vibration into your life. The double 7 can mean withdrawal and limitation, but this can be either a favorable or unfavorable course of events. If you are withdrawing from everyday affairs in order to recharge your psychic batteries or focus on a particular study, it can be good, even if there is tension in the air. If you are focused inwardly because of emotional or professional encounters that have not gone well, you might find yourself in a stuck place that seems to have no way out. The good news is that meditation, prayer or other spiritual exercises provide tremendous relief and healing now, and that if you take the time to let your intuition guide you, you may receive special insights that help you get past almost any form of difficulty. This is certainly not a favorable month for aggressive

financial pursuits, but there are ways to utilize this vibration for your own benefit or the benefit of others. One way of doing so is by following the principle that “like attracts like” and taking as much negative thinking away from your inner dialog as possible. In short, whatever time you spend “working on yourself” can bring immense rewards.

OCTOBER The second month of the vibration 8 during a 7 year could bring emotional upsets that result in losses, especially if you are dedicating your efforts to financial gain – especially if you’re looking for that “big score.” Don’t go “all out” or “all in” when it comes to your professional or monetary goals; new investments, job changes or seeking promotion should be carefully avoided at this time. Your time will be much better spent by learning what you can do to improve your situation – whether that situation has to do with matters of the wallet or matters of the heart. Pay close attention to the behavior of others and be careful about your personal boundaries. Try to avoid “following the crowd”, because this vibration causes you to attract those who don’t have your best interests at heart, and this is not a good time to get into any power-struggles or personality conflicts. On top of that, avoid listening to advice about money matters, unless it is about saving it – any other financial advice is suspect at this time. Whatever way you look at it, this vibrational combination is about success through peaceful and cooperative means, not through competitive ones.

NOVEMBER Your second Personal Month 9 can be an excellent time for “cleaning house” and tying up loose ends, John. Anything that you’re doing that helps you finish things needs to be your top priority, no matter what department of life that it falls in. If you’ve been working on complex problems, the 9 month this year is the time to stop figuring out whether you’ve got the right question or not, and implement the solution that your intuition provides. You can depend on your 6th sense right now. It’s a perfect month for any type of treatment or therapy; longstanding issues that have remained unresolved, or about which you have never sought out the answer can be brought to a close now. As far as financial matters go, this is the best time in which you should do your best to get rid of old attachments, so that the next month’s opportunities for new beginnings aren’t held back by old baggage. Travel is also favored this month, as are changes in diet. If you do anything like writing or blogging, bring old ideas to their resolution so that you can prepare to move on.

DECEMBER The second Personal Month 1 during this 7 year is likely to be favorable, because it will give you the boost of energy that you’ll need to analyze and push forward with your financial plans for next year. Don’t let your feelings stop you from putting your ideas and plans on the table, or let yourself be convinced that they aren’t viable because chances are very good that they will be just perfect. You’ll find it easy to enlist the aid of those with whom you can enjoy the mutual benefits of your relationship, whether it’s a personal or professional one. Try to

avoid any struggles regarding career matters, and, if you can't, use your mental and professional skills to validate yourself and improve your position, not the force of your personality; if you do, you're the one who will come out on top. Sharing with people that you trust or care about will bring rewards – being competitive and controlling is sure to bring a major disappointment. This is a month for taking a leap of faith and let the universe support you; accomplishment is your top priority.

PERSONAL YEAR

EIGHT

John, the keyword for Personal Year 8 is money, simply because that's what, more often than not, it's all about. This does not mean, however, that you win the lottery every time a Personal Year 8 comes along. This year is really focused on a balanced and wise use of money; a lack of discipline will cause tremendous losses.

An 8 Personal Year is the perfect time to put your money to work through investing, but you must be extremely careful about the type of investments you make, and about managing your money, because it is so easy to think that nothing but luck is involved, and luck is the "Kryptonite" to success during this year. In other words, random speculation will not help you, but careful and well advised planning will.

You can make profitable new business contacts or agreements now. Take advantage of any opportunities to increase your material wealth, but do your research and planning well, because the vibration 8 also means that the consequences of your actions will manifest more powerfully than usual – the right moves are wonderful, but the wrong ones may be devastating.

This year favors the achievement of positions of power and other material pursuits as well, but does not favor the careless wielding of power. In other words, this is a year that you'll attract many opportunities to take charge, but it is extremely important to lead by example, not by command. It's critical that you accept help that is offered; trying to "do it all" yourself may lead to trouble.

A Personal Year of vibration 8 is not usually helpful in other aspects of life, such as personal relationships. Because of this, you'll need to make sure to give a little extra time and effort to your loved ones. Count your professional or working relationships as important too, because you will need the support of others, and they will need yours during this year.

The powerful vibration 8 can bring a year of tremendous success as long as you maintain your discipline. It's important to stay out of other people's business this year; don't waste your time where it is not needed. Having the self-confidence to keep your feet on the ground and in the

present is the remedy, rather than banking on your expectations of others or the future.

The Months Of Personal Year 8

JANUARY If there is anything left over from last year that has not been brought to a close, John, this 9 Personal Month during an 8 year is the perfect time to bring it to a close. The month's vibration of 9 will make it clear what you need to let go of in order to move forward in the future. At the same time, it also contains an emotional component that requires you to have the discipline and common sense to acknowledge that old baggage, carried through the end of this month, may make it difficult for you to open new doors during the next one. In other words, this is a year that can bring financial rewards, but old business will certainly keep new business from getting off on the right foot at this time. Although this is the first month of your new personal year, the vibrational combination does not favor "firsts" or "new beginnings." This month tends to be a little more favorable for relationships that are established, and you should definitely put more energy into them than focusing on financial matters, unless business matters concern things that are being revised, dissolved or otherwise removed from your life. It's all about making room for the future this month.

FEBRUARY This Personal Month carries vibration 1 during the 8 year, making this a very favorable time for new beginnings, especially if they are directed at managing your financial or career affairs. This is a combination that can bring you success in all material matters, but you will need to stay self-directed, focused and willing to look for the clues and opportunities that you're attracting. It's a time to put your best foot forward – any efforts you make to improve your financial status or otherwise take control of your personal affairs are likely to be rewarded. It's likely that you'll attract new ideas as well, and if they concern money or its management, or a rise in power or status, it's important that you pay close attention and look seriously at them, because they could be the keys to new beginnings. Avoid being too aggressive, especially in your relationships with others. Take the lead, be organized, stay on course, and you'll succeed.

MARCH The Personal Month 2 during an 8 personal year is a powerful combination as far as business and professional matters are concerned, not because of the opportunities for action that fall into the realm of the previous month, but because this month's vibration makes it easy for you to attract and secure the cooperation of others. Working with others for the purpose of mutual benefit brings success at this time, and, thanks to the friendly nature of vibration 2, it's likely that you could meet important people who bring opportunities your way. Although you may attract situations that are rather emotional, you have the ability to compose yourself and handle things in a compassionate way. You will probably find it less difficult to attract prosperity, and may even receive gifts or awards of some type because of other's generally favorable

attitude toward you; focus on what you do for or with others, and everything else will “flow.”

APRIL During an 8 Personal Year, the Personal Month 3 will probably bring mixed results, John. As is typical of the month’s vibration, it may be easy to attract variety and social activity into your life, but it can just as easily be a time during which you put too many irons in the fire or find yourself distracted from things you should be paying close attention to. This is especially true where financial pursuits are concerned – although several good opportunities for improvement or success may present themselves, don’t try to do them all, or focus on the first one that comes along. Try to avoid acting on a whim or hearsay, doing so might send you off on a tangent that it will be difficult to recover from. Yes, you will attract a wide variety of options this month, but you need to be careful to filter out the ones that do not relate to your chosen path or current plan of action. Be clear, with yourself and others, about how much you can handle, and stick to a schedule – you’ll succeed if you do.

MAY This may be the most challenging month of your Personal Year 8, because the Personal Month 4 combined with the year’s vibration usually means limitations, which are usually not welcomed, and may clash with your plans or objectives. It may mean that the pace slows down a bit, or it could mean that you try to step up the pace, but find obstacles at every turn. It’s possible that you attract so little cooperation from others that you won’t get the feedback you need in order to keep moving forward. Stay in tune with your “energetic guidance system” to go around the obstacles in your path; trying to force your way through them will be a wasted effort. This month is best when you take your time and pay attention to details, because the harder you try, the more difficult taking action will become. It would be a good idea not to expect too much of yourself or others, or to hold others to your personal standards. Stress levels are likely to be high, so try to relax and take care of your physical needs and health.

JUNE This year’s Personal Month 5 has the potential to break up stagnant energy and other blockages that may be standing in your way, John, like the sunshine that breaks days of cloudy weather. It is a vibration that helps you attract opportunities for fun and freedom, and usually work with the year’s vibration 8 in such a way as to turn enjoyment to profit, or, at the very least, make whatever your efforts are focused on more enjoyable. This is a month for taking a chance or two in order to make progress; you’ll enjoy the sense of adventure that you naturally attract during this month. Give yourself the chance to enjoy some social activity, and make sure to spend a little extra time with people whose company you really enjoy. At the same time, don’t use any form of speculation as a source of entertainment, because this vibration tends to change trends; if you think a stroke of luck is the beginning of a streak, you need to think again in light of your personal history. Don’t be irresponsible, but loosen up and enjoy yourself.

JULY As long as you don't put so much time into work and financial pursuits that you neglect your loved ones, your Personal Month of vibration 6 can be very favorable for you this year, John. Although the monthly vibration itself can mean responsibility and adjustments, it's likely that there will be some kind of profit in taking care of these responsibilities or making those adjustments. The profit is usually seen as something or someone new you have attracted into your home or your financial life that gives you more of a comfort zone. It's also possible that more money is acquired, or things that you want to protect – but these benefits are attracted to you, not sought after, because if you forget your responsibilities to yourself and your loved ones, you'll probably overdo it and break the connections between you and others that the vibrations of this combination are trying to strengthen. Try to avoid getting involved in other's financial lives or profit schemes this month; it's very likely that doing so will cost you in some way.

AUGUST Personal Month 7 can be difficult during an 8 year, because the types of upsets you experience are likely to be centered on financial matters. When they are they will probably be more emotionally intense than usual, and may even cause you to react in such a way that is not helpful, or won't resolve any problems. This is not a good month for making new investments, or doing anything with money that involves risk, but it is a good month for doing any kind of research, or finding someone you can consult with so that you have helpful advice. Definitely avoid conflicts or confrontations with others, and don't agree to financial contracts or agreements, because they might lead to confrontational situations. What will benefit you the most is to "get away from it all" for a while, so that you can put this intuitional and analytical vibration to use for your personal growth and happiness – doing so can be rewarding.

SEPTEMBER This month the annual and monthly vibrations are both 8, which means that you'll be facing an overabundance of this vibration – this can be a stressful situation, John. It would not be a good idea to push yourself too hard on any level, especially that of the physical body; right now you're attracting an achievement-oriented vibration, which is generally good, but this time it's a bit much and body is likely to be more prone to strain than usual. If you already have routines that are somewhat demanding, keep up with them, but don't put yourself into a mood of trying to exceed old limits. You may feel like the only right way to get things done is to do them yourself, but chances are good that if you accept the help of others, you'll enjoy bigger benefits, and may find a new ally at the same time. There is a kind of "delaying" quality to the doubled 8, which is prone to affect your material well-being - unexpected bills or financial responsibilities may surface, so be prepared to approach them with a disciplined and "take charge" attitude in order to get the most out of the month.

OCTOBER This is your second Personal Month of the vibration 9 this year, and it may be the best month for you to take care of whatever old debts or obligations you have accumulated

since the first one. This is a vibration which almost demands that you focus on making a clean slate and getting rid of clutter in all aspects of your life. As long as you're prepared to eliminate or remove things from the past that cause trouble for you, you are more likely to attract fun and enjoyment from sources that seem "magical." This combination of vibrations can be very useful in terms of opening up opportunities for progress, but is not a vibration with which you want to focus on obtaining more things, or more money to spend on things. Find ways to help others that don't involve making a sacrifice of your time or money, and you'll have more energy and optimism to help you on your path. This is a month for letting go and gaining closure in all aspects of life.

NOVEMBER Your second Personal Month of the vibration 1 can be very helpful and uplifting, John, as long as you finished up old business last month, and realize that this is a great time for starting something new. It's a good month for following your gut feelings when it comes to making decisions – it's also favorable for becoming a little more aggressive in obtaining your goals. In fact, material success is promised, and the degree of success is likely to be directly related to how much room you've made for these new benefits by letting go of old baggage. If you've been managing your finances well over the last several months, it is certainly a good time for investing in your own future, and the future of your loved ones. If you do so, you can expect this to be a prosperous month. You may be somebody's rock this month, or that someone special will be yours.

DECEMBER This second Personal Month 2 is usually quite powerful in helping you to achieve material goals this year. It's not only helpful because things are likely to go well between yourself and others, but because your ability to attract helpful people and situations is increased under this combination of yearly and monthly vibrations. As long as you're willing to delegate some of your responsibilities to others and cooperate with people around you, you can expect some form of success to come to you without much effort on your part. Your best opportunities won't be the ones you find on your own, they will come to you through others. Even in matters of the heart and non-intimate relationships with other people, as long as your actions remain true to your words and you keep your promises, you'll find that your actions will bear fruit and result in happiness.

PERSONAL YEAR

NINE

During a Personal Year of vibration Nine, John, you need to bring things to a close and let go of the past, so you can make room for the future. This is the vibration that colors the year with words like “closure” and “completion”, and you should use them as guideposts in all your affairs.

This is a good time for making decisions about what you want to achieve during the next nine-year cycle, but be careful not to begin long-term projects while this vibration is in power. If you are involved in a business or career that is ongoing, there is likely to be something you need to finish up; focus on endings so that the next new beginning will be ready to pursue.

Unhelpful friends should be avoided, bad habits should be dropped, and under-performing investments should be abandoned while the 9 vibration is in power. You may have to make sacrifices, and they aren't likely to be easy, because this vibration attracts emotionally loaded circumstances.

Do your best not to leave any business unfinished that began during the current cycle. One of the most important qualities of

this vibration is its ability to bring problems to a close, so if you put extra effort into taking care of yourself, wellness issues can be more easily resolved during the 9 Personal Year than in most others. Study, writing, contemplation and travel are also favorable during this time.

Interestingly, a 9 Personal Year does not favor changing jobs or careers – it's more likely that you'll experience heavy or long-term losses if you do.

Your emotions may be harder to hold in check this year, getting involved in the problems of others may be a strong temptation, but that's because the sense of “finality” that you are working with may be perceived by them as an easy way to dump their own dramas and problems. Be compassionate, but don't be a martyr – you can thrive during a 9 Personal Year only if you're willing to let go.

The sensitive and compassionate vibration 9 can be empowering for you as long as you don't get emotionally carried away. At the same time, you must remember that this year, frustration is not an excuse for confrontational or controlling behavior. Yet these frustrations can easily be relieved if you trust and follow your intuition, which will guide you to success – if you let it.

The Months Of Personal Year 9

JANUARY Since your personal month is of the vibration 1, John, it means that the month favors new beginnings, but because it is a Nine Personal Year, it can also bring success on a large scale. This year/month combination can be fantastic, as long as you do not try to drag the past into the present: this is a time when old ideas and habits need to be left behind, so that you can prepare for the next Personal Year Cycle. This is a combination that focuses on both ends of the Cycle of 9, meaning that you are attracting both endings and beginnings, and since the beginnings heralded by the monthly vibration are dependent upon endings, it shows that beginnings will succeed if they bring an end to something that has been holding you back. If you insist on hanging on to old and unprofitable attachments, you'll experience a good degree of emotional stress this month. Let the past remain where it is, and focus on creating a future that is yours.

FEBRUARY This Personal Month of the vibration 2 is likely to be emotionally stressful. The stress is likely to come from the tension between wanting to let go of things that are no longer providing what they used to, and feeling so attached to things (and people) with whom you have a past that you feel obligated to in some way. This is a time during which you are attracting vibrations that are looking for closure and completion on the one hand, and togetherness and cooperation on the other. It's a very good month for working with consultants or counselors that can help you get the closure and completion you need; because your work with them satisfies both sides of the equation. Unless you are changing your type of business or retiring, this is an unfavorable time to change your working situation or environment. Unless someone is helping you let go of the past, don't expect to get much cooperation from them.

MARCH The Personal Year vibration is very well balanced against vibration 3, which is the sign of the Personal Month, and that means you can expect things in general to go well. The only thing you need to be on guard about is getting involved in the problems of others, but during a social, pleasant month like this, it's easy to do, because this is likely to be the type of complication that you are attracting right now. It might be an act of kindness on your part, but you need to realize that taking on something new this month will distract you from your primary aims, goals and relationships. The annual and monthly vibrations will also encourage you to be creative, and going on a tangent in the direction of creativity is likely to be fruitful; relationships can also prosper as long as you get rid of old dependencies or expectations. Travel is very favorable at this time.

APRIL During a 9 Personal Year, your Personal Month 4 is likely to be somewhat challenging on more than one level, John. The monthly vibration you attract brings limitations, but you can notice where these obstacles are coming from, and go to work on eliminating them from your life. They could appear as unproductive habits or personal wellness issues; in fact this is one of the best combinations for taking your health seriously, because of how easily trouble can be eliminated or resolved. There is also a possibility that people may unconsciously hold you back if you're moving forward successfully, because they don't want to be left behind. You may be doing the same kind of unconscious sabotage to yourself. This is a month during which you may attract difficult lessons, but the feeling of liberation that you receive from following through and taking these lessons on is more than worth the effort.

MAY A 5 Personal Month during a Personal Year 9 is likely to be one during which you'll have the opportunity to embrace real freedom. As long as you're focused on breaking free from whatever is stuck or stale in your life, you'll attract many opportunities that can bring true rewards, but only if you are ready to take responsibility for the effects that your actions have on others. This is an excellent month for investing, travel, engaging in new activities, or for abandoning things and ideas that aren't living up to your expectations so that you can pursue those that do. It's also important that the changes which come this month are likely to be opportunities to let go, so you may have to make some kind of sacrifice during the month that may be somewhat difficult for you emotionally. If the sacrifice happens to be your personal freedom, don't give it up unless surrendering your personal time could mean a change that could take you to the next level in your career or an important relationship.

JUNE The 6 Personal Month of a 9 Personal Year is likely to be excellent in more ways than one. First of all, this is a romantic and sensual vibration; very often financial or career matters will sort themselves out, giving you a chance to take your heart off the back burner. Your relationships with others can be brought to a whole new level now, but this shift in your relationships may go either way – it's good for letting go of complications and sorrow, but it is also good for letting go of whatever is holding you back from completing or stabilizing a relationship. It's seriously a time during which the heart can open to a completely fresh experience of love and compassion; having this experience should be your top priority. Be open and understanding of others; they won't let you down. The vibrations you attract during this month are also quite passionate – try to enjoy the good things in life in whatever way you may define them.

JULY A 7 Personal Month will probably give mixed results during a 9 Personal Year, and the mixed results mostly concern the emotional levels of consciousness. There is a possibility that the trust you extend to others may not be returned, mostly because you will have a sense of

immediacy about what you are doing and want to do, while others may seem to be taking their time. You see, you are attracting a monthly vibration that slows the pace of things down, but rather than making situations easier to analyze or study, the emotional quality of the vibration 9 may make it difficult for you to put up with the frustration you feel about others not living up to your (or even their own) expectations. This is the worst time to try and help others solve their personal problems; your advice is likely to be ignored or rejected, adding to the emotional tension. It's also possible that their dilemmas may become yours if you get too involved with them, so have faith that they will sort themselves out, and use this month to prepare, analyze, study and perform spiritual or health-oriented practices that help you to let go of your own issues.

AUGUST Your 8 Personal Month will probably be the trickiest period during this 9 Personal Year, John, because you're likely to attract the side-effects of unfinished business or un-corrected mistakes. Whether these mistakes took place in the domestic or personal arena, it's likely that during this month, they will come back to haunt you in some way or another. This is actually an opportunity to eliminate these old problems, even if it costs you to put them behind you. Vibration 8 is about getting the results of your past efforts, while vibration 9 is about finishing things. If you have the chance and wherewithal to take care of any old debts, do so; it's the best way to receive some benefit from this part of the year cycle. This is not a time to borrow trouble from the future by hoping problems will go away; be done with old issues concerning business or money once and for all.

SEPTEMBER This is the month during which the Yearly and Monthly vibrations are the same for you, John, and this means that you will experience a doubled 9 quality in all aspects of your life. First of all, this double 9 can mean emotional turmoil due to unresolved or unexpressed feelings that are causing you to attract vibrations that demand you let go. Secondly, it's possible that not letting go of the past can cause losses of some type or another. If you do, it's only because this doubled combination will help you to get rid of that which does not enhance your life, whether you feel like letting go or not. The best way to handle this vibration is to make a sacrifice of something that you know you shouldn't have in your life voluntarily, like giving up a bad habit or severing ties that are causing more tension than relaxation in your life. It's also likely that relationships will be emotionally trying at this time.

OCTOBER Your second Personal Month of the vibration 1 can be very successful for you, especially if you have given something up during the last month. This is a time when you can move forward with your plans and ideas in all departments of life, as long as you are willing not to carry a lot of baggage with you. If you don't hold yourself back with regret, doubt or other forms of negative thinking, you can expect to achieve a degree of success in any department of

life; your mental posture and emotional attitude are the most important things right now, and they will propel you forward toward your goals as long as you remain positive and focused on your best interests. This is not always an easy task, because it requires that you stay oriented toward the future, and mindful of that which you do not want to carry into your next Personal Year Cycle. One piece of advice - no matter what you've heard from friends or family, it's not lonely at the top; in truth, it's only more crowded at the bottom.

NOVEMBER This year's second month of the vibration 2 is likely to be quite powerful regarding its emotional effects, especially if you don't set aside time to practice compassion and understanding with those who are important to you. In fact, it may be more important if you extend your understanding to all those with whom you are in contact, because the monthly vibration can attract contentious situations to you. This month can really be a test of whether or not you are still attached to what you need to let go of; that is the only aspect of this combination that can be source of unhappiness at this time, but it's a big one. This is also a good time to check on your physical well being - difficulties that have been affecting you can be eliminated through cooperation with others. You need to let go of ideas, practices or habits that may not address your body's needs; doing so may attract the emotionally uplifting qualities in yourself and others that you'll really need to keep the turbulence away.

DECEMBER This 9 Personal Year, and, in fact, the 9 year cycle comes to a close with the second 3 Personal Month. This is a month that can bring excellent results and experiences, John, and even attract opportunities to foresee your direction in life during the new cycle that is about to begin. It's a time during which you shouldn't deny yourself the opportunity for social activity and especially travel, because the experience of getting away from it all is the most likely avenue through which you can gain the insight that's necessary to help you move forward. This could be a very good month for relationships; you're likely to meet new people and enjoy the company of those you already know. Even the distractions that you attract could be filled with important connections and information, so drop your preconceptions about people and put yourself out there, you may discover the key to living successfully during your next 9 year cycle!

Your Personal Year Table

Here is a “ready reference” table so that you can quickly find the Personal Year Vibration that corresponds to any of 108 years starting with your year of birth. The month values can easily be found via the information above, and your Personal Day table will include these values in a graphic format through which they can easily be found.

PY1	PY2	PY3	PY4	PY5	PY6	PY7	PY8	PY9
1980	1981	1982	1983	1984	1985	1986	1987	1988
1989	1990	1991	1992	1993	1994	1995	1996	1997
1998	1999	2000	2001	2002	2003	2004	2005	2006
2007	2008	2009	2010	2011	2012	2013	2014	2015
2016	2017	2018	2019	2020	2021	2022	2023	2024

2079	2080	2081	2082	2083	2084	2085	2086	2087

Your Personal Days

A Personal Year has a whole year to infuse it's vibration into your life, and the Personal Month has four or five weeks to do so. A period of 24 hours offers little time for you to work with the vibration, but the vibration of the day can easily be used to your advantage nevertheless.

We tend to build our schedules at random, always adapting them to our circumstances and the demands of others. By knowing your personal days, however you can modify your schedule in order to utilize the vibrations of the day for your benefit.

Here's a list of the activities specific to the 9 Fadic vibrations:

- 1 Days of the vibration 1 favor self assertion, appointments, business deals, new beginnings, or anything that advances your personal agenda.
- 2 Days of the vibration 2 favor association with others, agreements, negotiations, exchanges, cooperation and relationships.
- 3 Days of the vibration 3 favor self-expression, creativity, matters concerning appearance and charisma, and social activity.
- 4 Days of the vibration 4 favor work, scheduling and organizing, whether it has to do with your job, business, gardening or health – and little else.
- 5 Days of the vibration 5 favor making changes, travel, personal connections with another, and advertising or self-promoting activity.
- 6 Days of the vibration 6 favor purchases and activities concerning the home, or finding a new one – only start what can be completed today.
- 7 Days of the vibration 7 favor meditation, rest, review, spiritual or scientific (research) activities of various types, and family outings.
- 8 Days of the vibration 8 favor anything that is concerned with money or personal power, such as bookkeeping, interviews or taking charge.
- 9 Days of the vibration 9 favor finishing things and bringing them to a close, as well as letting go; start nothing new and don't make plans.

You can use the tables below to find out which day of the month works best for you, and build a cosmic organizer to aid your endeavors.

9 Rules For Studying Your Personal Days

- 1 The first of every month begins a new cycle. Don't be surprised if the dates don't run concurrently.

- 2 The days are on a 9 day cycle, not a seven day one.
- 3 The Numerological value of each day does not reflect the calendar date, because your Life Path and the vibration of the months and years determine the values of Personal Days, not the value of the Universal day.
- 4 The vibration of the year is stronger than the vibration of the month, while the vibration of the month is much stronger than the vibration of the day. Try to carry out your most important activities on which the same vibration is carried by the Personal Year, the Personal Month, your current Life Path Cycle, or some other more powerful vibration, like the Birthday Number, Achievement Number or Life Path.
- 5 Try to avoid scheduling important activities in conflict with the day's vibration; if you planning to be out socializing, you won't have much fun if you do so on a day carrying vibration 4, 8 or 9.
- 6 Don't take the daily vibration too seriously; there are too many factors in the chart that can surprise you with how any given vibration will work out.
- 7 When you're beginning to use the calendar, it's more important for you to concentrate on how things go on a given day at first, so you learn which vibrations are easy for you to capitalize on and which offer the most resistance.
- 8 You have to realize that how typical or powerful actions taken on a given day depend on the "background" changes, and not just those along larger Life Path cycles. Some cycles change on your birthday, while others change on January 1st. So, for instance, something that's easy for you one month may be very difficult during the next, because of the longer term cycles in your Numerology chart.
- 9 Never make important decisions or big plans on the basis of the Personal Day alone. If you are serious about making major changes, study your major cycles and Transit

Chapter 3

Destiny Engineering

This is the final section of the report, and possibly the most important. It is designed to show you how to use all the information that has been presented to you so that you can deploy it to your advantage.

First, you will have the chance to explore the dynamics of your combined or composite numbers. These are vibrations that are a blend of the Life Path vibrations – the time cycles generated by your date of birth, and the Total Name Numbers, or Expression vibrations, which are generated by your name.

The first new chart element that we need to explore is the Letter Aura.

Your Letter Aura

Another important factor in your Destiny Table is the Letter Aura. Before we explain what it is, and what attending to its message can do for you, let's explain a little about the term "Letter Aura" to avoid any misconceptions.

The term Aura has only recently been used to describe a type of multi-colored halo surrounding the body. Before the end of the 19th century, it was used to describe something that was felt by others; an emanation of the physical body. It was probably used to describe the different vibrations that the living heart produces, which extends several meters. Very sensitive individuals probably began to interpret this in terms of colors, and became able to "retrofit" the emanations into tangible concepts through what some call clairvoyant ability.

We use the term differently in this part of your report to describe the vibrations produced by your physical, emotional and mental aspects of the self as well, except that they are read as the Numerological vibrations for the purpose of familiarity. It is a long-term indication, and gives a picture of the "default mode" of the changes in your attractive and expressive emanations.

The Letter Aura is composed of two elements; letters of your first name, and your Life Path Cycle vibration. In this case, each letter is given a period of nine years before it moves

to the next, and the Life Path Cycles follow the same times of change as you've read about earlier in your report. Therefore, during the years and months that you are experiencing a given Letter Aura, various short term cycles may be more evident in your behavior, but when an incident passes, the tendency will be to revert to the vibration that is current. These powerful patterns may take some time to be discovered, explored and altered because the unconscious mind is involved.

The Letter Aura has much to do with the habits of action or thought that act to attract the kind of things you want or need in your life. They are not changed by utilizing different vibrations to work on the same issues; they are changed by tuning in to the aspect of the vibration that is higher in frequency. This is not always easy, because it requires acceptance and patience.

The problem of expectations is often troublesome for people who are beginners at working with vibrational frequencies, because it's so easy to believe that things will happen exactly as you want them to, and when you want them to. This is simply not the case. This is not a simple use of force, or about doing something differently for a little while in order to get a specific result. New possibilities and opportunities will arise, but they aren't likely to extend from people or sources you may currently know.

You might think that this sounds like a metaphysical act, such as yoga, self inquiry, meditation or prayer – that’s because those are all practices that get similar results that are stable and long term positive changes. You may get the kind of results you want even faster by working with your Letter Aura right away!

Letter Aura One

During the times when your Letter Aura is vibration One, the key for tuning in to the most positive aspects of this vibration is to follow your own path, rather than living life in reaction to the paths of behaviors of others. Many opportunities will arise for you to do things in such a way that you break through old traditions or ideas, and you need to capitalize on them, unless it involves causing harm to others. Of course, managing this vibration will not be the easiest thing to do, because One is a vibration that is quick to act. While it is active, it's important that you learn how to look ahead and weigh the possible negative consequences of your actions against the positive ones, and act accordingly. This is the path to compassionate leadership, creativity and self-acceptance at the highest level.

Letter Aura Two

While your Letter Aura is of vibration Two, it's of extreme importance that you learn to be guided by your intuition and empathy, without giving yourself over to the will of others. It is a challenging journey that requires a great deal of courage and most of all, independent thinking. Advancing along this path requires cooperation, but you must learn the difference between cooperation, co-dependence and subservience. It can bring you the opportunity to be a superb negotiator and peacemaker, and enable you to find a win-win solution for almost any problem, but if you don't learn to stand up for yourself, negative emotions will become more deeply buried in your unconscious and block the gifts of intuition and empathy that you'll need during this time.

Letter Aura Three

A Letter Aura of vibration Three will manifest as a peaceful, congenial and harmonious atmosphere, in which you feel surrounded with beauty and good friends, but it also requires you to be self-expressive, and not hold back when it comes to personal creativity. When you get caught up in feelings of being somehow inadequate or "less than" during this time, you can expect the changes you experience to drag you down into jealousy, frustration and the fear of being judged by others, all of which can limit your ability to release the charm and wit of this visionary vibration. A self-accepting and grateful attitude can keep you from trying to change

things you have no control over, which virtually eliminates the kind of self-sabotage that comes from having unrealistic expectations of yourself and others.

Letter Aura Four

During any period of your life that carries vibration Four, you can expect most of the situations you encounter to teach lessons about the beauty of order, systems and structure. By tuning in to this vibration, the material aspects of your life become organized, and you'll find that others think of you as being dependable, but by trying to tune it out, others will probably think of you as being stubborn and confrontational. The lower frequency of this vibration can be biased and unimaginative, and may even have negative effects on wellness, your financial life and other material aspects. Its gift, however, brings focus, persistence and managerial skills to all you do, and enables you to see things through, no matter how difficult others may think it be for you to do so; it can make you into the irresistible force, rather than the immovable object.

Letter Aura Five

Whenever you have Five as your Letter Aura vibration, you can be sure that the background quality of your activity is all about freedom and fun, but it's easy to have too much of either or both. The higher frequency of this vibration can be both centering and liberating; it can bring true balance, as well as moderation and change – it can be a major factor in your ability to enjoy life. But if you decide to act in an excessive way, especially regarding your personal pleasures, all of the previously mentioned attributes can reverse themselves, resulting in your becoming impulsive, reckless and inconsistent. Rather than following the vibrations at the low end of the scale of Five, and spending this time being self-indulgent and giving in too easy, if you point your curiosity toward accepting change, you'll quickly find yourself on the cutting edge of satisfaction and happiness.

Letter Aura Six

When you have a Letter Aura of vibration Six, you can be certain that if you accept the responsibilities that you take on, instead of trying to avoid them, that you will discover a bright and powerful feeling of love in almost all you do. This is a vibration that abounds in compassion,

and when you tune into it, you'll discover natural counseling skills; your protective instincts may point in any direction, whether they be toward people or ideas. It's easy to tell, however, when the lower side of this vibration is presenting itself; you may become a critical perfectionist that can be quite irresponsible and finds it difficult to commit to anything or anyone. Rather than expressing the nurturing aspects of this vibration and being seen as a natural healer, lover and caregiver, you'll be seen as an overprotective individual that avoids intimacy. Your theme through this Letter Aura should truly be "all you need is love."

Letter Aura Seven

During a Letter Aura cycle of vibration Seven, you have the potential to experience spiritual, psychic and even intellectually liberating experiences, as long as you avoid being so skeptical that you try to control everyone around you. This particular Letter Aura is all about trust. The negative side of this vibration is generated by the fear of failure, which can cause you to "overthink" everything and isolate yourself from others. If you realize that this fear and doubt in yourself is truly unfounded, you're likely to experience major transformations in your life; your insight into yourself, others and any situation you encounter will grow by leaps and bounds. You'll find that you can see all sides of almost anything or anyone that presents itself - you'll act with empathy toward others without having to think about it, and you'll be appreciated and loved for who you really are.

Letter Aura Eight

While you are experiencing a Letter Aura of vibration Eight, you have to be very careful not to let materialistic thoughts and goals dominate your consciousness, because if you do, you'll find nothing but frustration. This frustration can lead to your becoming contentious, arrogant, temperamental and controlling - you'll adapt characteristics that separate you from others. On the other hand, if you focus on the process of managing your life and your relationships through a sense of generosity and doing the right thing, you will find yourself in a position of leadership or authority without having to make too much effort. Remember that this is a vibration that sets the stage for a fairly long period of time, and that it's not likely to change immediately when you make up your mind to "walk your talk" but if you make the effort to try and make something good happen every day, you'll quickly tune in to this powerful gift.

Letter Aura Nine

If you can let go of your personal ego issues during a period of Letter Aura Nine, you could quickly tune in to this selfless, liberating vibration and transform not only your life, but the lives of others. On the upside of this vibration, it is possible to experience true and universal love and compassion while still keeping your feet on the ground. The downside of this vibration is the extreme opposite; you're likely to experience emotional turmoil from the inability to let go or from a dire need to feel appreciated. If you are constantly trying to assert your personal significance, it may show a fear of not being noticed and have all sorts of effects on your wellness, your prosperity and your relationships. If you're experiencing any of these symptoms, you should get involved in activities that can help you acknowledge and embrace your inner or higher self – you'll quickly turn things around if you do.

The next element you should understand is the Attraction Number, which is an aspect of your “magnetic potential” or the ability to attract that which you desire, and when certain aspects of your desires are available. Understanding this chart element makes connecting with the abundance of the Universe easy.

Now it's time to explore a composite number that has to do with the aspects of your chart that show what kind of results you'll get from your behavior and your choices. This chart element is composed of three items: Your Secret Identity, Your Personal Year, and the Pinnacle that is in operation during that Phase. By its structural components, it has 2 factors that are directly born of the dynamics of your Life Path, and 1 born from temporary changes within your Expression. Hence, the Attraction Numbers last only for a year or less, and their effects are fast-acting and easily noticeable.

Since the Life Path components are attractive while the Expression components are expressive, this might be one of the easiest and fastest chart elements to work with in order to achieve short term goals, because making the decisions and choices indicated by your current Secret Identity will operate within the context of the Personal Year to attract the conditions necessary to pursue them with certainty. By combining them with the Pinnacle that's in operation, you add the long term and steady power of one of the most permanent components of your chart and increase your chances of attracting the best possible results for your efforts in all current and future affairs, which adds a strong foundation to this power. The best news is that the Attraction Number will repeat from time to time, so you'll have the chance to correct your course when needed.

Just remember this simple formula: the Secret Identity = Action, and the Attraction Number =

Results. Don't forget that the results from this vibration are twice as strong as you may expect, so if you act positively on the guidance of your Secret Identity, you'll be much better off than you would if you acted negatively. Learning to work with the Attraction Number will give you a clear tactical formula for "raising the bar" of the vibrations you are attracting - and this is how:

Every one of the vibrations that you may express through your Secret Identity has an upside and a downside.

When your conscious choices and decisions are in alignment with the upside of your Secret Identity, your Attraction Number will show the positive results you can expect.

When you are pursuing actions that should be avoided in your Secret Identity, your Attraction Number will show the negative results you can expect.

During some years, there may be more than one change of the Attraction Number; they are likely to signal more dramatic changes in your life.

The years during the change of Pinnacle often show extreme changes, even when the Pinnacle is of the same vibration.

Nobody is perfect, but getting just a few noticeable and positive results is a goal that can be achieved by anyone. A listing of the 9 Attraction Numbers in their positive and negative manifestations follows - this is a good time to re-read your Secret Identity and

think about ways to follow the positive suggestions for the vibrations that compose it. If you notice that one or more numbers never appear in your Destiny Engineering Table, don't worry; that means you'll have other aspects of your chart that are more than able to compensate for the effect.

Before we show you the Destiny Engineering Table, it's important that you understand a crucial element for its study.

John, the Destiny Key is one of the most important tools you can use to create your own future. Some Numerologists call it the "Life Number" and others use the term "Ultimate Number" to describe it. The Destiny Key is easy to find; it is the Arithmantic sum of your Life Path and your Total Name Number, expressed as one of the nine single-digit or Fadic vibrations.

It is a very powerful "x-factor" in your chart, because it is a number which attracts circumstances and enables your ability to direct energy toward certain goals, according to its vibration.

Some numerologists give this number a lot of weight as a static indicator, or snapshot of the "give and take" aspects of life, but experience seems to show that it is something different. It is about your connection to the larger world and how you relate to it. It is therefore a dynamic indicator that can help you get the best out of your chart at times when you are experiencing this vibration, acting as a force you can to wield when certain situations or circumstances that you have attracted come to the foreground, or when the efforts you need to make to get good results are difficult.

In other words, when one of the active cycles such as Life Path Cycles, Pinnacles, Personal Years or Months, Attraction Numbers, Letter Auras, Letter Transits or the Secret Identity is of the same vibration as your Destiny Key you

can take advantage of its ability to channel inner resources to modify the changes around you by using it in specific ways. Many people do not have a Destiny Key that is of the same vibration as key elements in the chart, but have experienced dramatically positive circumstances when its energy phase is active. When you vibrate harmonically with this number, it's easy to "rise to the occasion."

When the vibrations that are different from your Life Number are active in these dynamic aspects of your chart, the Destiny Key does not go away. These are times when you have less of an opportunity to utilize your Destiny Key to get the results you want. Unless you have become very skilled at working with your chart, these times seem to work out best when left to the various Challenges, the Secret Identity or Attraction Number elements that harmonize with the active vibration – maybe this is nature's way of letting you cultivate all your talents, because a forced reliance on one skill or ability does not support inner growth and development.

But nature is not stingy when it comes to giving the opportunity to use your Destiny Key; everyone will find it as the active vibration of a Personal Month at least once a year, twice during some years, and certainly once every nine years in the Personal Year Cycle. When these times come, you can deploy this tool for the purpose of engineering your destiny with confidence. The power of the Destiny Key to bring about the changes you desire should never be

underestimated or ignored.

Because the vibration “Nine” is your Destiny Key, you may have a major success during any of the Cycles or Transits of the same vibration, John. The first signs of one of these successes could have to do with overcoming misfortunes of the previous Transit or time period, or it may mean the reward that you gain from special training or education. Experience teaches that someone with this Destiny Key succeeds through a connection with events or people that are far away from, or very different from those you grew up with, but the whole theme of being connected to the “larger world” or events outside of your early experience is strongly emphasized during this vibration’s cycles. It’s important for you to know that these successes are not guaranteed, and they will require finishing something, bringing about an ending, letting go, and sometimes making a sacrifice.

The sacrifices you may have to make may be nothing more than sleepless nights while solving a problem, especially during a Personal Month of vibration 9, but during longer time-cycles, they could be much larger, such as leaving behind a person or place that you’ve become accustomed to. Make sure you realize that integrity cannot be replaced, so don’t give up on yourself or your dreams. You can always sacrifice bad habits, extra calories or guilty but unproductive pleasures that disturb both mind and body. If you use your intuition while following this simple rule, you will see how your Destiny Key can help you create a self-directed future that can open up possibilities for your life that you may have barely believed were possible. In other words, your Destiny Key, if you let it, will teach you how to “pay it forward” and help you gain rewards you never imagined.

Now we’ve reached a very important part of your chart – your Destiny Engineering Table. Please make a careful study of these instructions and hints before you start paging through it:

Reading Your Destiny Table

Your Destiny Table may seem to be a little confusing at first, but it won’t take long to learn how to read it, even if you only check in with it on your birthday or at the beginning of the year. To help you get used to understanding it, here’s a breakdown of the columns, followed by hints and tips for reading it:

At the top, you’ll find some information about your chart: you’ll see your Name followed by your main name numbers; the Expression and its Challenge, the Soul Urge and its Challenge and the Persona with the Challenge particular to it. These numbers are made available so that you can utilize them easily by making choices according to the vibration as described elsewhere in your chart, thereby

creating the types of conditions that favor your happiness, prosperity and overall well-being. You will also find numbers of importance regarding your Karma Table, so that you can easily spot the times when you're most likely to find yourself in situations where you're most likely to need help making balanced decisions.

Next, you'll find your Life Path, your Birthday Number and Challenge, and your Achievement Number. Your Major and Minor Life Challenges will also be found there, so you'll be able to clearly note the conditions you will attract during periods when their vibration is active.

Lastly, you'll find your Destiny Key, which shows, during periods when it is active, a primary strategy with which you can make the kind of choices and bring out the best of your personal Destiny Key vibration.

The columns that follow include vital information about the dynamic aspects of your Numerology Chart. They will be listed here, in order, going from left to right.

1. Year – this column contains the calendar year for 100 years, starting from your birth year.
2. Life Path Cycle – you will see the vibrations of the three Life Path Cycles; they change on January 1st of the appropriate year.
3. Pinnacles – this column has your Four Pinnacles marked as per their vibrations; they will change on the appropriate birthday.

4. Personal Year – this is a listing of the Personal Year Cycle for 100 years, starting with your birth year.

5. Letter Aura – This element is a combination of your Life Path Cycle, and the 9 year cycles of the letters in your first name. It is an “inner” or spiritual essence number that describes the vibrational rate of your “emanations” – it can be like a magnet for what you want in life if you learn to raise the frequency, as clearly described in the text.

6. Secret Identity – here we have a full transit report that describes your dynamic personal alphabet through the years, and the composite vibration of your secret Identity. This is a very strategic number for you to be aware of; it can help you make positive changes when it may seem very difficult to do so otherwise.

7. Attraction Number – The Attraction Number is the arithmantic sum of the Pinnacle, the Secret Identity and the Personal Year that are in operation at the current time. Because these different factors change at different times, you may often see two numbers in the cell – the one on the left is in power before the birthday and the one on the right is active after. This element shows the kind of circumstances you'll attract according to how you choose to use your Secret Identity strategies.

Here are a few more important notes to help you get started.

Although your Soul Urge, Persona and

Expression are basically static vibrations (they don't change unless you change your name) it's a good idea to reflect on the years when any of these three match the Life Path Cycle, Pinnacle, Personal Year, the Secret Identity or the Attraction Number, because those are years in which those static vibrations of the name can be expressed easily and stimulate the best possible results.

Your Life Path Number is fully described in the beginning of your report – it is placed here as a reference, because it is the source of much of the information that follows, and an overall guide to what circumstances you tend to attract in life. The Achievement Number is also fully described earlier, and the relationship to the Personal Years, Pinnacles and so forth has already been explored. If you need information about a given year, just find the Personal Year Number in the Destiny Table and refer to the section on the Personal Year Cycle and the Achievement Number to find out what the best opportunities and strategies are during that time.

The Birthday Number is the same vibration as your second Life Path Cycle, or the Cycle of Productivity. During this cycle, years that also match the Birthday Number will be especially significant, because they will give more powerful results from that vibration. If you have not been working with the Birthday Challenge, and the issues that are involved, these years may be more trying than you'd expect, but if you have, you'll find that these years to be excellent in terms of bringing satisfying results.

Your Major and Minor Life Challenges will offer you an opportunity to work with them and improve your overall circumstances if you attend to them during any of the time cycles in the tables that match. Having a matching cycle will make them more prominent, and in some ways easier to work with.

The Destiny Key is one of the vibrations that is likely to change with your name; yet another reason why reputable Numerologists urge you to be careful about doing so. It is fully described in the Destiny Engineering section of the report to help you understand its power. If you do change your name, it's a good idea to recalculate the Destiny Key accordingly, or consult with us to find out how. Its power must never be underestimated.

Much insight can be gained from referring your Dynamic Alphabet analysis to your Secret Identity, letter by letter. Don't dwell on it too much, however, because, for beginners, it is more important for you to focus on the Secret Identity number, and what it contributes to the Attraction Number.

Another thing that you should be aware of is that when more than two of the same vibration are active in the same row of your Destiny Table, it intensifies that vibration to the point that it may cause difficulties. It is better to know about these years so that you can prepare for their possible worst-case scenario, rather than to expect only the positive levels of the vibrations to manifest, because that could be an avenue that leads to

disappointment.

The list below is explicit, but does not mean that the worst than can happen will. If you are prepared in advance and study the life strategies suggested throughout your report carefully, you'll be well on your way toward knowing how to handle any situation that might occur.

1. If vibration One occurs more than two times in a row of the Destiny Table, be prepared to slow down; this combination can suggest that there may be lots of activity that gives you few, if any satisfying results.

2. If vibration Two occurs more than two times in a row of the Destiny Table, be prepared to focus on your personal wellness and to avoid being emotionally invested in your expectations of others. It's even possible that emotionally based decisions could cause financial problems at this time, so stick with what works, instead of what you feel like should work.

3. If vibration Three occurs more than two times in a row of the Destiny Table, be prepared to do everything you can to remain focused and calm. You may face any number of distractions that could not only divert you from your goals, but can scatter your energy to the point that focus and direction are lost.

4. If vibration Four occurs more than two times in a row of the Destiny Table, be prepared to face some degree of overwhelm at work, or in other situations where your responsibilities limit you in some way. If you

can do things "by the book" and concentrate on the mundane details of life, you'll find it easier to navigate during this time.

5. If vibration Five occurs more than two times in a row of the Destiny Table, be prepared to "stay the course" as far as self-improvement is concerned, because it's likely that you'll be tempted by various pleasures and opportunities that require you to abandon your self-chosen path in life. If you can stay grounded and focused on long-term goals, you'll have a much better time during this period.

6. If vibration Six occurs more than two times in a row of the Destiny Table, be prepared to face issues concerning your responsibilities, because they may become excessive. Sometimes your domestic life can be thrown into disarray during a period like this, so be ready to focus and act in your own best interest in order to make things go more smoothly.

7. If vibration Seven occurs more than two times in a row of the Destiny Table, be prepared to do everything you can to avoid isolation. It's possible that limitations may come with this vibration, but don't let those limitations extend into your social life or relationships. If you can see the spiritual value in your connections with others, things will proceed at a slower, but more pleasant pace during this period.

8. If vibration Eight occurs more than two times in a row of the Destiny Table, prepared

for financial losses and struggles by avoiding any kind of risky activity – make keeping what you’ve gained your top priority. Even risky or challenging physical activity could result in unforeseen problems, because this is a time that requires discipline and careful management of your physical, emotional and financial resources if you want to avoid the worst-case scenario.

9. If vibration Nine occurs more than two times in a row of the Destiny Table, be prepared to make some kind of sacrifice voluntarily in order to minimize the possibility of losses. This can be an emotionally trying period that could put a lot of pressure on you, and most of that difficulty will most likely come from the inability to let go of your expectations of others or yourself. Emotional balance is the key to helping your affairs run more smoothly.

As you begin to look for patterns in the table, browse through the various sections of your chart again, so you can be certain about how to apply Numerology as an art or science capable of changing the present and creating the future you want and deserve.

By now you should have a pretty good idea about your personal Numerology and how to use it. But there are times when you'll need to pick a good time in order to get the best possible results for your efforts, plans and projects. There may also be a simple question that you need an answer for may not yet know enough about reading omens by the numbers. That's why we've included a couple of secrets used by Arithmancers on the Indian subcontinent that are easy to learn and can help a great deal when you need to find the "right time" or the "right answer."

Arithmantic Secret #1: The Clock & The Calendar

The seven day week was established in very ancient times. You may have heard about the 10 day weeks in Egypt and ancient China, but the common week has won the competition and become the universally accepted system of time measurement throughout the world.

The oldest physical evidence we have of its existence comes from the discovery of the Disc of Kronos, an artifact of the Minoan civilization that was used to measure the passage of time by way of the orbits of the planets. While the Moon has an approximately 7 day period between its four major phases, it takes Saturn about 7 years to transit through one quarter of the Zodiac. What's amazing about this ancient object is that it accurately measures out a 365.25 day year, based on the eclipse year and the cycles of Jupiter and Saturn – a very low-tech device using the ratios of whole numbers that describe the orbits of the celestial bodies.

A common year consists of just over 13 Lunations (from one New Moon to the next) of approximately 28 days apiece. 13×28 equals 364. Because of this 1.25 day discrepancy, using the Moon as an accurate measure of months is not possible. Due to the “uneven” structure of the Earth-Sun-Moon relationship, the ancients developed a Lunar Calendar that was quite accurate; every few years they would add in a month, or take one away in order to make the difference, and establish a perfect calendar system based on the movements of the Moon and the Sun. Some of these Lunar Calendars are still in use today, usually for timing religious observances and cultural holidays – in fact, Easter Sunday is a holiday celebrated in the modern world that is calculated on the basis of the Spring Equinox, Sunday and the Full Moon.

As timekeeping became increasingly important, the day was divided into 12 periods between Sunrise and Sunset, and the night was divided in 12 increments from Sunset until the next Sunrise – this occurred long before clocks were invented. The ancients assigned each of the visible planets to the days of the week so that these 24 period days would follow the Chaldean Order of the planets. Amazingly, this scheme worked out so that the last hour of each night would lead to the first hour of the next day without breaking the pattern, and always match the planet of the first hour of the next day. This scheme was used for many years as marking out ritual times for the churches, who rang bells and did special ceremonies and activities according to the planetary hours.

Eventually, as trade and commerce began to be established, clockmakers and merchants designed a system of timekeeping that relied on 24 even hours, starting at midnight. If the

original method of planetary hours had stayed in vogue, a clockmaker would have to make a different set of gears for clocks in Cairo, Paris and Stockholm, because the difference in latitude made for a different length of day and night. Although this method disregarded the astrological roots of timekeeping, it standardized a way of measuring out time evenly in such a way that the hours of the day could easily be understood by everyone.

But the practitioners of Astrology and Numerology adapted, for the most part, and built up a system of virtual hours based on the clock by tuning it to the seven day week established by the Moon. To this day, the days are named after the planets – especially in Latin-based languages like French, where Wednesday is named Mercredi, or Mercury Day and so forth. In English, we've partially adapted names from Germanic mythology; Thursday is Thor's day – Thor was associated with thunder and lightning, just like Jupiter. Wednesday was named after Woden or Odin, the smartest of the Norse gods, like Hermes or Mercury was in southern Europe, while Friday was the day of Freya, the Norse Venus. Tyr or Tiu was the sword god, he gets Tuesday, the day of Mars in the Astrological tradition. We managed to keep Saturday (Saturn) Sunday (the Sun) and Monday (the Moon) – maybe this was some sort of compromise.

Each of the visible planets and the two Luminaries are associated with certain numbers; in fact, Tibetan Astrologers write them as numbers when drawing up their charts and horoscopes. Astro-Numerology is simple and logical; the Sun gets a value of 1, the Moon is 2, Jupiter is 3, Mercury is 5, Venus is 6, Saturn is 8, and Mars is 9. 4 is the North Node of the Moon, which is called a "shadow planet" and is not visible, while 7 is the South Node – these nodes are the points on Earth's orbit where eclipses can occur, as measured in the Zodiac. The ancients knew about this; we have evidence of eclipse prediction that go back thousands of years. At the same time, since these nodes cannot be seen, they were not assigned weekdays, as were the planets but were associated with the Sun (4) and the Moon (7).

This assignment of numbers to the planets and the planets to the days and hours may not seem to be very important, but the techniques of Astro-Numerology, which are often based on the single digit Birthday Number, can be very useful when you want to choose the "right" time to launch or engage in an activity that you would like to turn out as you plan for it to.

As described earlier in the report, there are certain dates that are better for your Birthday Number than others, and certain days of the week that work out more favorably as well. Sometimes they will coincide - which can make for a very special day. If a Personal Day of the nature of an activity you want to pursue falls on one of these favorable weekdays or dates, Indian Astrologers would call this a "Yoga" or a "joining" of personal and cosmic vibrations. This phenomena can be extremely supportive of your efforts. This kind of combination is even more

powerful if it matches your Power Number.

The simplest system of studying these vibrations and being able to use them to your advantage is through the system of Planetary Hours based on the clock and the calendar, rather than the exact time. As we have seen above, the day and night are divided into 12 hours each. They start at 6 AM, which is the “virtual” time of sunrise. The planet that gives its name to the day also gives its name to the first hour of the day, and each of the visible planets follows in the “Chaldean Order.” The Chaldean Order is a standard classification of the visible planets according to their speed of apparent motion, from the slowest to the fastest. In other words, the Chaldean Order enumerates the planets as follows: Saturn, Jupiter, Mars, Sun, Venus, Mercury and Moon.

Here is the table of the Planetary Hours of the Day and Night:

Hour	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
1	Sun	Moon	Mars	Mercury	Jupiter	Venus	Saturn
2	Venus	Saturn	Sun	Moon	Mars	Mercury	Jupiter
3	Mercury	Jupiter	Venus	Saturn	Sun	Moon	Mars
4	Moon	Mars	Mercury	Jupiter	Venus	Saturn	Sun
5	Saturn	Sun	Moon	Mars	Mercury	Jupiter	Venus
6	Jupiter	Venus	Saturn	Sun	Moon	Mars	Mercury
7	Mars	Mercury	Jupiter	Venus	Saturn	Sun	Moon
8	Sun	Moon	Mars	Mercury	Jupiter	Venus	Saturn
9	Venus	Saturn	Sun	Moon	Mars	Mercury	Jupiter
10	Mercury	Jupiter	Venus	Saturn	Sun	Moon	Mars
11	Moon	Mars	Mercury	Jupiter	Venus	Saturn	Sun
12	Saturn	Sun	Moon	Mars	Mercury	Jupiter	Venus
1	Jupiter	Venus	Saturn	Sun	Moon	Mars	Mercury
2	Mars	Mercury	Jupiter	Venus	Saturn	Sun	Moon
3	Sun	Moon	Mars	Mercury	Jupiter	Venus	Saturn
4	Venus	Saturn	Sun	Moon	Mars	Mercury	Jupiter
5	Mercury	Jupiter	Venus	Saturn	Sun	Moon	Mars
6	Moon	Mars	Mercury	Jupiter	Venus	Saturn	Sun

7	Saturn	Sun	Moon	Mars	Mercury	Jupiter	Venus
8	Jupiter	Venus	Saturn	Sun	Moon	Mars	Mercury
9	Mars	Mercury	Jupiter	Venus	Saturn	Sun	Moon
10	Sun	Moon	Mars	Mercury	Jupiter	Venus	Saturn
11	Venus	Saturn	Sun	Moon	Mars	Mercury	Jupiter
12	Mercury	Jupiter	Venus	Saturn	Sun	Moon	Mars

You should know that during the hours from 6 – 11 of both day and night, the second half hour is more favorable. During the hours from 12 – 6 of both day and night, the first half hour is favorable only for destructive purposes as discussed above.

What you see above is a general table that is known in India as a “Hora Table”, while the next table is individual, according to your single-digit or Fadic birthday number. It’s designed to tell you which of the planetary hours are favorable, neutral or unfavorable for you.

Birthday Vibration	Best Hours	Neutral Hours	Inauspicious Hours
6	Mercury, Venus, Saturn	Mars, Jupiter	Sun, Moon

So all you have to do in order to make use of this table is to seek out the most favorable hours for activities based on gain, growth or other constructive pursuits. The neutral hours should be used for destructive pursuit as described above. The Inauspicious Hours should be avoided if you want to get positive results.

To review the points about this system:

- Look for an auspicious weekday according to your Birthday Number
- Check to see if the date of the month is favorable to your Birthday Number; if it is, so much the better.
- It is even better if the auspicious day happens to coincide with a Personal Day that fits your purposes; if not, you can use the Personal Day and the Most Favorable Hour together to suit your purpose.
- If you can find a date in which all three vibrations agree, choosing the right hour can bring excellent results.

Make sure to remember the half-hour rule for fine tuning your timing – during the hours from 6 to 11, the 2nd half hour is favorable for activities in which the objective is gaining the favor of others or increase; during the hours from 12 to 5, the 1st half hour is favorable for activities in which the objective is loss, removal or destruction.

A final note about destructive activities – healing can fit into this category, because you are likely to be trying to remove toxins or imbalances from your body – even eating may be considered destructive, in that you are breaking down food into its basic nutrients. Destruction does not mean that you are doing something wrong, it is just a fact of nature that decay and growth complement each other.

Arithmantic Secret #2: The Mystic Pyramid

Arithmancy is a subject that is often misunderstood. First of all, it is not just about alphabet-to-number conversion. That aspect of Numerology is properly called Isopsephy (Greek) or Gematria (Hebrew/Aramaic) – Wikipedia needs to be corrected.

Arithmancy is the use of numbers and arithmetic for divination, much in the same way that Astrology, Tarot, the I-Ching and other methods are used to gather otherwise unavailable information by diviners throughout the world. While many Numerology techniques are based on the conversion of an alphabet to numbers, there are many techniques of Arithmancy that use numbers alone.

Since numbers are a universal language, we find Arithmantic methods all over the world. For instance, writing Chinese characters requires a certain number of brush strokes. Chinese Arithmancers would count the number of brush strokes it took to write a name or statement and then base their interpretation of the character or future of an individual on number symbolism.

This technique is called The Pyramid. It is used to find answers to significant questions relating directly to your life. It's not only easy and fun, but can provide reliable and deeply meaningful answers when used correctly.

There are some well established rules about formulating the question that you need to be aware of before you learn the system:

- The question should be meaningful and pertain to a matter of importance to you; frivolous questions get frivolous responses.
- The question should relate directly to the person asking it, since truth comes from within.
- The question should be one that you do not already have an answer for; the universe does not like rhetorical questions.
- Yes or No questions get the best results.

It's probably better to show you an example of how it works than to try to explain it from a theoretical viewpoint, so here's a sample question.

"Should I get a dog this year?"

First, count the number of words in the question; this question is a statement of seven words. This 7 becomes the first number in the top row of the pyramid, and goes in the upper left-hand corner. Begin to build the rest of the row by counting the number of letters contained in each word, listing them from left to right, so that the row has 8 letters.

The first row should look like this:

7, 6, 1, 3, 1, 3, 4, 4

To create the second and continuing rows, add the numbers from left to right and list them individually, beneath each calculation.

$7+6=13$, reduced to $1+3=4$, so the first number of the second row will be 4. The next is $6+1=7$, the second number will be 7. Keep going in the same direction, one row at a time, until you have completed the Pyramid.

The final or outcome number is 8. Since 8's planet is Saturn, we can expect delays and obstacles. However, 8 is also a number that represents domesticated animals like dogs, and people such herdsman, carriers and so forth, meaning that this isn't necessarily a no answer, because 8's association with the object of the question means the outcome is about the object, not denying it. In order to

get more information about the outcome, find the arithmantic sum of the numbers in the first row, and compare that sum to the final number of the Pyramid.

The first row of numbers is $7+6+1+3+1+3+4+4 = 29$, which arithmantically sums to $2+9 = 11$, $1+1 = 2$. 2 and 8 are compliments, and 2 indicates that something must change before the result can be achieved. In fact, it could

mean that the person asking is planning to move to a place more suitable for pets, and this is what has to change. You can probably see how this technique of gathering more information, or double-checking the outcome is useful for unclear answers.

Below is a brief description of the outcome numbers and their meanings.

1 is the number of the Sun, and typically means immediate success. This is especially true if it regards a new pursuit; at any rate, the results will come soon.

2 is the number of the Moon. It can show lack of concentration, uneasiness, or instability. At the same time, the Moon is associated with liquids, medicine, chemistry, women in general, and relationships. It gives positive answers, but something needs to change before they can happen.

3 is Jupiter's number, which is positive when the question regards ambition or the pursuit of desires. It indicates social activities, entertainment, knowledge, growth and communication. 3 would be the most desirable result in a question regarding education or childbirth.

4 represents the dark side of the Sun – in India, this is Rahu, the northern “node” of the Moon, or eclipse point. It can mean interference, obstacles and stagnation. With 4 as a result there is no guarantee, especially regarding money. It could very well mean a struggle to achieve any objective.

5 is the number of Mercury, which can be indicative of success if the question regards education, business or relationship questions. You'll need to use caution here, because 5 tends toward freedom, not stability – sometimes it will give an “easy come, easy go” indication, especially during the times when Mercury is retrograde.

6 represents Venus, and favors art, beauty, friendship, peace and harmony. Any question regarding a treaty or agreement, a party, home or family members would want 6 as its final digit. 6 can also mean gifts from women, or an important event in a relationship.

7 is about the life of the mind. Anything requiring reason and forethought is favored, but business and relationships are not. It is associated with Ketu; the south node of the Moon, the other eclipse point. This is a good outcome for questions about ideas, intellectual property and creative work.

8 is the number of Saturn, who brings delays, obstacles and difficulties of all sorts. If the concern is about long-term contracts, farming, manufacturing, financial discipline or money management, it can be favorable.

9 is the number of Mars, the planet of energy, courage and impulsiveness. Success comes through strength and ambition when this vibration appears as the outcome. Overcoming opposition, getting rid of things that are holding you back, and breaking through obstacles are favored by 9.

The Pyramid is a reliable technique of

Arithmancy, but as you can see, it works with ancient planetary associations, and is therefore popular with practitioners of Astro-Numerology. These references to the planets are symbolic; they don't have to do with their positions in the zodiac or their relationship to the horizon.

To review, the number of words in the question is given as the first number in the top row, followed by the number of letters in each of the words. Each number is added to the number to the right, making the second row, and this procedure is repeated until the final number is found.

In order to help you better understand the outcome number, here are some alternate and little known things the numbers, when used in this way, can symbolize. Knowing a few of these will help you see the answers to your questions more clearly. Be careful, because these meanings work well with this method of answering questions only – they have nothing to do with name and birthday analysis.

1 – The number of the Sun, the eagle, the Lion, male royalty, palaces, theaters, beaches, deserts, officers, judges, political leaders, gold, the eyes, favor, security, Sunday.

2 – The number of the Moon, sea creatures and amphibians, women in general, the common people, travelers, fishermen, brewers, messengers, chauffeurs, sudden changes, Monday.

3 – The number of Jupiter, large herbivores,

dolphins and whales, churches, public conventions, doctors, clerical leaders, scholars, lawyers, justice, wisdom, Thursday.

4 – The number of the negative Sun or Rahu, people of harsh speech, difficult places, dense forests, places with snakes, poison, grave situations, expensive things, domineering, fanatical, obscures the truth.

5 – The number of Mercury, all cunning creatures, apes, mathematicians, students, merchants, poets, ambassadors, clerks, opportunists, clever speech, shops, schools, places where games are played, Wednesday.

6 – The number of Venus, calf, goats, deer, jewelers, musicians, actors, artists, those involved in fashion and cosmetics, gardens, fountains, beds, dancing schools, furniture merchants, caterers, groomers, Friday.

7 – The number of the negative Moon or Ketu, vultures, horned animals, places below ground, caves, fanatics for a cause, solitary people, those who renounce the world, spiritual liberation, treasure, wisdom-bearers.

8 – the number of Saturn, dogs, bears, wolves, cats, control, construction workers and tradesmen, those who work behind the scenes, undertakers, gardeners, patient people, serious, commanding, Saturday.

9 – the number of Mars, hawk, shark, predators in general, guard and hunting dogs, soldiers, druggists, surgeons, butchers, thieves, watchmakers, those who work with

fire, cooks, furnaces, competitors, Tuesday.

These are only some of the characteristics that are common to both Eastern and Western numerology, but that are very useful in today's world. Some of them need to be updated; for instance, under 7 you should find recreational drugs and drug abuse, as well as alcoholism. Under 5 you should find all things related to computer programming and hardware, but 6 symbolizes the use of computers for entertainment or the arts.

Use these indications to find out if your answer might be related to the question; sometimes the Pyramid is trying to deliver more information, instead of giving a strict "yes or no" answer.

As you practice working the Pyramid, the numbers will take on more personal meanings, and your interpretations will become much more subtle and accurate than you might currently imagine.

It won't be long before you realize that the most important aspect of learning to use the Pyramid Method is learning to ask the right question. Sometimes questions need to be reframed so that they require a simple yes or no answer. Sometimes the number of words being used to ask the question needs to be reduced; a description of the problem does not get to the heart of the question.

In the process of carefully thinking about the question you want to ask, it's likely that you'll find the answer within, because that's where all answers are anyway.

Final Note

"What we observe is not nature herself, but nature exposed to our method of questioning." Werner Heisenberg

All systems such as Numerology, Astrology, Tarot, I-Ching and other alternative ways of looking at what's going on in our world use a different method of questioning than those we are generally familiar with – a method that stretches beyond the measurements and chemical elements of objective phenomena that are considered "scientific" or "practical." Hopefully, these methods, because they attempt to penetrate the possible meanings of emerging and existing patterns, can give us more individually meaningful answers to the questions we ask.

Scientists and philosophers have been working on the same concepts for a very long time, and many of them spent their time seeking understanding of underlying structures of our individual and shared worlds. With this quest for understanding comes an increasing awareness of the importance of basic or archetypal patterns - this interest is spread across many disciplines

Rupert Sheldrake is famous for his theory of 'Morphogenic Fields', that lie behind behavioral patterns in all kingdoms, while the mathematician Mandelbrot discusses how fractal geometry "imitates" basic forms in the natural world. Gregory Bateson has explored

the "pattern that connects" both in nature as it is and in evolutionary theory. Ilya Prigogine promotes a theory of "dissipative structures" to explain how order emerges from chaos. And of course, Carl Jung's theories about Archetypes and the Collective Unconscious study how consciousness is organized around these all important patterns. Let's not forget how Fibonacci's golden mean has been seen over and over again to be a basic pattern around which nature is organized.

Numbers, as we use them, are easy ways to help us organize and understand these patterns of emergence and activity that exist in ourselves and the world. Opening the mind to the possibilities Numerology offers can expand our consciousness and help us to look into the underlying patterns in our subjective and objective experience. It can also teach us how to work with these patterns to our advantage.

What you have read in these pages is not an exposition of Numerological theory, however. It is a practical and personal method of re-organizing yourself around a few simple yet profound ideas.

One of these ideas is that it is possible to change your circumstances (and your future) by letting go of self-sabotaging habits of thinking that cause you to interact with the world in limiting and unproductive ways.

Another is that it's possible to personally

experience non-ordinary dimensions of a larger reality, and bring the gifts of this kind of experience into your daily life without having to separate yourself from everyday affairs.

You may have also seen that meditation and living in a stress reduced, happier state of mind does not require a special place, supplies or teacher once you learn to pay attention to what you are feeling.

A most important point that is made throughout is that it is not hard to activate your Energetic or Inner Guidance System, which automatically takes you in the direction you want to go, once you've decided what kind of destination you'd like to arrive at.

These are but a few of the points that are made in the report, but many others will be discovered over time, which is the best way for you to learn what they mean for you. Numbers are simple and universal symbols, and should not be burdened by dogmas or belief systems that separate us from one another. There is enough "ideological imperialism" in the world, and it never ends up being helpful when it comes to freedom and love.

We have spoken quite a bit about the Laws of Attraction in these pages, but that is not a doctrinal absolute either. They've been discussed to illustrate a basic fact about Numerology – the numbers along the Life Path represent what you attract to yourself, while those derived from your name are about the choices you can make. Rather than

bore you with statistical proofs or metaphysical theories, we've managed to boil it down to one simple fact of life; you get what you give.

The quality of the choices you make determines the quality of the results you get, not the amount of effort you put into getting those results.

Numerology can be easy, and even fun, as long as you don't start mistaking the numbers for judges, juries and executioners. They describe patterns, cycles and principles in nature that you can utilize as tools for improving your quality of life. How well Numerology works for you is entirely dependent on your willingness to divorce yourself from the cultural patterns and personal habits through which you are limiting your own potential and possibilities, as well as your willingness to understand that you are the product of your previous choices, and your future will be as well.

One last note – it's almost certain that there is a lot of Numerology that you've never seen before included in this report, but you need to know that it barely scratches the surface of the full spectrum of methods and techniques; we have only included those considered to be the most practical methods that you can USE so you can make Numerology work for you.

Your Numerology Report is not a complete view of this art, it is only an invitation to enjoy it on a personal level that cannot be gained from a book. Our goal is to show you, in a

clear and precise way, how you can apply Numerology for your own benefit and for the benefit of others.
